

§ 1910.101

§ 1910.101 Preface.

FmHA or its successor agency under Public Law 103-354 Instruction 1910-C (available in any Farmers Home Administration (FmHA) or its successor agency under Public Law 103-354 office) describes the procedure to be used by FMHA in obtaining commercial credit reports. A nonrefundable fee, set forth in §1910.106(d) of this Instruction will be collected from the applicant, general contractor or dealer contractor who is the subject of the report.

AUTHORITY: 5 U.S.C. 301; 7 U.S.C. 1989; 42 U.S.C. 1480.

Subpart A—Planning and Performing Construction and Other Development

SOURCE: 52 FR 8002, Mar. 13, 1987, unless otherwise noted.

§ 1924.1 Purpose.

This subpart prescribes the basic Farmers Home Administration (FmHA) or its successor agency under Public Law 103–354 policies, methods, and responsibilities in the planning and performing of construction and other development work for insured Rural Housing (RH), insured Farm Ownership (FO), Soil and Water (SW), Softwood Timber (ST), single unit Labor Housing (LH), and Emergency (EM) loans for individuals. It also provides supplemental requirements for Rural Rental Housing (RRH) loans, Rural Cooperative Housing (RCH) loans, multi-unit (LH) loans and grants, and Rural Housing Site (RHS) loans.

[53 FR 35679, Sept. 14, 1988]

§ 1924.2 [Reserved]

§ 1924.3 Authorities and responsibilities.

The County Supervisor and District Director are authorized to redelegate, in writing, any authority delegated to them in this subpart to the Assistant County Supervisor and Assistant District Director, respectively, when determined to be qualified. FmHA or its successor agency under Public Law 103–354 Construction Inspectors, District Loan Assistants, and County Office Assistants are authorized to perform duties under this subpart as authorized in their job descriptions.

§ 1924.4 Definitions.

(a) *Construction*. Such work as erecting, repairing, remodeling, relocating, adding to or salvaging any building or structure, and the installation or repair of, or addition to, heating and electrical systems, water systems, sewage disposal systems, walks, steps, driveways, and landscaping.

(b) *Contract documents*. The borrower-contractor agreement, the conditions of the contract (general, supplementary, and other), the drawings, specifications, warranty information, all addenda issued before executing the contract, all approved modifications thereto, and any other items stipulated as being included in the contract documents.

(c) *Contractor*. The individual or organization with whom the borrower enters into a contract for construction or land development, or both.

(d) *County Supervisor and District Director*. In Alaska, for the purpose of this subpart, “County Supervisor” and “District Director” also mean “Assistant Area Loan Specialist” and “Area Loan Specialist,” respectively. The terms also include other qualified staff who may be delegated responsibilities under this subpart in accordance with the provisions of subpart F of part 2006 (available in any FmHA or its successor agency under Public Law 103–354 office).

(e) *Date of commencement of work*. The date established in a “Notice to Proceed” or, in the absence of such notice,

§ 1924.4

7 CFR Ch. XVIII (1-1-00 Edition)

the date of the contract or other date as may be established in it or by the parties to it.

(f) *Date of substantial completion.* The date certified by the Project Architect/Engineer or County Supervisor when it is possible, in accordance with any contract documents and applicable State or local codes and ordinances, and the FmHA or its successor agency under Public Law 103-354 approved drawings and specifications, to permit safe and convenient occupancy and/or use of the buildings or other development.

(g) *Development.* Construction and land development.

(h) *Development standards.* Any of the following codes and standards:

(1) A standard adopted by FmHA or its successor agency under Public Law 103-354 for each state in accordance with § 1924.5(d)(1)(i)(E) of this subpart.

(2) *Voluntary national model building codes (model codes).* Comprehensive documents created, referenced or published by nationally recognized associations of building officials that regulate the construction, alteration and repair of building, plumbing, mechanical and electrical systems. These codes are listed in exhibit E of this subpart.

(3) *Minimum Property Standards (MPS).* The Department of Housing and Urban Development (HUD) Minimum Property Standards for Housing, Handbook 4910.1, 1984 Edition with Changes. (For One and Two Family Dwellings and Multi-Family Housing).

(i) *Identity of interest.* Identity of interest will be construed as existing between the applicant (the party of the first part) and general contractors, architects, engineers, attorneys, subcontractors, material suppliers, or equipment lessors (parties of the second part) under any of the following conditions:

(1) When there is any financial interest of the party of the first part in the party of the second part. The providing of normal professional services by architects, engineers, attorneys or accountants with a client-professional relationship shall not constitute an identity of interest.

(2) When one or more of the officers, directors, stockholders or partners of the party of the first part is also an of-

ficer, director, stockholder, or partner of the party of the second part.

(3) When any officer, director, stockholder or partner of the party of the first part has any financial interest whatsoever in the party of the second part.

(4) Between the spouse, significant other, relatives, and step-relatives of the principal owners of the party of the first part and its management, such as Grandmother, Aunt, Daughter, Granddaughter, Grandfather, Uncle, Son, Grandson, Mother, Sister, Niece, Cousin, Father, Brother, Nephew;

(5) When the party of the second part advances any funds to the party of the first part.

(6) When the party of the second part provides and pays on behalf of the party of the first part the cost of any legal services, architectural services or engineering services other than those of a surveyor, general superintendent, or engineer employed by a general contractor in connection with obligations under the construction contract.

(7) When the party of the second part takes stock or any interest in the party of the first part as part of the consideration to be paid them.

(8) When there exist or come into being any side deals, agreements, contracts or undertakings entered into thereby altering, amending, or canceling any of the required closing documents except as approved by FmHA or its successor agency under Public Law 103-354.

(9) An identity of interest will also exist when another party can significantly influence the management or operating policies of the transacting parties or if it has an ownership interest in one of the transacting parties and can significantly influence the other to an extent that one or more of the transacting parties might be prevented from fully pursuing its own separate interests.

(j) *Land development.* Includes items such as terracing, clearing, leveling, fencing, drainage and irrigation systems, ponds, forestation, permanent pastures, perennial hay crops, basic soil amendments, pollution abatement and control measures, and other items of land improvement which conserve or permanently enhance productivity.

Also, land development for structures includes the applicable items above, and items such as rough and finish grading, retaining walls, water supply and waste disposal facilities, streets, curbs and gutters, sidewalks, entrancewalks, driveways, parking areas, landscaping and other related structures.

(k) *Manufactured housing.* Housing, constructed of one or more factory-built sections, which includes the plumbing, heating and electrical systems contained therein, which is built to comply with the Federal Manufactured Home Construction and Safety Standards (FMHCSS), and which is designed to be used with or without a permanent foundation. Specific requirements for manufactured homes sites, rental projects and subdivisions are in exhibit J of this subpart.

(l) *Mechanic's and materialmen's liens.* A lien on real property in favor of persons supplying labor and/or materials for the construction for the value of labor and/or materials supplied by them. In some jurisdictions, a mechanic's lien also exists for the value of professional services.

(m) *Modular/panelized housing.* Housing, constructed of one or more factory-built sections, which, when completed, meets or exceeds the requirements of one or more of the recognized development standards for site-built housing, and which is designed to be permanently connected to a site-built foundation.

(n) *Project representative.* The architect's or owner's representative at the construction site who assists in the administration of the construction contract. When required by FmHA or its successor agency under Public Law 103-354, a full-time project representative shall be employed.

(o) *Technical services.* Applicants are responsible for obtaining the services necessary to plan projects including analysis of project design requirements, creation and development of the project design, preparation of drawings, specifications and bidding requirements, and general administration of the construction contract.

(1) *Architectural services.* The services of a professionally qualified person or organization, duly licensed and

qualified in accordance with state law to perform architectural services.

(2) *Engineering services.* The services of a professionally qualified person or organization, duly licensed and qualified in accordance with State law to perform engineering services.

(p) *Warranty.* A legally enforceable assurance provided by the builder (warrantor) to the owner and the FmHA or its successor agency under Public Law 103-354 indicating that the work done and materials supplied conform to those specified in the contract documents and applicable regulations. For the period of the warranty, the warrantor agrees to repair defective workmanship and repair or replace any defective materials at the expense of the warrantor.

[52 FR 8002, Mar. 13, 1987, as amended at 59 FR 6882, Feb. 14, 1994]

§ 1924.5 Planning development work.

(a) *Extent of development.* For an FO loan, the plans for development will include the items necessary to put the farm in a livable and operable condition consistent with the planned farm and home operations. For other types of loans, the plans will include those items essential to achieve the objectives of the loan or grant as specified in the applicable regulation.

(b) *Funds for development work.* The total cash cost of all planned development will be shown on Form FmHA or its successor agency under Public Law 103-354 1924-1, "Development Plan," except Form FmHA or its successor agency under Public Law 103-354 1924-1 may be omitted when: (1) All development is to be done by the contract method, (2) adequate cost estimates are included in the docket, and (3) the work, including all landscaping, repairs, and site development work, is completely described on the drawings, in the specifications, or in the contract documents. Sufficient funds to pay for the total cash cost of all planned development must be provided at or before loan closing. Funds to be provided may include loan proceeds, any cash to be furnished by the borrower, proceeds from cost sharing programs such as Agricultural Stabilization and Conservation Service (ASCS) and Great Plains programs or proceeds from the sale of property in

accordance with paragraph (g) of this section.

(c) *Scheduling of development work.* (1) All construction work included in the development plan for RH loans will be scheduled for completion as quickly as practicable and no later than 9 months from the date of loan closing, except for mutual self-help housing where work may be scheduled for completion within a period of 15 months.

(2) Development for farm program loans will be scheduled for completion as quickly as practicable and no later than 15 months from the date of loan closing unless more time is needed to establish land development practices in the area.

(d) *Construction.* (1) All new buildings to be constructed and all alterations and repairs to buildings will be planned to conform with good construction practices. The FmHA or its successor agency under Public Law 103-354 Manual of Acceptable Practices (MAP) Vol. 4930.1 (available in any FmHA or its successor agency under Public Law 103-354 office), provides suggestions and illustrative clarifications of design and construction methods which are generally satisfactory in most areas. All improvements to the property will conform to applicable laws, ordinances, codes, and regulations related to the safety and sanitation of buildings; standards referenced in Appendices C through F of HUD Handbook 4910.1, Minimum Property Standards for Housing; Thermal Performance Construction Standards contained in exhibit D of this subpart and, when required, to certain other development standards described below.

(i) The development standard applicable to a proposal will be selected by the loan applicant or recipient of an RH Conditional Commitment in accordance with the following. The standard selected must:

(A) Relate to the type(s) of building proposed.

(B) Meet or exceed any applicable local or state laws, ordinances, codes and regulations.

(C) Include all referenced codes and standards.

(D) Exclude inapplicable administrative requirements.

(E) Be the current edition(s) of either paragraph (d)(1)(i)(E)(1) or (2) of this section:

(1) The development standard, consisting of building, plumbing, mechanical and electrical codes, adopted by FmHA or its successor agency under Public Law 103-354 for use in the state (identified in a State Supplement to this section) in which the development is proposed, in accordance with the following:

(i) The adopted development standard shall include any building, plumbing, mechanical or electrical code adopted by the State, if determined by the State Director to be based on one of the model codes listed in exhibit E to this subpart, or, if not available,

(ii) The adopted development standard shall include any building, plumbing, mechanical or electrical code adopted by the state, if determined by the Administrator to be acceptable, or, if not available,

(iii) The adopted development standard shall include the model building, plumbing, mechanical or electrical code listed in exhibit E to this subpart that is determined by the State Director to be most prevalent and appropriate for the state.

(2) Any of the model building, plumbing, mechanical and electrical codes listed in exhibit E to this subpart or the standards defined in § 1924.4(h)(3) of this subpart.

(ii) Guide 2, "FmHA or its successor agency under Public Law 103-354 Design Guide," of this subpart (available in any FmHA or its successor agency under Public Law 103-354 office), includes guidelines for the evaluation of the design features which are not fully addressed in the development standards.

(iii) In new housing, all design, materials and construction will meet or exceed the applicable development standard as provided in paragraph (d)(1)(i) of this section.

(iv) For multi-family residential rehabilitation, as defined in exhibit K of this subpart, all substantial rehabilitation work on existing buildings will meet or exceed the applicable development standard. All moderate rehabilitation work should comply with Guide 3, "Quality and Performance Criteria

for Moderate Rehabilitation,” of this subpart (available in any FmHA or its successor agency under Public Law 103-354 office).

(v) The design and construction of housing repairs made with FmHA or its successor agency under Public Law 103-354 loan or grant funds will, as near as possible, comply with the applicable development standard.

(vi) Farm LH design and construction will comply with the following:

(A) Family projects, where the length of occupancy will be:

(1) Year-round, will meet or exceed the applicable development standard.

(2) Less than 12 months, but more than 6 months, will be in substantial conformance with the applicable development standard and constructed to facilitate conversion to year-round occupancy standards.

(3) Six months or less, may be less than the applicable development standard but should be constructed in accordance with exhibit I of this subpart.

(B) Dormitory and other nonfamily type projects, where the length of occupancy will be:

(1) More than 6 months, will be in substantial conformance with the applicable development standard and will at least meet or exceed the requirements of the Department of Labor, Bureau of Employment Security (29 CFR 1910.140).

(2) Six months or less, will comply with § 1924.5(d)(1)(vi)(A)(3).

(vii) Farm service buildings should be designed and constructed for adaptation to the local area. In designing and locating farm service buildings, consideration will be given to practices recommended by agriculture colleges, the Extension Service (ES), Soil Conservation Service (SCS) and other reliable sources.

(2) Drawings, specifications, and estimates will fully describe the work. Technical data, tests, or engineering evaluations may be required to support the design of the development. The “Guide for Drawings and Specifications,” exhibit C of this subpart, describes the drawings and specifications that are to be included in the application for building construction, and subpart C of part 1924 of this chapter describes the drawings that should be in-

cluded for development of building sites. The specific development standard being used, if required under paragraph (d)(1) of this section will be identified on all drawings and specifications.

(3) Materials acceptance shall be the same as described in paragraph X of exhibit B to this subpart.

(4) Except as provided in paragraphs (d)(4)(i) through (iii) of this section, new building construction and additions shall be designed and constructed in accordance with the earthquake (seismic) requirements of the applicable Agency’s development standard (building code). The analysis and design of structural systems and components shall be in accordance with applicable requirements of an acceptable model building code.

(i) Agricultural buildings that are not intended for human habitation are exempt from these earthquake (seismic) requirements.

(ii) Single family conventional light wood frame dwellings of two stories or 35 feet in height maximum shall be designed and constructed in accordance with the 1992 Council of American Building Officials (CABO) One and Two Family Dwelling Code or the latest edition.

(iii) Single family housing of masonry design and townhouses of wood frame construction and additions financed (either directly or through a guarantee) under title V of the Housing Act of 1949 are recommended to be designed and constructed in accordance with the earthquake (seismic) requirements of one of the building codes that provides an equivalent level of safety to that contained in the latest edition of the National Earthquake Hazard Reduction Program’s (NEHRP) Recommended Provisions for the Development of Seismic Regulations for New Building (NEHRP Provisions).

(iv) Acknowledgment of compliance with the applicable seismic safety requirements for new construction will be contained in the certification of final plans and specification on the appropriate Agency Form.

(e) *Land development.* (1) In planning land development, consideration will be given to practices, including energy conservation measures, recommended

by agricultural colleges, ES, SCS or other reliable sources. All land and water development will conform to applicable laws, ordinances, zoning and other applicable regulations including those related to soil and water conservation and pollution abatement. The County Supervisor or District Director also will encourage the applicant to use any cost-sharing and planning assistance that may be available through agricultural conservation programs.

(2) Site and subdivision planning and development must meet the requirements of subpart C of part 1924 of this chapter.

(3) Plans and descriptive material will fully describe the work.

(4) The site planning design, development, installation and set-up of manufactured home sites, rental projects and subdivisions shall meet the requirements of exhibit J of this subpart and subpart C of part 1924 of this chapter.

(i) Plans for land leveling, irrigation, or drainage should include a map of the area to be improved showing the existing conditions with respect to soil, topography, elevations, depth of topsoil, kind of subsoil, and natural drainage, together with the proposed land development.

(ii) When land development consists of, or includes, the conservation and use of water for irrigation or domestic purposes, the information submitted to the County Supervisor will include a statement as to the source of the water supply, right to the use of the water, and the adequacy and quality of the supply.

(f) *Responsibilities for planning development.* Planning construction and land development and obtaining technical services in connection with drawings, specifications and cost estimates are the sole responsibility of the applicant, with such assistance from the County Supervisor or District Director (whichever is the appropriate loan processing and servicing officer for the type of loan involved), as may be necessary to be sure that the development is properly planned in order to protect FmHA or its successor agency under Public Law 103–354’s security.

(1) *Responsibility of the applicant.* (i) The applicant will arrange for obtaining any required technical services from qualified technicians, tradespeople, and recognized plan services, and the applicant will furnish the FmHA or its successor agency under Public Law 103–354 sufficient information to describe fully the planned development and the manner in which it will be accomplished.

(ii) When items of construction or land development require drawings and specifications, they will be sufficiently complete to avoid any misunderstanding as to extent, kind, and quality of work to be performed. The applicant will provide FmHA or its successor agency under Public Law 103–354 with one copy of the drawings and specifications. Approval will be indicated by the applicant and acceptance for the purposes of the loan indicated by the County Supervisor or District Director on all sheets of the drawings and at the end of the specifications, and both instruments will be a part of the loan docket. After the loan is closed, the borrower will retain a conformed copy of the approved drawings and specifications, and provide another conformed copy to the contractor. Items not requiring drawings and specifications may be described in narrative form.

(iii) FmHA or its successor agency under Public Law 103–354 will accept final drawings and specifications and any modifications thereof only after the documents have been certified in writing as being in conformance with the applicable development standard if required under paragraph (d)(1) of this section. Certification is required for all Single Family Housing (SFH) thermal designs (plans, specifications, and calculations).

(A) Certifications may be accepted from individuals or organizations who are trained and experienced in the compliance, interpretation or enforcement of the applicable development standards for drawings and specifications. Plan certifiers may be any of the following:

- (1) Licensed architects,
- (2) Professional engineers,

(3) Plan reviewers certified by a national model code organization listed in exhibit E to this subpart,

(4) Local building officials authorized to review and approve building plans and specifications, or

(5) National codes organizations listed in exhibit E to this subpart.

(B) The license or authorization of the individual must be current at the time of the certification statement. A building permit (except as noted in paragraph (f)(1)(iii)(C)(2) of this section) or professional's stamp is not an acceptable substitute for the certification statement. However, a code compliance review conducted by one of the National recognized code organizations indicating no deficiencies or the noted deficiencies have been corrected is an acceptable substitute for the certification statement.

(C) For Single Family Housing (one to four family dwelling units) FmHA or its successor agency under Public Law 103-354 may also accept drawings and specifications that have been certified by:

(1) Registered Professional Building Designers certified by the American Institute of Building Design.

(2) A local community, if that community has adopted, by reference, one of the model building codes and has trained official(s) who review(s) plans as well as inspect(s) construction for compliance as a requisite for issuing a building permit. The building permit, issued by the community, may serve as evidence of acceptance. The State Director will determine eligible communities and publish, as a State supplement to this section, a list of those communities that qualify.

(3) A plan service that provides drawings and specifications that are certified by individuals or organizations as listed in paragraph (f)(1)(iii)(A) or (f)(1)(iii)(C) (1) and (2) of this section as meeting the appropriate state adopted development standard.

(4) Builders/Contractors who provide 10-year warranty plans for the specific FmHA or its successor agency under Public Law 103-354 finance dwelling unit that meet the requirements of exhibit L of this subpart.

(5) Builders/Contractors that are approved by the United States Department

of Housing and Urban Development (HUD) for self-certification.

(D) The modifications of certified drawings or specifications must be certified by the same individual or organization that certified the original drawings and specifications. If such individual or organization is not available, the entire set of modified drawings and specifications must be recertified.

(E) The certification of modifications for single family housing (SFH) construction may be waived if the builder or original author of the drawings and specifications provides a written statement that the modifications are not regulated by the applicable development standard. The County Supervisor may consult with the State Office Architect/Engineer as to acceptance of the statement and granting a waiver.

(F) All certifications of final drawings, specifications, and calculations shall be on Form FmHA or its successor agency under Public Law 103-354 1924-25, "Plan Certification."

(2) *Responsibility of the County Supervisor or District Director.* In accordance with program regulations for loans and grants they are required to process, the County Supervisor or District Director, for the sole benefit of FmHA or its successor agency under Public Law 103-354, will:

(i) Visit each farm or site on which the development is proposed. For an FO loan, the County Supervisor and the applicant will determine the items of development necessary to put the farm in a livable and operable condition at the outset. Prepare Form FmHA or its successor agency under Public Law 103-354 1924-1, when applicable in accordance with the Forms Manual Insert (FMI) for the form, after a complete understanding has been reached between the applicant and the County Supervisor regarding the development to be accomplished, including the dates each item of development will be started and completed.

(ii) Notify the loan or grant applicant in writing immediately if, after reviewing the preliminary proposal and inspecting the site, the proposal is not acceptable. If the proposal is acceptable, an understanding will be reached with the applicant concerning the

§ 1924.5

7 CFR Ch. XVIII (1-1-00 Edition)

starting date for each item of development.

(iii) Discuss with the applicant the FmHA or its successor agency under Public Law 103-354 requirements with respect to good construction and land development practices.

(iv) Advise the applicant regarding drawings, specifications, cost estimates, and other related material which the applicant must submit to the FmHA or its successor agency under Public Law 103-354 for review before the loan can be developed. Advise the applicant of the information necessary in the drawings, how the cost estimates should be prepared, the number of sets of drawings, specifications, and cost estimates required, and the necessity for furnishing such information promptly. Advise the applicant that FmHA or its successor agency under Public Law 103-354 will provide appropriate specification forms, Form FmHA or its successor agency under Public Law 103-354 1924-2, "Description of Materials," and Form FmHA or its successor agency under Public Law 103-354 1924-3, "Service Building Specifications." The applicant may, however, use other properly prepared specifications.

(v) Advise the applicant regarding publications, plans, planning aids, engineering data, and other technical advice and assistance available through local, state, and Federal agencies, and private individuals and organizations.

(vi) Review the information furnished by the applicant to determine the completeness of the plans, adequacy of the cost estimates, suitability and soundness of the proposed development.

(vii) When appropriate, offer suggestions as to how drawings and specifications might be altered to improve the facility and better serve the needs of the applicant. The County Supervisor or District Director may assist the applicant in making revisions to the drawings. When appropriate, the contract documents will be forwarded to the State architect/engineer for review. For revisions requiring technical determinations that FmHA or its successor agency under Public Law 103-354 is not able to make, the applicant will be requested to obtain additional technical assistance.

(viii) Provide the applicant with a written list of changes required in the contract documents. The applicant will submit two complete revised (as requested) sets of contract documents, for approval. On one set, the County Supervisor or District Director will indicate acceptance on each sheet of the drawings, and on the cover of the specifications and all other contract documents. At least the date and the initials of the approval official must be shown. On projects where a consulting architect or engineer has been retained, this acceptance will be indicated only after the State Director has given written authorization. The marked set of documents shall be available at the job site at all times for review by FmHA or its successor agency under Public Law 103-354. The second set will become part of the loan docket.

(ix) Review the proposed method of doing the work and determine whether the work can be performed satisfactorily under the proposed method.

(x) Instruct the applicant not to incur any debts prior to loan closing for materials or labor or make any expenditures for such purposes with the expectation of being reimbursed from loan funds.

(xi) Instruct the applicant not to commence any construction nor cause any supplies or materials to be delivered to the construction site prior to loan closing.

(xii) Under certain conditions prescribed in exhibit H of this subpart, provide the applicant with a copy of the leaflet, "Warning—Lead-Based Paint Hazards," which is attachment 1 of exhibit H (available in any FmHA or its successor agency under Public Law 103-354 office), and the warning sheet, "Caution Note on Lead-Based Paint Hazard," which is attachment 2 of exhibit H (available in any FmHA or its successor agency under Public Law 103-354 office).

(g) *Surplus structures and use or sale of timber, sand, or stone.* In planning the development, the applicant and the County Supervisor or District Director should, when practicable, plan to use salvage from old buildings, timber, sand, gravel, or stone from the property. The borrower may sell surplus

buildings, timber, sand, gravel, or stone that is not to be used in performing planned development and use net proceeds to pay costs of performing planned development work. In such a case:

(1) An agreement will be recorded in the narrative of Form FmHA or its successor agency under Public Law 103-354 1924-1 which as a minimum will:

(i) Identify the property to be sold, the estimated net proceeds to be received, and the approximate date by which the property will be sold.

(ii) Provide that the borrower will deposit the net proceeds in the supervised bank account and apply any funds remaining after the development is complete as an extra payment on the loan, or in accordance with § 1965.13(f) of subpart A of part 1965 of this chapter for farm program loans.

(2) The agreement will be considered by the Government as modifying the mortgage contract to the extent of authorizing and requiring the Government to release the identified property subject to the conditions stated in the agreement without payment or other consideration at the time of release, regardless of whether or not the mortgage specifically refers to Form FmHA or its successor agency under Public Law 103-354 1924-1 or the agreement to release.

(3) If the FmHA or its successor agency under Public Law 103-354 loan will be secured by a junior lien, all prior lienholders must give written consent to the proposed sale and the use of the net proceeds before the loan is approved.

(4) Releases requested by the borrower or the buyer will be processed in accordance with applicable release procedures in subpart A or subpart C of part 1965 of this chapter, as appropriate.

(h) *Review prior to performing development work.* For the sole benefit of FmHA or its successor agency under Public Law 103-354, prior to beginning development work, the County Supervisor or District Director will review planned development with the borrower. Adequacy of the drawings and specifications as well as the estimates will be checked to make sure the work can be completed within the time lim-

its previously agreed upon and with available funds. Items and quantities of any materials the borrower has agreed to furnish will be checked and dates by which each item of development should be started will be checked in order that the work may be completed on schedule. If any changes in the plans and specifications are proposed, they should be within the general scope of the work as originally planned. Changes must be approved and processed in accordance with § 1924.10 of this subpart. The appropriate procedure for performing development should be explained to the borrower. Copies of FmHA or its successor agency under Public Law 103-354 forms that will be used during the period of construction should be given to the borrower. The borrower should be advised as to the purpose of each form and at what period during construction each form will be used.

(i) *Time of starting development work.* Development work will be started as soon as feasible after the loan is closed. Except in cases in which advance commitments are made in accordance with subpart A of part 1944 of this chapter or according to § 1924.13(e)(1)(vi)(A) or § 1924.13(e)(2)(ix)(A) of this subpart, no commitments with respect to performing planned development will be made by the County Supervisor, District Director, or the applicant before the loan is closed. The applicant will be instructed that before the loan is closed, debts should not be incurred for labor or materials, or expenditures made for such purposes, with the expectation of being reimbursed from loan funds except as provided in subpart A of part 1943 of this chapter and subparts A and E of part 1944 of this chapter. However, with the prior approval of the National Office, a State Supplement may be issued authorizing County Supervisors to permit applicants to commence welldrilling operations prior to loan closing, provided:

(1) It is necessary in the area to provide the water supply prior to loan closing,

(2) The applicant agrees in writing to pay with personal funds all costs incurred if a satisfactory water supply is not obtained,

§ 1924.6

7 CFR Ch. XVIII (1–1–00 Edition)

(3) Any contractors and suppliers understand and agree that loan funds may not be available to make the payment.

(4) Such action will not result under applicable State law in the giving of priority to mechanics and materialmen's liens over the later recorded FmHA or its successor agency under Public Law 103-354 mortgage, and

(5) FmHA or its successor agency under Public Law 103-354 does not guarantee that the cost will be paid.

[52 FR 8002, Mar. 13, 1987, as amended at 52 FR 19283, May 22, 1987; 52 FR 48391, Dec. 22, 1987; 52 FR 48799, Dec. 28, 1987; 53 FR 43676, Oct. 28, 1988; 59 FR 43723, Aug. 25, 1994; 61 FR 65156, Dec. 11, 1996]

§ 1924.6 Performing development work.

All construction work will be performed by one, or a combination, of the following methods: Contract, borrower, mutual self-help, or owner-builder. All development work must be performed by a person, firm or organization qualified to provide the service. Conditional commitment construction is covered under subpart A of part 1944 of this chapter.

(a) *Contract method.* This method of development will be used for all major construction except in cases where it is clearly not possible to obtain a contract at a reasonable or competitive cost. Work under this method is performed in accordance with a written contract.

(1) *Forms used.* Form FmHA or its successor agency under Public Law 103-354 1924-6, "Construction Contract," will be used for SFH construction. Other contract documents for more complex construction, acceptable to the loan approval official and containing the requirements of subpart E of part 1901 of this chapter, may be used provided they are customarily used in the area and protect the interest of the borrower and the Government with respect to compliance with items such as the drawings, specifications, payments for work, inspections, completion, nondiscrimination in construction work and acceptance of the work. If needed, the Office of the General Counsel (OGC) will be consulted.

The United States (including FmHA or its successor agency under Public Law 103-354) will not become a party to a construction contract or incur any liability under it.

(2) *Contract provisions.* Contracts will have a listing of attachments and the provisions of the contract will include:

- (i) The contract sum.
- (ii) The dates for starting and completing the work.
- (iii) The amount of liquidated damages to be charged.
- (iv) The amount, method, and frequency of payment.
- (v) Whether or not surety bonds will be provided.

(vi) The requirement that changes or additions must have prior written approval of FmHA or its successor agency under Public Law 103-354.

(3) *Surety requirements.* (i) Unless an exception is granted in accordance with paragraph (a)(3)(iii) of this section or when interim financing will be used, surety that guarantees both payment and performance in the amount of the contract will be furnished when one or more of the following conditions exist:

- (A) The contract exceeds \$100,000.
- (B) The loan approval official determines that a surety bond appears advisable to protect the borrower against default of the contractor.
- (C) The applicant requests a surety bond.

(D) The contract provides for partial payments in excess of the amount of 60 percent of the value of the work in place.

(E) The contract provides for partial payments for materials suitably stored on the site.

(ii) If surety bonds are required the construction contract must indicate that the contractor will furnish properly executed surety bonds prior to the start of any work. Exhibits F and G of this subpart as revised by OGC if necessary to comply with local or state statutory requirements will be used as the forms of payment bond and performance bond to be provided. Unless noncorporate surety is provided, the surety bonds may only be obtained from a corporate bonding company listed on the current Department of the Treasury Circular 570 (published annually in the FEDERAL REGISTER), as

holding a certificate of authority as an acceptable surety on Federal bonds and as legally doing business in the State where the land is located. Noncorporate sureties are not recommended and the State Director will be responsible for determining the acceptability of the individual or individuals proposed as sureties on the bonds. The State Director must determine that an individual or individuals proposed as sureties must have cash or other liquid assets easily convertible to cash in an amount at least equal to 25 percent more than the contract amount in order to be acceptable. The individual(s) will pledge such liquid assets in an amount equal to the contract amount. Fees charged for noncorporate sureties may not exceed fees charged by corporate sureties on bonds of equal amount and, in no case, may surety be provided by the applicant or any person or organization with an identity of interest in the applicant's operation. The United States (including FmHA or its successor agency under Public Law 103-354) will incur no liability related in any way to a performance or payment bond provided in connection with a construction contract. FmHA or its successor agency under Public Law 103-354 will be named as co-obligee in the performance and payment bonds unless prohibited by state law.

(iii) When an experienced and reliable contractor cannot obtain payment and performance bonds meeting the surety requirements of paragraph (a)(3)(ii) of this section, the State Director may entertain a request from the applicant for an exception to the surety requirements. The applicant's request must specifically state why the proposed contractor is unable to obtain payment and performance bonds meeting the surety requirements, and why it is financially advantageous for the applicant to award the contract to the proposed contractor without the required bonds.

If the applicant's request is reasonable and justified, and if the proposed contractor is reliable and experienced in the construction of projects of similar size, design, scope, and complexity, the State Director may grant an exception to the surety requirements for loans or grants within the State Director's ap-

proval authority and accept one or a combination of the following:

(A) An unconditional and irrevocable letter of credit issued by a lending institution which has been reviewed and approved by OGC. In such cases, the construction contract must indicate that the contractor will furnish a properly executed letter of credit from a lending institution acceptable to FmHA or its successor agency under Public Law 103-354 prior to the start of any work. The letter of credit must remain in effect until the date of final acceptance of work by the owner and FmHA or its successor agency under Public Law 103-354. In addition, the letter of credit must stipulate that the lending institution, upon written notification by FmHA or its successor agency under Public Law 103-354 of the contractor's failure to perform under the terms of the contract, will advance funds up to the amount of the contract (including all FmHA or its successor agency under Public Law 103-354 approved contract change orders) to satisfy all prior debts incurred by the contractor in performing the contract and all funds necessary to complete the work. Payments may be made to the contractor in accordance with paragraph (a)(12)(i)(C) of this section as if full surety bonds were being provided.

(B) If a letter of credit satisfying the conditions of paragraph (a)(3)(iii)(A) of this section cannot be obtained, the State Director may accept a deposit in the amount of the contract, into an interest or non-interest bearing supervised bank account. In such cases, the construction contract must indicate that the contractor will furnish the required deposit prior to the start of any work and that the funds shall remain on deposit until final acceptance of work by the owner and FmHA or its successor agency under Public Law 103-354. Payments may be made to the contractor in accordance with paragraph (a)(12)(i)(C) of this section as if full surety bonds were being provided.

(C) When the provisions of paragraph (a)(3)(iii)(A) or (B) of this section can be met except that a surety bond, a letter of credit, and/or deposits are not obtainable in full amount of the contract, the State Director may accept an amount less than the full amount of

the contract provided all of the following conditions are met:

(1) The contractor provides a surety bond, a letter of credit, or deposits in the greatest amount possible, and provides documentation indicating the reasons why amounts exceeding the proposed amount cannot be provided.

(2) The applicant agrees to the amount of the surety bond, letter of credit, or deposits proposed, and the State Director determines that the applicant has the financial capability to withstand any financial loss due to default of the contractor.

(3) In the opinion of the State Director, the proposed amount and the method of payment will provide adequate protection for the borrower and the Government against default of the contractor.

(4) The contract provides for partial payments not to exceed 90 percent of the value of the work in place for that portion of the total contract which is guaranteed by an acceptable surety bond, letter of credit, or deposits, and partial payments not to exceed 60 percent of the value of the work in place for that portion of the total contract which is not guaranteed by surety, letter of credit, or deposits.

Example:

Contractor has a surety bond which guarantees payment and performance in an amount of \$150,000 which represents 75 percent of the total contract amount of \$200,000. The contractor's first request for payment appears thus:

—Value of work in place is \$10,000.

—Payment for work guaranteed by surety is 75 percent times \$10,000 times 90 percent is \$6,750.

—Payment for work not guaranteed by surety is 25 percent times \$10,000 times 60 percent is \$1,500.

—Authorized payment is \$8,250.

(Each partial payment shall reflect values for work guaranteed by surety, letter of credit, or deposits, and work not so guaranteed).

(iv) In cases where the contractor does not obtain payment and performance bonds in accordance with the surety requirements of paragraph (a)(3)(ii) of this section, or where an exception to the surety requirements is granted by the State Director, the following steps will be taken to protect the borrower and the government against latent

obligations or defects in connection with the construction:

(A) The contractor will furnish a properly executed corporate latent defects bond or a maintenance bond in the amount of 10 percent of the construction contract; or

(B) An unconditional and irrevocable letter of credit in the amount of 10 percent of the construction contract issued by a lending institution which has been reviewed and approved by OGC; or

(C) A cash deposit into an interest or non-interest bearing supervised bank account in the amount of 10 percent of the construction contract;

(D) The period of protection against latent obligations and/or defects shall be one year from the date of final acceptance of work by the owner and FmHA or its successor agency under Public Law 103-354;

(E) Final payment shall not be rendered to the contractor until the provisions of paragraph (a)(3)(iv) (A), (B) or (C) of this section have been met;

(F) The contract will contain a clause indicating that the contractor agrees to provide surety or guarantee acceptable to the owner and FmHA or its successor agency under Public Law 103-354 against latent obligations and/or defects in connection with the construction.

(4) *Equal opportunity.* Section 1901.205 of subpart E of part 1901 of this chapter applies to all loans or grants involving construction contracts and subcontracts in excess of \$10,000.

(5) *Labor standards provisions.* The provisions of the Davis-Bacon and related acts, which are published by the Department of Labor (29 CFR parts 1, 3 and 5), will apply when the contract involves either LH grant assistance, or 9 or more units in a project being assisted under the HUD section 8 housing assistance payment program for new construction.

(6) *Historical and archaeological preservation.* The provisions of subpart F of part 1901 of this chapter concerning the protection of historical and archaeological properties will apply to all construction financed, in whole or in part, by FmHA or its successor agency under Public Law 103-354 loans and grants. These provisions have special

applicability to development in areas designated by NRCS as Resource Conservation and Development (RC&D) areas. (See part 1942, subpart I of this chapter.)

(7) *Air and water acts.* Under Executive Order 11738, all loans or grants involving construction contracts for more than \$100,000 must meet all the requirements of section 114 of the Clean Air Act (42 U.S.C. 7414) and section 308 of the Water Pollution Control Act (33 U.S.C., section 1813). The contract should contain provisions obligating the contractor as a condition for the award of the contract as follows:

(i) To notify the owner of the receipt of any communication from Environmental Protection Agency (EPA) indicating that a facility to be utilized in the performance of the contract is under consideration to be listed on the EPA list of Violating Facilities. Prompt notification is required prior to contract award.

(ii) To certify that any facility to be utilized in the performance of any non-exempt contractor subcontract is not listed on the EPA list of Violating Facilities as of the date of contract award.

(iii) To include or cause to be included the above criteria and requirements of paragraphs (a)(7) (i) and (ii) of this section in every nonexempt subcontract, and that the contractor will take such action as the Government may direct as a means of enforcing such provisions.

(8) *Architectural barriers.* In accordance with the Architectural Barriers Act of 1968 (Pub. L. 90-480), as implemented by the General Services Administration regulations (41 CFR 101-19.6) and section 504 of the Rehabilitation Act of 1973 (Pub. L. 93-112) as implemented by 7 CFR, parts 15 and 15b, all facilities financed with FmHA or its successor agency under Public Law 103-354 loans and grants and which are accessible to the public or in which people with disabilities may be employed or reside must be developed in compliance with this Act. Copies of the Act and Federal accessibility design standards may be obtained from the Executive Director, Architectural and Trans-

portation Barriers Compliance Board, Washington, DC 20201.

(9) *National Environmental Policy Act.* The provisions of subpart G of part 1940 of this chapter concerning environmental requirements will apply to all loans and grants including those being assisted under the HUD section 8 housing assistance payment program for new construction.

(10) *Obtaining bids and selecting a contractor.* (i) The applicant may select a contractor and negotiate a contract or contact several contractors and request each to submit a bid. For complex construction projects, refer also to § 1924.13(e) of this subpart.

(ii) When a price has already been negotiated by an applicant and a contractor, the County Supervisor, District Director or other appropriate FmHA or its successor agency under Public Law 103-354 official will review the proposed contract. If the contractor is qualified to perform the development and provide a warranty of the work and the price compares favorably with the cost of similar construction in the area, further negotiation is unnecessary. If the FmHA or its successor agency under Public Law 103-354 official determines the price is too high or otherwise unreasonable, the applicant will be requested to negotiate further with the contractor. If a reasonable price cannot be negotiated or if the contractor is not qualified, the applicant will be requested to obtain competitive bids.

(iii) When an applicant has a proposed development plan and no contractor in mind, competitive bidding will be encouraged. The applicant should obtain bids from as many qualified contractors, dealers or tradespeople as feasible depending on the method and type of construction.

(iv) If the award of the contract is by competitive bidding, Form FmHA or its successor agency under Public Law 103-354 1924-5, "Invitation for Bid (Construction Contract)," or another similar invitation bid form containing the requirements of subpart E of part 1901 of this chapter, may be used. All contractors from whom bids are requested should be informed of all conditions of the contract including the time and place of opening bids. Conditions shall

§ 1924.6

7 CFR Ch. XVIII (1-1-00 Edition)

not be established which would give preference to a specific bidder or type of bidder. When applicable, copies of Forms FmHA or its successor agency under Public Law 103-354 1924-6 and FmHA or its successor agency under Public Law 103-354 400-6, "Compliance Statement," also should be provided to the prospective bidders.

(11) *Awarding the contract.* The borrower, with the assistance of the County Supervisor or District Director, will consider the amount of the bids or proposals, and all conditions which were listed in the "Invitation for Bid." On the basis of these considerations, the borrower will select and notify the lowest responsible bidder.

(i) Before work commences, the County Supervisor, District Director or other FmHA or its successor agency under Public Law 103-354 employee having knowledge of contracts and construction practices will hold a preconstruction conference with the borrower(s), contractor and architect/engineer (if applicable). The purpose of the conference is to reach a mutual understanding of each party's responsibilities under the terms and conditions of the contract documents and the loan agreement during the construction and warranty periods. Form FmHA or its successor agency under Public Law 103-354 1924-16, "Record of Preconstruction Conference," may be used as a guide for an agenda.

(ii) A summary of the items covered will be entered in the running case record.

(iii) The contract will then be prepared, signed and copies distributed in accordance with the FMI for Form FmHA or its successor agency under Public Law 103-354 1924-6.

(iv) After a borrower/contractor's contract or subcontract in excess of \$10,000 is received in the FmHA or its successor agency under Public Law 103-354 County or District Office, the responsible FmHA or its successor agency under Public Law 103-354 official will send within 10 calendar days of the date of the contract or subcontract, a report similar in form and content to exhibit C of subpart E of part 1901 of this chapter to the Area Director, Office of Federal Contract Compliance Programs, U.S. Department of Labor,

at the applicable address listed in exhibit E, subpart E of part 1901 of this chapter. The report must contain, at least, the following information: contractor's name, address and telephone number; employer's identification number; amount, starting date and planned completion date of the contract; contract number; and city and DOL region of the contract site. The information for this report should be obtained from the contractor when the contract is awarded.

(12) *Payments for work done by the contract method.* (i) Payments will be made in accordance with one of the following methods unless prohibited by state statute, in which case the State Director shall issue a State Supplement to this section:

(A) The "One-Lump-Sum" payment method will be used when the payment will be made in one lump-sum for the whole contract.

(B) The "Partial payments not to exceed 60 percent of the value of the work in place" payment method will be used when the contractor does not provide surety bond, a letter of credit, or deposits.

(C) The "Partial payments in the amount of 90 percent of the value of the work in place and of the value of the materials suitably stored at the site" payment method will be used when the contractor provides a surety bond equal to the total contract amount.

(D) The "Partial payments which reflect the portions of the contract amount which is guaranteed" method will be used when the contractor provides surety bonds, a letter of credit, or deposits less than the total amount of the contract in accordance with the provisions of paragraph (a)(3)(iii)(C) of this section.

(ii) When Form FmHA or its successor agency under Public Law 103-354 1924-6 is used, the appropriate payment clause will be checked and the other payment clauses not used will be effectively crossed out.

(iii) When a contract form other than Form FmHA or its successor agency under Public Law 103-354 1924-6 is used, the payment clause must conform with paragraph (a)(12)(i) of this section and the appropriate clause as set forth in

Form FmHA or its successor agency under Public Law 103-354 1924-6.

(iv) The borrower and FmHA or its successor agency under Public Law 103-354 must take precautionary measures to see that all payments made to the contractor are properly applied against bills for materials and labor procured under the contract. Prior to making any partial payment on any contract where a surety bond is not used, the contractor will be required to furnish the borrower and the FmHA or its successor agency under Public Law 103-354 with a statement showing the total amount owed to date for materials and labor procured under the contract. The contractor also may be required to submit evidence showing that previous partial payments were applied properly. When the borrower and the County Supervisor or District Director have reason to believe that partial payments may not be applied properly, checks may be made jointly to the contractor and persons who furnished materials and labor in connection with the contract.

(v) When partial payments are requested by the contractor and approved by the owner, the amount of the partial payment will be determined by one of the following methods:

(A) Based upon the percentage completed as shown on a recently completed and properly executed Form FmHA or its successor agency under Public Law 103-354 1924-12, "Inspection Report."

(B) When the structure will be covered by an insured 10-year warranty, the insurer's construction inspector must provide FmHA or its successor agency under Public Law 103-354 with any available copies of inspection reports showing percentage of completion immediately after the inspections are completed. To make partial payments when copies of inspection reports are not available, the responsible FmHA or its successor agency under Public Law 103-354 official will make the inspections or will be guided by the provisions of § 1924.6(a)(12)(v)(C) of this subpart. If further assurance is deemed necessary to justify partial payments, the FmHA or its successor agency under Public Law 103-354 official may

make onsite inspections or require additional information.

(C) Based upon an application for payment containing an estimate of the value of work in place which has been prepared by the contractor and accepted by the borrower and FmHA or its successor agency under Public Law 103-354. When the contract provides for partial payments for materials satisfactorily stored at the site, the application for payment may include these items. Prior to receiving the first partial payment, the contractor should be required to submit a list of major subcontractors and suppliers and a schedule of prices or values of the various phases of the work aggregating the total sum of the contract such as excavation, foundations, framing, roofing, siding, mill work, painting, plumbing, heating, electric wiring, etc., made out in such form as agreed upon by the borrower, FmHA or its successor agency under Public Law 103-354, and the contractor. In applying for payments, the contractor should submit a statement based upon this schedule. See exhibit A of this subpart for guidance in reviewing the contractor's schedule of prices and estimating the value of the work in place.

(vi) *Final payment.* (A) When the structure will be covered by an insured 10-year warranty, the insurer must provide an insured 10-year warranty policy (or a binder if the policy is not available) before final payment is made to the builder.

(B) Final payment of the amount due on the contract or disbursement of the FmHA or its successor agency under Public Law 103-354 loan funds where an interim loan was used will be made only upon completion of the entire contract, final inspection by FmHA or its successor agency under Public Law 103-354, acceptance of the work by FmHA or its successor agency under Public Law 103-354 and the borrower, issuance of any and all final permits and approvals for the use and occupancy of the structure by any applicable state and local governmental authorities, and compliance by the contractor with all terms and conditions of the contract. In the event the work of construction is delayed or interrupted by reason of fire, flood unusually stormy weather,

war, riot, strike, an order, requisition or regulation of any governmental body (excluding delays related to possible defects in the contractor's performance and excluding delays caused by the necessity of securing building permits or any required inspection procedures connected therewith) or other contingencies reasonably unforeseeable and beyond the reasonable control of the contractor, then with the written consent of FmHA or its successor agency under Public Law 103-354, the date of completion of the work may be extended by the owner by the period of such delay, provided that the contractor shall give the owner and FmHA or its successor agency under Public Law 103-354 written notice within 72 hours of the occurrence of the event causing the delay or interruption.

(C) Prior to making final payment on the contract when a surety bond is not used or disbursing the FmHA or its successor agency under Public Law 103-354 loan funds when an interim loan was used, FmHA or its successor agency under Public Law 103-354 will be provided with a Form FmHA or its successor agency under Public Law 103-354 1924-9, "Certificate of Contractor's Release," and Form FmHA or its successor agency under Public Law 103-354 1924-10, "Release by Claimants," executed by all persons who furnished materials or labor in connection with the contract. The borrower should furnish the contractor with a copy of the "Release by Claimants" form at the beginning of the work in order that the contractor may obtain these releases as the work progresses.

(I) If such releases cannot be obtained, the funds may be disbursed provided all the following can be met:

(i) Release statements to the extent possible are obtained;

(ii) The interests of FmHA or its successor agency under Public Law 103-354 can be adequately protected and its security position is not impaired; and

(iii) Adequate provisions are made for handling the unpaid account by withholding or escrowing sufficient funds to pay any such claims or obtaining a release bond.

(2) The State Director may issue a State Supplement which will:

(i) Not require the use of Form FmHA or its successor agency under Public Law 103-354 1924-10, if, under existing state statutes, the furnishing of labor and materials gives no right to a lien against the property, or

(ii) Provide an alternative method to protect against mechanic's and materialmen's liens. In this case, the use of Form FmHA or its successor agency under Public Law 103-354 1924-10 is optional.

(b) *Borrower method.* The borrower method means performance of work by or under the direction of the borrower, using one or more of the ways specified in this paragraph. Development work may be performed by the borrower method only when it is not practicable to do the work by the contract method; the borrower possesses or arranges through an approved self-help plan for the necessary skill and managerial ability to complete the work satisfactorily; such work not interfere seriously with the borrower's farming operation or work schedule, and the County Office caseload will permit a County Supervisor to properly advise the borrower and inspect the work.

(1) *Ways of performing the work.* The borrower will:

(i) Purchase the material and equipment and do the work.

(ii) Utilize lump-sum agreements for (A) minor items or minor portions of items of development, the total cost of which does not exceed \$5,000 per agreement, such as labor, material, or labor and material for small service buildings, repair jobs, or land development; or (B) material and equipment which involve a single trade and will be installed by the seller, such as the purchase and installation of heating facilities, electric wiring, wells, painting, liming, or sodding. All agreements will be in writing, however, the County Supervisor may make an exception to this requirement when the agreement involves a relatively small amount.

(2) *Acceptance and storage of material on site.* The County Supervisor will advise the borrower that the acceptance of material as delivered to the site and the proper storage of material will be the borrower's responsibility.

(3) *Payment for work done by the borrower method—(i) Payments for labor.*

Before the County Supervisor countersigns checks for labor, the borrower must submit a completed Form FmHA or its successor agency under Public Law 103-354 1924-11, "Statement of Labor Performed," for each hired worker performing labor during the pay period. Ordinarily, checks for labor will be made payable to the workers involved. However, under justifiable circumstances, when the borrower has paid for labor with personal funds and has obtained signatures of the workers on Form FmHA or its successor agency under Public Law 103-354 1924-11 as having received payment, the County Supervisor may countersign a check made payable to the borrower for reimbursement of these expenditures. Under no circumstances will the County Supervisor permit loan funds or funds withdrawn from the supervised bank account to be used to pay the borrower for the borrower's own labor or labor performed by any member of the borrower's household.

(ii) *Payment for equipment, materials or lump-sum agreements.* (A) Before countersigning checks for equipment or materials, the County Supervisor must normally have an invoice from the seller covering the equipment or materials to be purchased. When an invoice is not available at the time the check is issued, an itemized statement of the equipment or materials to be purchased may be substituted until a paid invoice from the seller is submitted, at which time the prepurchase statement may be destroyed.

(B) When an invoice is available at the time the check is drawn, the check will include a reference to the invoice number, the invoice date if unnumbered and, if necessary, the purpose of the expenditure.

(C) The check number and date of payment will be indicated on the appropriate Form FmHA or its successor agency under Public Law 103-354 1924-11, invoice, itemized statement of equipment or materials and/or lump-sum agreement.

(D) Ordinarily, checks for equipment or materials will be made payable to the seller. Under justifiable circumstances, when the borrower has paid for equipment or materials with personal funds and furnished a paid in-

voice, the County Supervisor may countersign a check made payable to the borrower for reimbursement of these expenses.

(E) When an invoice includes equipment or materials for more than one item of development, the appropriate part of the cost to be charged against each item of development will be indicated on the invoice by the borrower, with the assistance of the County Supervisor.

(F) Payment made under lump-sum agreements will be made only when all items of equipment and materials have been furnished, labor has been performed as agreed upon, and the work has been accepted by the borrower and FmHA or its successor agency under Public Law 103-354.

(G) Each paid Form FmHA or its successor agency under Public Law 103-354 1924-11, invoice, itemized statement for equipment or material and/or lump-sum agreement will be given to the borrower in accordance with the FMI.

(c) *Mutual self-help method.* The mutual self-help method is performance of work by a group of families by mutual labor under the direction of a construction supervisor, as described in subpart A of part 1944 of this chapter. The ways of doing the work, buying materials, and contracting for special services are like those used for the borrower method. Materials can be bought jointly by the group of families, but payments will be made individually by each family. In the case of RH loans to families being assisted by Self-Help Technical Assistance (TA) grants in accordance with subpart I of part 1944 of this chapter, the County Supervisor may countersign checks for materials and necessary contract work made payable directly to the TA grantee, provided the District Director determines that:

(1) The grantee acts in the same capacity as a construction manager in the group purchase of material and services.

(2) The grantee has an adequate bookkeeping system approved by the District Director to assure that funds in each RH account are properly distributed and maintained.

(3) The grantee receives no compensation in the way of profit or overhead for this service and all discounts

§ 1924.7

and rebates received in connection with the purchase of materials or services are passed on to the participating families.

(4) The grantee has a record-keeping system which shows that the costs of the materials and services were prorated to each borrower's account in relation to the actual material and service used by each borrower.

(d) *Owner-builder method.* This method of construction applies only to RRH loans made under subpart E of part 1944 of this chapter. Regulations governing this method are found at §1924.13(e)(2) of this subpart.

[52 FR 8002, Mar. 13, 1987, as amended at 55 FR 41833, Oct. 16, 1990; 60 FR 55122, Oct. 27, 1995; 61 FR 56116, Oct. 31, 1996]

§ 1924.7 [Reserved]

§ 1924.8 Development work for modular/panelized housing units.

(a) Exhibit B of this subpart applies to all loans involving modular/panelized housing units.

(b) Complete drawings and specifications will be required as prescribed in exhibit C of this subpart. Each set of drawings will contain the design of the foundation system required for the soil and slope conditions of the particular site on which the modular/panelized house is to be placed.

(c) The manufacturer will provide a certification (exhibit B, attachment 5 of this subpart), stating that the building has been built substantially in accordance with the drawings and specifications. The builder will also provide a certification that the onsite work complies with drawings, specifications, and the applicable development standard (eExhibit B, attachment 5 of this subpart).

(d) Responsibility for field inspections will be in accordance with §1924.9(a) of this subpart. Frequency and timing of inspections will be in accordance with §1924.9(b) of this subpart, except that the Stage 2 inspection should be made during the time and in no case later than two working days after the crews commence work on the site and the house is being erected or placed on the foundation, to determine compliance with the accepted drawings and specifications.

7 CFR Ch. XVIII (1-1-00 Edition)

(e) Periodic plant inspections will be performed in accordance with paragraphs II and III of exhibit B of this subpart. FmHA or its successor agency under Public Law 103-354 employees responsible for inspections in the area in which the manufacturing plant or material supply yard is located will perform such inspections as deemed necessary under paragraph III of exhibit B of this subpart.

(1) Plant inspections will be made if the type construction method used could restrict adequate inspections on the building site.

(2) Plant inspections will be made as often as necessary; however, after initial inspection and acceptance of the unit, only when it appears advisable to ascertain the performance and continuing stability of accepted materials and construction.

(f) Only one contract will be accepted for the completed house on the site owned or to be bought by the borrower. The manufacturer of the house or the manufacturer's agent may be the prime contractor for delivery and erection of the house on the site or a builder may contract with the borrower for the complete house in place on the site. Such contracts should provide that payments will be made only for work in place on the borrower's site.

(g) Payments for modular/panelized units will be made in accordance with the terms of the contract and in compliance with §1924.6(a)(12) of this subpart.

§ 1924.9 Inspection of development work.

The following policies will govern the inspection of all development work.

(a) *Responsibility for inspection.* The County Supervisor or District Director, accompanied by the borrower when practicable, will make final inspection of all development work and periodic inspections as appropriate to protect the security interest of the government. In this respect, inspections other than final inspections, may be conducted by other qualified persons as authorized in paragraph (b)(3) of this section, in §1944.17(a)(2)(iii) of FmHA Instruction 2024-A (available in any RECD field office), and as authorized

under other agreements executed by, or authorized by, the National Office.

The borrower will be responsible for making inspections necessary to protect the borrower's interest. RHS or its successor agency under Public Law 103-354 inspections are not to assure the borrower that the house is built in accordance with the plans and specifications. The inspections create or imply no duty or obligation to the particular borrower. RHS or its successor agency under Public Law 103-354 inspections are for the dual purpose of determining that RHS or its successor agency under Public Law 103-354 has adequate security for its loan and is achieving the statutory goal of providing adequate housing. If difficult technical problems are encountered, the County Supervisor or District Director should request the assistance of the State Office or a qualified technician from SCS or the State University Cooperative Extension Service.

(b) *Frequency of inspections.* The County Supervisor or District Director will inspect development work as frequently as necessary to assure that construction and land development conforms to the drawings and specifications. The final inspection will be made at the earliest possible date after completion of the planned development. When several major items of development are involved, final inspection will be made upon completion of each item.

(1) For new buildings and additions to existing buildings, inspections will be made at the following stages of construction and at such other stages of construction as determined by the County Supervisor or District Director except as modified by paragraph (b)(3) of this section.

(i) *Stage 1.* Customarily, the initial inspection in construction cases is made just prior to or during the placement of concrete footings or monolithic footings and floor slabs. At this point, foundation excavations are complete, forms or trenches and steel are ready for concrete placement and the subsurface installation is roughed in. However, when it is not practicable to make the initial inspection prior to or during the placement of concrete, the County Supervisor or District Director will make the initial inspection as soon

as possible after the placement of concrete and before any backfill is in place.

(ii) *Stage 2.* The Stage 2 inspection will be made when the building is enclosed, structural members are still exposed, roughing in for heating, plumbing, and electrical work is in place and visible, and wall insulation and vapor barriers are installed. Customarily, this is prior to installation of brick veneer or any interior finish which would include lath, wallboard and finish flooring.

(iii) *Stage 3.* The final inspection will be made when all on-site and off-site development has been completed and the structure is ready for occupancy or its intended use.

(2) For rehabilitation of existing buildings, inspections will be made in accordance with paragraphs (b)(1) (ii) and (iii) of this section, and at such other stages of construction to assure that construction is being performed in a professional manner and in accordance with the FmHA or its successor agency under Public Law 103-354 approved drawings and specifications.

(3) For new construction when the structure will be covered by an insured 10-year warranty plan as described in exhibit L of this subpart, only the final inspection is required, except in cases when partial payments are required when the provisions of § 1924.6(a)(12)(v) of this subpart will be followed.

(4) Arrangements should be made to have the borrower join the County Supervisor or the District Director in making periodic inspections as often as necessary to provide a mutual understanding with regard to the progress and performance of the work.

(5) The Borrower should make enough periodic visits to the site to be familiar with the progress and performance of the work, in order to protect the borrower's interest. If the borrower observes or otherwise becomes aware of any fault or defect in the work or non-conformance with the contract documents, the borrower should give prompt written notice thereof to the contractor with a copy to the County Supervisor or District Director responsible for servicing the type of loan or grant involved.

§ 1924.10

(6) The borrower should, when practicable, join the County Supervisor or District Director in making all final inspections.

(7) When irrigation equipment and materials are to be purchased and installed, a performance test under actual operating conditions by the person or firm making the installation should be required before final acceptance is made. The test should be conducted in the presence of the borrower, a qualified technician, and, when practicable, the County Supervisor or District Director. If the FmHA or its successor agency under Public Law 103-354 official is not present at the performance test, he or she should request the technician to furnish a report as to whether or not the installation meets the requirements of the plans and specifications.

(8) For irrigation and drainage construction or any dwelling construction where part or all of the work will be buried or backfilled, interim inspections should be made at such stages of construction that compliance with plans and specifications can be determined.

(c) *Recording inspections and correction of deficiencies.* All periodic and final inspections made by the County Supervisor or District Director will be recorded on Form FmHA or its successor agency under Public Law 103-354 1924-12 in accordance with the FMI. The County Supervisor or District Director will be responsible for following up on the correction of deficiencies reported on Form FmHA or its successor agency under Public Law 103-354 1924-12. When an architect/engineer is providing services on a project, the District Director should notify the architect/engineer immediately of any fault or defect observed in the work or of any nonconformance with the contract document. If the borrower or the contractor refuses to correct the deficiencies, the District Director will report the facts to the State Director who will determine the action to be taken. No inspection will be recorded as a final inspection until all deficiencies or nonconforming conditions have been corrected.

(d) *Acceptance by responsible public authority.* When local (city) county, state,

7 CFR Ch. XVIII (1-1-00 Edition)

or other public authority) codes and ordinances require inspections, final acceptance by the local authority having jurisdiction will be required prior to final inspection or acceptance by FmHA or its successor agency under Public Law 103-354.

(e) *Acceptance by project architect.* If architectural services pursuant to § 1924.13(a) of this subpart have been obtained, final acceptance by the project architect pursuant to § 1924.13(a)(5)(v) of this subpart will be required prior to acceptance by FmHA or its successor agency under Public Law 103-354.

[52 FR 8002, Mar. 13, 1987, as amended at 60 FR 55122, Oct. 27, 1995; 61 FR 2899, Jan. 30, 1996]

§ 1924.10 Making changes in the planned development.

The borrower may request changes in the planned development in accordance with this section.

(a) *Authority of the County Supervisor.* The County Supervisor is authorized to approve changes in the planned development involving loans and grants within the County Supervisor's approval authority provided:

(1) The change is for an authorized purpose and within the scope of the original proposal.

(2) Sufficient funds are deposited in the borrower's supervised bank account or with the interim lender, as appropriate, to cover the contemplated changes when the change involves additional funds to be furnished by the borrower.

(3) The change will not adversely affect the soundness of the operation or FmHA or its successor agency under Public Law 103-354's security. If uncertain as to the probable effect the change would have on the soundness of the operation or FmHA or its successor agency under Public Law 103-354 security, the County Supervisor will obtain advice from the District Director on whether to approve the change.

(4) If a surety bond has been provided on the full amount of the construction contract, the aggregate amount of all contract change orders on Form FmHA or its successor agency under Public Law 103-354 1924-7, "Contract Change Order," or other acceptable form will not exceed 20 percent of the original

contract amount. Change orders for contracts on which a surety bond has been provided which increases the original contract amount by more than 20 percent may only be approved if additional surety is provided in the full revised amount of the contract. For purposes of this paragraph, letters of credit and deposits are not considered surety.

(5) Change orders for contracts on which letters of credit or deposits have been provided on the full amount of the contract which will increase the original contract amount are approved only if additional letters of credit or deposits are provided in the full revised amount of the contract.

(6) Modifications have been certified in accordance with § 1924.5(f)(1)(iii) or certification has been waived in accordance with § 1924.5(f)(1)(iii)(C) of this subpart.

(b) *Authority of the District Director.* The District Director is authorized to approve changes in the development planned with RRH, RCH, and RHS loans and LH loans and grants within the District Director's approval authority, provided the conditions in § 1924.10(a) have been met. For such loans in excess of the District Director's approval authority, the borrower's request with the District Director's recommendation will be forwarded to the State Director for consideration.

(c) *Recording changes in the planned development.* (1) Changes should be accomplished only after FmHA or its successor agency under Public Law 103-354 written approval. Changes will not be included in payment requests until approved by the borrower; the contractor, if applicable; the architect/engineer, if applicable; and the FmHA or its successor agency under Public Law 103-354 loan approval official. Examples of changes requiring documentation are:

(i) Any changes in labor and materials and their respective costs.

(ii) Changes in facility design.

(iii) Any decrease or increase in unit-price on final measurements that are different from those shown in the bidding schedule.

(iv) Any increase or decrease in the time to complete the project.

(2) All changes shall be recorded in chronological order as follows:

(i) Contract method. Changes shall be numbered in sequence as they occur using Form FmHA or its successor agency under Public Law 103-354 1924-7 with necessary attachments.

(ii) Borrower method. An increase or decrease in the cash cost, extension of time, transfer of funds between items, or an addition or deletion of items of development, will be summarized on the front of Form FmHA or its successor agency under Public Law 103-354 1924-1 by striking through the original figures on items and writing in the changes. Changes made in the "Development Plan" in the working drawings, or in the plans and specifications will be dated and initialed by all parties.

(iii) Mutual self-help method. [See paragraph (c)(2)(ii) of this section.]

(iv) Owner-builder method. [See paragraph (c)(2)(i) of this section.]

(3) All changes in facility design and/or materials must be certified in accordance with § 1924.5(f)(1)(iii) of this subpart.

§ 1924.11 District Director's review of incomplete development.

During monthly District Office work organization meetings and during regular visits to the County Office, the District Director will review the progress that is being made in completing development financed with loans within the District Director's and County Supervisor's responsibility.

(a) Once each year the District Director will make a comprehensive review of all development work not completed within the time scheduled. For incomplete development financed with loan or grant funds within the responsibility of the District Director, the District Director will take the necessary actions to assure that the borrower or grantee completes the planned development. For incomplete development financed with loan or grant funds within the responsibility of the County Supervisor, the District Director will give the necessary direction to the County Supervisor to assure completion of the work. In connection with these responsibilities, the District Director will consider:

§ 1924.12

7 CFR Ch. XVIII (1-1-00 Edition)

(1) The current farm and home operations with respect to the need for the development as originally planned.

(2) Revisions to the development plan.

(3) Funds remaining in the supervised bank account.

(4) Need for additional funds.

(5) Personal funds that could be furnished by the borrower.

(6) Estimated completion dates.

(7) The borrower's attitude with respect to completing the development.

(b) After a complete review of the status of development in both the District and County Offices has been made, the District Director will make a written report to the State Director which will include observations and recommendations regarding incomplete development. The report may be included in the District Director's regular report, and will include:

(1) The number of cases in which borrowers have not completed their development within 9, 15 or 24 months when authorized, and also the number of cases in which funds have been exhausted and the work is incomplete.

(2) The number of borrowers who have not completed their development within 3 years from the loan closing, and indicate the action that was taken in each such case.

(c) If the borrower has not completed development work within 3 years after the date of loan closing and the District Director has determined that the borrower cannot or will not complete the development, the District Director will so indicate on Form FmHA or its successor agency under Public Law 103-354 1924-1 and request the State Director to withdraw, for application on the loan, any unused development funds remaining in the borrower's supervised bank account, if the borrower will not sign a check for a refund to the loan account.

§ 1924.12 Warranty of development work.

(a) Form FmHA or its successor agency under Public Law 103-354 1924-19, "Builder's Warranty," or an insured 10-year home warranty as described in exhibit L of this subpart, and normal trade warranties on items of equipment will be issued to the borrower at the

completion of new building construction, dwelling rehabilitation by the contract method, all cases of newly completed and previously unoccupied dwellings or construction under conditional commitments issued to builders and sellers.

(b) If the warranty is not an insured 10-year warranty, a completed Form FmHA or its successor agency under Public Law 103-354 1924-19, with warranty protection for 1 year, must be provided by the builder upon final acceptance of the work by the owner and FmHA or its successor agency under Public Law 103-354. If an insured 10-year warranty is provided, the requirements of exhibit L of this subpart apply, and a copy of the warranty insurance policy or a binder must have been received by FmHA or its successor agency under Public Law 103-354 prior to disbursement of the final payment to the builder.

(c) If, for some reason, the warranty insurance policy cannot be issued, the contractor will be required to execute Form FmHA or its successor agency under Public Law 103-354 1924-19 and the case will be forwarded to the State Director for consideration of debarment under the provisions of subpart M of part 1940 (available in any FmHA or its successor agency under Public Law 103-354 office). The County Supervisor will assist the borrower to the extent necessary under the provisions of the warranty and subpart F of part 1924 of this chapter.

(d) The County Supervisor will take the following action prior to the expiration of the first year of the warranty period:

(1) As soon as the warranty has been executed, the follow-up date for sending Form FmHA or its successor agency under Public Law 103-354 1924-21, "Notice of Expiration of First Year of Warranty," which will be used for the 1 year warranty or the first year of the insured 10-year warranty, will be posted to the "Servicing and Supervision" section of the Management System card.

(2) Form FmHA or its successor agency under Public Law 103-354 1924-21 is provided for use in notifying the borrower of the expiration date of the first year of the warranty. This letter will

be mailed to the borrower early in the second month preceding the expiration date of the first year of the warranty period.

(3) If the County Supervisor or District Director does not hear from the borrower within 30 days, it can reasonably be assumed that no complaint exists or that any complaint has been satisfied unless information to the contrary has been received.

(4) If the borrower notifies FmHA or its successor agency under Public Law 103-354 that any complaint has not been satisfied, an onsite inspection shall be made as early as possible, but not later than 1 month preceding the expiration date of the first year of the warranty. The results of the inspection will be recorded on Form FmHA or its successor agency under Public Law 103-354 1924-12. If the borrower has complaints, the case should be handled in accordance with the provisions of subpart F of part 1924 of this chapter, or as otherwise provided in this subpart.

[52 FR 8002, Mar. 13, 1987, as amended at 54 FR 14334, Apr. 11, 1989]

§ 1924.13 Supplemental requirements for more complex construction.

This section includes additional provisions that apply to planning and conduct of construction work on all multiple family housing projects and other projects that are more extensive in scope and more complex in nature than individual housing units or farm buildings. This section will apply in addition to all other requirements contained elsewhere in this subpart.

(a) *Architectural services.* Complete architectural services, as defined in § 1924.4(o)(1) of this subpart are recommended on all projects. They are required for projects involving an LH grant and for all loans for RRH, RCH, and LH projects consisting of more than 4 units unless prior consent to making an exception to the requirements for complete architectural services is obtained from the National Office. If the applicant or contractor is an architect or organization with architectural capability, the applicant must, nevertheless, hire an independent qualified architect or architectural firm to inspect the construction work and perform other needed serv-

ices during the construction and warranty phases. See Guide 4, attachment 1, "Attachment to AIA Document—Standard Form of Agreement Between Owner and Architect," for further information (available in any FmHA or its successor agency under Public Law 103-354 office).

(1) *Exception.* Any request for National Office consent to an exception being made for complete architectural services should include the proposed drawings and specifications, method of providing specific services, the comments and recommendations of the FmHA or its successor agency under Public Law 103-354 State Architect, and any other pertinent information. The State Director must determine that any services for which an exception is requested can be performed by qualified State or District Office staff members.

(2) *Selecting the architect.* The applicant is responsible for selecting the architect. The District Director with the advice of the State architect/engineer should discuss with the applicant the selection of the architect for the job as early as possible to assist in the site selection and participate in early consultations regarding project scope and design.

(3) *Architectural fees.* Fees for architectural services shall not exceed the fee ordinarily charged by the profession for similar work when FmHA or its successor agency under Public Law 103-354 financing is not involved. The fee should cover only the architectural services rendered by the architect. The reduction or elimination of any services described in paragraph (a)(5) of this section shall be directly reflected in the fee. Fees for special services rendered by the architects, such as the packaging of the loan application or additional nonarchitectural services, will not be authorized to be paid with loan funds.

(4) *Agreement between borrower and architect.* The borrower and the architect will execute a written agreement. The agreement must provide:

(i) The services listed in paragraph (a)(5) of this section.

(ii) The amount of the fee and how it will be determined and paid.

(iii) That the agreement and any amendments to the agreement shall not be in full force and effect until concurred with in writing by the State Director or the State Director's delegate, and it will contain the following provision:

The Farmers Home Administration or its successor agency under Public Law 103-354, as potential lender or insurer of funds to defray the costs of this agreement and without liability for any payments thereunder, hereby concurs in the form, content and the execution of this agreement.

Date _____
FmHA or its successor agency under Public
Law 103-354 Approval Official _____
Title _____

(5) *Specific services.* Architectural services will include six consecutive phases as follows:

(i) *Schematic design phase.* The architect will:

(A) Consult with the applicant to obtain available information pertinent to the project requirements.

(B) Consult with FmHA or its successor agency under Public Law 103-354 State architect/engineer about FmHA or its successor agency under Public Law 103-354 requirements and procedures.

(C) Assist in preparing the project design after analyzing engineering and survey data on the site selected by applicant.

(D) Prepare schematic design studies consisting of drawings and other documents illustrating the scale and relationship of project components for the applicant's approval.

(E) Submit estimates of current development costs based on current area, volume, or other unit costs.

(F) When the applicant and FmHA or its successor agency under Public Law 103-354 have accepted the schematic design studies and estimated development costs, the project architect may be authorized to proceed with the next phase.

(ii) *Design development phase.* The architect will:

(A) Prepare the design development exhibits from the accepted schematic design studies for approval by the applicant. These exhibits should consist of drawings and other documents to fix and describe the size and character of

the entire project as to structural, mechanical, and electrical systems, materials, and other essentials as appropriate.

(B) Submit a further statement of probable construction cost.

(C) Obtain applicant and FmHA or its successor agency under Public Law 103-354 approval of drawings, specifications, and authorization to proceed with next phase.

(iii) *Construction documents phase.* The architect will:

(A) Prepare the working drawings and specifications from the approved design development drawings and set forth in detail the requirements for the construction of the entire project in accordance with applicable regulations and codes; for example, necessary bidding information, assistance in preparing bidding forms, conditions of the construction contract, and the form of agreement between applicant/owner and contractor.

(B) Submit a final and more comprehensive statement of probable development cost. It should show a breakdown of the estimated total development cost of the project and the various trades in enough detail for an adequate review.

(C) Obtain the acceptance of the applicant and FmHA or its successor agency under Public Law 103-354 for contract documents, including approval of the final drawings and specifications and authorization to proceed.

(D) Discuss with the applicant various items as they develop.

(iv) *Bidding or negotiation phase.* The architect will, as appropriate, for a bidded or negotiated contract:

(A) Assist in review and selection of bidders and submission of contract documents to selected bidders.

(B) Assist in the interpretation of drawings and specifications, and other contract documents.

(C) Receive and tabulate all bids.

(D) Review the bids and the negotiated proposals and assist in the award and preparation of construction contracts.

(v) *Construction phase.* This phase includes the administration of the construction contract. It will commence with the award of the construction contract and end when the borrower

makes final payment to the contractor. The architect will:

(A) Attend the preconstruction conference. Advise and consult with the borrower (or the borrower's representative) and issue the borrower's instructions to the contractor.

(B) Prepare change orders.

(C) Keep construction accounts and work as the general administrator of the project during construction.

(D) Interpret the contract documents and have the authority to reject all work and materials which do not comply.

(E) Review and approve shop drawings, samples, and other submissions of the contractor for conformance with the design concept and for compliance with the contract documents.

(F) Conduct periodic inspections of all phases of construction to determine compliance with the contract documents and certify as to the amount is in place and materials suitably stored on site for partial payment estimates. These inspections will be augmented, when necessary, by inspections performed by structural, mechanical, and electrical representatives. Periodic inspections should be made as frequently as is necessary to verify that the work conforms with the intent of the contract documents and that a high quality of workmanship is maintained. The State Director may require a full-time project representative on projects with a total development cost of \$750,000 or more, when in the opinion of the State Director there is a need for such representative, and the State Director states the reasons for such need to the borrower.

(G) Determine, based on the inspections, the dates of substantial completion and final completion; receive on the borrower's behalf all written guarantees and related documents assembled by the contractor; and issue a final certificate for payment.

(vi) *Warranty phase.* The architect will advise and consult with the borrower, as the borrower's representative, about items to be corrected within the warranty period. The architect will accompany the FmHA or its successor agency under Public Law 103-354 representative during the inspection

required one month prior to expiration of the warranty period.

(b) *Other professional services.* The State Director, on the recommendation of the State architect/engineer, may request that additional professional services be provided.

(1) Professional services typically include soils engineering, structural engineering, civil engineering, surveying, land planning, or professional cost estimation or certification. Fees for these services may be paid directly by the borrower or by the architect as reimbursable expenses.

(2) When a project representative is utilized, unless otherwise agreed, the representative will be provided by the consulting architect/engineer. Prior to the preconstruction conference, the architect/engineer will submit a resume of qualifications of the project representative to the applicant and to FmHA or its successor agency under Public Law 103-354 for acceptance in writing. If the applicant provided the project representative, the applicant must submit a resume of the representative's qualifications to the project architect/engineer and FmHA or its successor agency under Public Law 103-354 for acceptance in writing, prior to the preconstruction conference. The project representative will attend the preconstruction conference where duties and responsibilities will be fully discussed. The project representative will work under the general supervision of the architect/engineer. The project representative will maintain a daily diary in accordance with the following:

(i) The diary shall be maintained in a hard-bound book.

(ii) The diary shall have all pages numbered and all entries in ink.

(iii) All entries shall be on daily basis, beginning with the date and weather conditions.

(iv) Daily entries shall include daily work performed, number of men and equipment used in the performance of the work, and all significant happenings during the day.

(v) The diary shall be made available to FmHA or its successor agency under Public Law 103-354 personnel and will be reviewed during project inspections.

(vi) The project representative's diary will become the property of the owner after the project is accepted and final payments are made.

(c) *Drawings.* The type and kinds of drawings should be in accordance with exhibit C of this subpart and subpart D of part 1944 of this chapter.

(1) The drawings must be clear, accurate, with adequate dimensions and of sufficient scale for estimating purposes.

(2) Construction sections and large-scale details sufficient for accurate bidding and for the purpose of correlating all parts of the work should be part of the general drawings. This is particularly important where the size of a project makes necessary the preparation of the general drawings at a scale of 1/8 inch equals 1 foot or less.

(3) Mechanical and electrical work should be shown on separate plans.

(4) Schedules should be provided for doors, windows, finishes, electrical fixtures, finish hardware, and any other specialty items necessary to clarify drawings.

(d) *Specifications.* Trade-type specifications (specifications divided into sections for various trades) should be used. The specifications should be complete, clear, and concise, with adequate description of the various classes of work shown under the proper sections and headings.

(e) *Methods of administering construction.* Projects involving a total development cost of less than \$100,000 which do not include an LH grant may, with the approval of the State Director, follow the contract procedure in § 1924.6(a) of this subpart without modification. Construction of all other projects, however, will be administered by the contract method or owner-builder method as set forth in this section.

(1) *Contract method.* This method of development will be used for all complex construction except in cases where owner-builder method is authorized. Development under this method is done in accordance with § 1924.6(a) of this subpart except as modified by this paragraph. All construction work will be completed under one written construction contract. Guide 1, "Contract Documents," of this subpart (available in any FmHA or its successor agency

under Public Law 103-354 office) is provided to assist FmHA or its successor agency under Public Law 103-354 personnel and applicants in assembling and reviewing contract documents for more complex construction such as that administered under this section.

(i) *Competitive bidding methods.* (A) All construction contracts must be awarded on the basis of competitive bidding unless an exception is granted in accordance with paragraph (e)(1)(vii) of this section thereby permitting contract negotiation. The applicant's architect should prepare the bidding documents. Public notice must be given inviting all interested bidders to submit a bid. Prospective bidders may be contacted asking for their bids; however, public notice is necessary so that all local contractors have the opportunity to submit bids.

(B) A bid bond is required from each bidder in the amount of 5 percent of the bid price as assurance that the bidder will, upon acceptance of the bid, execute the required contract documents within the time specified.

(C) The construction contract will be awarded based on the contract cost, and all conditions listed in the "Invitation to Bid."

(D) If advertising does not provide a satisfactory bid in the opinion of the applicant and FmHA or its successor agency under Public Law 103-354, the applicant shall reject all bids and will then be free to negotiate with bidders on anyone else to obtain a satisfactory contract. The following conditions must be met:

(1) The State Director determines that the original competitive bid process was handled in a satisfactory manner and that there is no advantage to advertising for competitive bid again.

(2) The requirements of paragraph (e)(1)(vii) of this section are met.

(E) If there is no agreement by FmHA or its successor agency under Public Law 103-354 and the applicant as to the construction cost, the State Director will cease any further action on the preapplication and inform the applicant of the right to appeal in accordance with subpart B of part 1900 of this chapter.

(ii) *Contract documents.* Contract documents will conform with recognized

professional practices as prescribed in this paragraph. Such contract documents will contain substantially the following:

- Item I Invitation for Bids (Form FmHA or its successor agency under Public Law 103-354 1924-5)
- Item II Information for Bidders
- Item III Bid
- Item IV Bid Bond
- Item V Agreement (Construction Contract)
- Item VI Compliance Statement (Form FmHA or its successor agency under Public Law 103-354 400-6)
- Item VII General Conditions
- Item VIII Supplemental General Conditions
- Item IX Payment Bond (exhibit F of this subpart)
- Item X Performance Bond (exhibit G of this subpart)
- Item XI Notice of Award
- Item XII Notice of Proceed
- Item XIII Drawings and Specifications
- Item XIV Addenda
- Item XV Contract Change Order (Form FmHA or its successor agency under Public Law 103-354 1924-7)
- Item XVI Labor Standards Provisions [Where applicable]
- Item XVII Monthly Employment Utilization Report (Form CC-257)
- Item XVIII Partial Payment Estimate (Form FmHA or its successor agency under Public Law 103-354 1924-18)
- Item XIX Builder's Warranty (Form FmHA or its successor agency under Public Law 103-354 1924-19)

(A) Substitution of term "architect" for "engineer" may be necessary on some of the forms. Other modifications may be necessary in some cases to conform to the nature and extent of the project. All such contract documents and related items will be concurred with by the State Director, with the assistance of OGC prior to the release of invitations to bid.

(B) Items listed as I through IV and item XI of paragraph (e)(1)(ii) of this section may be omitted when an exception to the competitive bidding requirement is granted in accordance with paragraph (e)(1)(vii) of this section, thereby permitting a negotiated contract.

(C) All negotiated contracts shall include a provision to the effect that the borrower, USDA, the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers, and records of the con-

tractor which are directly pertinent to a specific Federal loan program for the purpose of making audit, examination, excerpts, and transcriptions.

(D) A provision of liquidated damages *will* be included in all contracts. The liquidated damage amount must be reasonable and represent the best estimate possible of how much interest or other costs will accrue on the loan, and also represent any loss of rent or other income which would result from a delay in the completion of the project beyond the estimated completion date.

(E) All contracts shall include a provision for compliance with the Copeland "Anti-Kickback" Act (18 U.S.C. 874) as supplemented in Department of Labor regulations (29 CFR part 3). This Act prohibits anyone from inducing any person in connection with the construction to give up any part of the compensation to which the person is otherwise entitled.

(F) All contracts will contain a certification by the applicant indicating that there is not now nor will there be an identity of interest between the applicant and any of the following: Contractor, architect, engineer, attorney, subcontractors, material suppliers, equipment lessors, or any of their members, directors, officers, stockholders, partners, or beneficiaries unless specifically identified to FmHA or its successor agency under Public Law 103-354 in writing prior to the award of the contract. All contracts must also indicate that when any identity of interest exists or comes into being, the contractor agrees to have construction costs as reported to FmHA or its successor agency under Public Law 103-354 on Form 1924-13, "Estimate and Certificate of Actual Cost," audited by a Certified Public Accountant (CPA) or Licensed Public Accountant (LPA) licensed prior to December 31, 1970, who will provide an opinion as to whether the Form FmHA or its successor agency under Public Law 103-354 1924-13 presents fairly the costs of construction in conformity with eligible construction costs as prescribed in FmHA or its successor agency under Public Law 103-354 regulations.

(G) All contracts on any form other than Form FmHA or its successor agency under Public Law 103-354 1924-6,

§ 1924.13

7 CFR Ch. XVIII (1-1-00 Edition)

must contain the language of clause (D) of Form FmHA or its successor agency under Public Law 103-354 1924-6, which is available in all FmHA or its successor agency under Public Law 103-354 offices. The language of clause (D) of Form FmHA or its successor agency under Public Law 103-354 1924-6 sets forth the Notice of Requirement for Affirmative Action to Ensure Equal Employment Opportunity required by Executive Order 11246, the Equal Opportunity clause published at 41 CFR 60-1.4 (a) and (b), and the Standard Federal Equal Employment Opportunity Construction Contract Specifications required by Executive Order 11246. For contract forms other than Form FmHA or its successor agency under Public Law 103-354 1924-6, Form AD 767, "Equal Employment Opportunity Contract Compliance Notices," which can be obtained from the Finance Office, should be attached and made a part of the contract.

(H) All contracts will contain a provision that they are not in full force and effect until concurred with by the State Director or the State Director's delegate, in writing. Therefore, before loan closing or before the start of construction, whichever occurs first, the State Director or the State Director's delegate will concur in the contract form, content, and execution if acceptable, by including the following paragraph at the end of the contract:

The Farmers Home Administration or its successor agency under Public Law 103-354, as potential lender or insurer of funds to defray to costs of this contract, and without liability for any payments thereunder, hereby concurs in the form, content, and execution of this contract.

Date _____

FmHA or its successor agency under Public Law 103-354 Official _____

Title _____

(I) The requirements of §1924.6 (a)(11)(iv) of this subpart apply to all contracts or subcontracts in excess of \$10,000.

(iii) *Surety*. When multiple advances of loan or grant funds are utilized, surety that guarantees both payment and performance in the full amount of the contract will be provided in accordance

with §1924.6(a)(3)(ii) of this subpart. Exceptions to the surety requirements shall be governed by the following:

(A) In accordance with the guidance and recommendations of OMB Circulars A-102 and A-110, exceptions to the surety requirements of §1924.6(a)(3)(ii) of this subpart will not be granted for nonprofit organization or public body applicants.

(B) For loans or grants to applicants other than non-profit organizations or public bodies that are within the State Director's approval authority, the State Director may, upon request of the borrower or grantee, grant exceptions to the surety requirements in accordance with the provisions of §1924.6(a)(3)(iii) of this subpart. Before granting such an exception, however, the State Director should be provided the following information from the proposed contractor in order to fully evaluate the experience and capabilities of the contractor:

(1) A resume indicating the contractor's history, ability and experience.

(2) A current, dated and signed financial statement of the contractor's operations indicating the payment status of accounts and any contingent liabilities that may exist. FmHA or its successor agency under Public Law 103-354 personnel will be responsible for analyzing the financial statement as to the sufficiency of the contractor's financial capability to carry out construction. The financial strength must demonstrate the ability of the contractor to pay all bills prior to receiving periodic draws of funds from the lender.

(3) A credit report (obtained at no expense to FmHA or its successor agency under Public Law 103-354) attesting to the contractor's credit standing.

(4) A listing of trade references that could be contacted to substantiate the contractor's experience and good standing.

(5) Statements from owners for whom the contractor has done similar work, indicating the scope of the work and the owner's evaluation of the contractor's performance.

(C) For loans or grants to applicants other than non-profit organization or public bodies that are in excess of the State Director's approval authority,

the State Director may request National Office authorization to grant one of the exceptions to the surety requirements as indicated in § 1924.6(a)(3)(iii) of this subpart. The following information must be submitted with the request to the National Office:

(1) An explanation of why interim financing is not available.

(2) An explanation of why the proposed contractor cannot obtain surety bonds meeting the requirements of § 1924.6(a)(3)(ii) of this subpart.

(3) The information listed in paragraph (e)(1)(iii)(B) of this section.

(4) The drawings and specifications for the proposed project, together with the comments of the State architect/engineer.

(5) The applicant's written request for an exception.

(6) An explanation of why the requirements of § 1924.6(a)(3)(iii) (A) or (B) of this subpart cannot be met in those cases where the State Director requests authorization to grant an exception as indicated in § 1924.6(a)(3)(iii)(C) of this subpart. When such a request is made, the documentation required of the contractor under the provision must also be forwarded.

(7) The State Director's recommendation.

(D) Adequate steps will be taken to protect the interests of the borrower and the government in accordance with the payment provisions of § 1924.6(a)(12)(i) of this subpart and any alternative as outlined in § 1924.6(a)(3)(iii)(c) of this subpart.

(iv) *Contract cost breakdown.* In any case where the loan approval official feels it appropriate, and prior to the award or approval of any contract in which there is an identity of interest as defined in § 1924.4 (i) of this subpart, the contractor and any subcontractor, material supplier or equipment lessor sharing an identity of interest must provide the applicant and FmHA or its successor agency under Public Law 103-354 with a trade-item cost breakdown of the proposed contract amount for evaluation. The cost of any surety as required by § 1944.222 (h) and (i) of subpart E of part 1944 of this chapter and § 1924.6(a)(3) of this subpart, or cost cer-

tification as required by paragraph (e)(1)(v) of this section, will be included in the proposed contract amount and shown under General Requirements on Form FmHA or its successor agency under Public Law 103-354 1924-13, which is available in all FmHA or its successor agency under Public Law 103-354 offices. FmHA or its successor agency under Public Law 103-354 personnel will be responsible for reviewing the estimates on Form FmHA or its successor agency under Public Law 103-354 1924-13 to determine if the dollar amounts total correctly, to assure that costs are categorized under their appropriate columns, and to confirm that the estimated costs for all line items are reasonable and customary for the State.

(v) *Cost certification.* Whenever the State Director determines it appropriate, and in all situations where there is an identity of interest as defined in § 1924.4(i) of this subpart, the borrower, contractor and any subcontractor, material supplier, or equipment lessor having an identity of interest must each provide certification using Form FmHA or its successor agency under Public Law 103-354 1924-13 as to the actual cost of the work performed in connection with the construction contract. The construction costs, as reported on Form FmHA or its successor agency under Public Law 103-354 1924-13, must also be audited, in accordance with Government Auditing Standards, by a CPA, or LPA licensed on or before December 31, 1970. In addition, certain agreed upon procedures (available in any FmHA or its successor agency under Public Law 103-354 office) will be performed in accordance with Attestation Standards. In some cases, FmHA or its successor agency under Public Law 103-354 will contract directly with a CPA or LPA for the cost certification. In that event, documentation necessary to have the costs of construction certified by an FmHA or its successor agency under Public Law 103-354 contractor that they were the actual costs of the work performed, as reported on Form FmHA or its successor agency under Public Law 103-354 1924-13, will be provided. Funds which were included in the loan for cost certification and which are ultimately not needed because FmHA or its successor

agency under Public Law 103-354 contracts for the cost certification will be returned on the loan. FmHA or its successor agency under Public Law 103-354 personnel will utilize exhibit M of this subpart (available in any FmHA or its successor agency under Public Law 103-354 office) and Form FmHA or its successor agency under Public Law 103-354 1924-26, "Cost Certification Worksheet," to assist in the evaluation of the cost certification process.

(A) Prior to the start of construction, the borrower, contractor and any subcontractor, material supplier, or equipment lessor sharing an identity of interest must submit, to the CPA or LPA, the accounting system that the borrower, contractor, subcontractor, material supplier or equipment lessor and/or the CPA or LPA proposes to set up and use in maintaining a running record of the actual cost. In order to be acceptable, the borrower must provide a written assertion that it has an accounting system that is suitably designed to provide for a trade-item basis comparison of the actual cost as compared to the estimated cost submitted on Form FmHA or its successor agency under Public Law 103-354 1924-13. Costs pertaining to a specific line item will be set up in the accounting system for that particular account. For instance, only costs of materials, supplies, equipment, and labor associated with concrete will be shown in the concrete account. The accounting system must also restrict costs to those pertaining to a specific project so that costs from multiple projects will not be co-mingled. The independent CPA or LPA shall report on the borrower's assertion in accordance with the Standards for Attestation Engagements of the American Institute of Certified Public Accountants (AICPA). The borrower's and the CPA or LPA's reports on the accounting system shall be provided to FmHA or its successor agency under Public Law 103-354 by the borrower.

(B) Prior to final payment to anyone required to cost certify, a trade-item breakdown showing the actual cost compared to the estimated cost must be provided to the owner and FmHA or its successor agency under Public Law 103-354. Form FmHA or its successor agency under Public Law 103-354 1924-13

is the form of comparative breakdown that must be used, and contains the certifications required of the applicant and contractor prior to final payment. The amounts for builder's general overhead, builder's profit, and general requirements, respectively, shall not exceed the amounts represented on the estimate of cost breakdown provided in accordance with paragraph (e)(1)(iv) of this section for any contractor, subcontractor, material supplier, or equipment lessor having or sharing an identity of interest with the borrower. The amounts for general overhead, builder's profit, and general requirements must be established prior to FmHA or its successor agency under Public Law 103-354 approving the construction contract and will not be changed during the course of construction. This applies to all contractors, subcontractors, material suppliers, or equipment lessors having or sharing an identity of interest with the applicant. Contract change orders will be processed to adjust the contract amount downward prior to the final payment to the contractor, if necessary, to assure that the amounts shown in the certificate of actual costs do not exceed the amounts represented in the contract cost breakdown. Reduction in the builder's profit, and general overhead if needed, will counterbalance any increase reflected in the contract costs. Any funds remaining as a result of hard cost savings will be applied to the account as an extra payment or used for eligible loan purposes approved by FmHA or its successor agency under Public Law 103-354 as long as the improvements are genuinely needed and will enhance marketability of the project. All increases or decreases of 15 percent or more in line item costs will require documentation as to the reason for the increases and/or decreases. The State Director may require documentation for increases and/or decreases of less than 15 percent, if he/she determines it necessary. This information will be required with the cost certification.

(C) The CPA or LPA audit, performed in accordance with Government Auditing Standards, will include such tests of the accounting records and such

other auditing procedures of the borrower and the contractor (and any subcontractor, material supplier or equipment lessor sharing an identity of interest) concerning the work performed, services rendered, and materials supplied in accordance with the construction contract he/she considers necessary to express an opinion on the construction costs as reported on Form FmHA or its successor agency under Public Law 103-354 1924-13. The CPA or LPA shall also perform the additional agreed upon procedures specified by FmHA or its successor agency under Public Law 103-354 (available in any FmHA or its successor agency under Public Law 103-354 office), performed in accordance with Attestation Standards, for the applicant and the contractor (and any subcontractor, material supplier, or equipment lessor sharing an identity of interest) concerning the work performed, services rendered, and materials supplied in accordance with the construction contract.

(D) Upon completion of construction and prior to final payment, the CPA or LPA will provide an opinion concerning whether the construction costs, as reported on Form FmHA or its successor agency under Public Law 103-354 1924-13, present fairly the costs of construction in conformity with eligible construction costs as prescribed in FmHA or its successor agency under Public Law 103-354 regulations.

(E) In some cases, cost certification will be obtained by FmHA or its successor agency under Public Law 103-354 through direct contract with the CPA or LPA. The borrower and his/her CPA or LPA will cooperate fully with the contract CPA or LPA by providing all documentation necessary to conduct the certification. FmHA or its successor agency under Public Law 103-354 reserves the right to determine, upon receipt of the certified Form FmHA or its successor agency under Public Law 103-354 1924-13 and the auditor's report, whether they are satisfactory to FmHA or its successor agency under Public Law 103-354. If not satisfactory to FmHA or its successor agency under Public Law 103-354, the borrower will be responsible for providing additional information.

(F) There will exist no business relationship between the CPA or LPA and the borrower except for the performance of the examination of the cost certification, accounting systems work, and tax preparation. Any CPA or LPA who acts as the borrower's accountant (performing manual or automated bookkeeping services or maintains the official accounting records) will not be the same CPA or LPA who cost certifies the project.

(G) Forms FmHA or its successor agency under Public Law 103-354 1944-30, "Identity of Interest (IOI) Disclosure Certificate" and FmHA or its successor agency under Public Law 103-354 1944-31, "Identity of Interest (IOI) Qualification Form," provide written notification to the borrower that willful and intentional falsification of cost certification documents will result in debarment of all violators in accordance with the provisions of FmHA or its successor agency under Public Law 103-354 Instruction 1940-M (available in any FmHA or its successor agency under Public Law 103-354 office). These forms require the disclosure of all identities of interest associated with project construction, certify the entity's ability to provide the contracted service, and cite the penalties for failure to disclose or falsify such certification. Each applicant/borrower will be required to complete and sign the forms (available in any FmHA or its successor agency under Public Law 103-354 office).

(H) Subcontracting development work.

(I) Contractors will not be allowed to obtain a profit and overhead unless they are performing actual construction. "Actual construction" means "work" as defined in American Institute of Architects (AIA) documents: " * * * labor, materials, equipment, and services provided by the contractor to fulfill the contractor's obligations." Under this definition, contractors who choose to subcontract out construction of the project to another contractor will not obtain a builder's fee (general overhead and profit) when:

(i) More than 50 percent of the contract sum in the construction contract is subcontracted to one subcontractor,

§ 1924.13

7 CFR Ch. XVIII (1-1-00 Edition)

material supplier, or equipment lessor, and/or

(ii) Seventy-five percent or more with three or fewer subcontractors, material suppliers and/or equipment lessors.

(2) NOTE: If two or more subcontractors have common ownership, they are considered as one subcontractor.

(3) How to apply rule:

(i) The 50 percent rule will apply when division of the amount of the largest subcontract by the contract sum of the construction contract results in more than 50 percent.

(ii) The 75 percent rule will apply when division of the sum of the amounts of the three largest subcontracts by the contract sum of the construction contract results in 75 percent or more.

(I) Qualified contracting entities. Contractors, subcontractors, material suppliers, and any other individual or organization sharing an identity of interest and providing materials or services for the project must certify that it is a viable, ongoing trade or business qualified and properly licensed to undertake the work for which it intends to contract. Form FmHA or its successor agency under Public Law 103-354 1944-31 will be prepared and executed by the contracting entities. The form provides notification to the entities of the penalty, under law, for erroneously certifying to the statements contained therein. Debarment actions will be instituted against entities who fail to disclose an identity of interest in accordance with the provisions of FmHA or its successor agency under Public Law 103-354 Instruction 1940-M (available in any FmHA or its successor agency under Public Law 103-354 office).

(vi) *Method of payments.* Partial payments may be requested in accordance with the terms of the construction contract on Form FmHA or its successor agency under Public Law 103-354 1924-18, "Partial Payment Estimate," or other professionally recognized form that contains the architect's certification, approval of the owner, and conditional acceptance of FmHA or its successor agency under Public Law 103-354 as shown in Form FmHA or its successor agency under Public Law 103-354 1924-18.

(A) If interim financing is available at reasonable rates and terms for the construction period, such financing shall be obtained. exhibit B of subpart E of part 1944 of this chapter shall be used to inform the interim lender that FmHA or its successor agency under Public Law 103-354 will not close its loan until the project is substantially complete, ready for occupancy, evidence is furnished indicating that all bills have been paid or will be paid at loan closing for work completed on the project, all inspections have been completed and all required approvals have been obtained from municipal and governmental authorities having jurisdiction over the project.

Upon presentation of proper partial payment estimates approved by the applicant and accepted by FmHA or its successor agency under Public Law 103-354, the interim lender may advance construction funds in accordance with the payment terms of the contract. It is suggested that partial payments not exceed 90 percent of the value of work in place and materials suitably stored on site.

(B) When interim financing is not available, payments will be made in accordance with § 1924.6(a)(12) of this subpart.

(vii) *Exception to competitive bidding—*

(A) *For all applicants.* An applicant may negotiate a construction contract provided the State Director grants an exception and documentation shows that:

(1) The contract price is competitive with other projects similar in construction and design being built in the area.

(2) The proposed contractor is experienced in construction of projects of similar size, scope, and complexity, and is recognized as a reliable builder.

(3) The proposed development work meets all requirements of this subpart.

(4) If appropriate for nonprofit organizations and public bodies, the applicant provides a copy of a duly authorized resolution by its governing body requesting FmHA or its successor agency under Public Law 103-354 to permit awarding the construction contract without formal bidding.

(5) The applicant is permitted by state law, local law and/or organizational by-laws to negotiate a construction contract.

(6) The requirements of paragraphs (e)(1) (ii), (iii), (iv) and (v) of this section are met.

(B) In considering an exception to competitive bidding, the following additional steps will be taken in all cases.

(1) If, after a full review of the case documents by the appropriate members of the State Office staff, the State Director determines that the requirements have been met and the costs are reasonable, an exception to competitive bidding may be granted. Written documentation of the State Office review results will be placed in the application file.

(2) If after the full review by the State Office staff, the State Director determines that the negotiated contract price is not competitive with other similar projects in construction and design being built in the area, the applicant will be requested to competitively bid the construction of the project in accordance with paragraph (e)(1)(i) of this section.

(3) If there is no agreement by FmHA or its successor agency under Public Law 103-354 and the applicant as to the construction cost, the State Director will cease any further action on the preapplication and inform the applicant of the right to appeal in accordance with subpart B of part 1900 of this chapter.

(C) Any requests for exceptions to competitive bidding that are not covered in this section may be submitted to the National Office for consideration.

(viii) *Exception to contract method—public body.* With the approval of the National Office, the State Director may grant to a public body an exception to the requirement for using contract method construction under the following circumstances:

(A) The loan or grant is for repair or rehabilitation of existing facilities and it is not practicable to perform all work by the contract method.

(B) The applicant has the managerial ability and qualified employees necessary to complete the work successfully.

(C) That applicant submits a written request to the District Director indicating:

(1) The scope of work and construction timetable;

(2) What phases of work can be contracted and what cannot;

(3) Why is it not practicable to contract all phases;

(4) Management ability and employee qualifications for performing the work;

(5) Proposed method of fund control and frequency of payments;

(6) How changes in scope of work and construction timetable will be approved; and,

(7) Proposed method of certifying progress and requesting payments.

(D) The request, recommendations of the District Director, appropriate members of the State Office staff and the State Director and the application file will be sent to the National Office.

(2) *Owner-builder method.* This method of development is used only when requested by profit or limited profit RRH applicants when the applicant or any of its controlling principals (such as stockholders, members, partners other than limited partners, directors, or officers), are general contractors by profession, and will serve as the builder of the project without a written construction contract. The State Director may make an exception to the contract method of construction and authorize proceeding by the owner-builder method of construction in accordance with the provisions of this section if the amount of the loan(s) does not exceed the State Director's approval authority. For projects over the State Director's authority, prior written consent of the National Office is required. In such cases, the drawings, specifications, cost estimates, copy of the State Architect/Engineer's review and detailed information on the applicant's qualifications will be submitted to the National Office along with the State Director's recommendations.

(i) The applicant's request to construct a project by the owner-builder method of construction shall be in the form of a letter giving specific and detailed information concerning the owner-builder's proposal, and the qualifications and past experience of the owner-builder. The following information must be included with the request:

(A) A resume indicating the owner-builder's history, ability, and experience.

(B) Dated and signed financial statements on the owner-builder's operation (including balance sheets and statements of income and expense) from current and prior years indicating the payment status of the owner-builder's accounts and any contingent liabilities that may exist. FmHA or its successor agency under Public Law 103-354 personnel will be responsible for analyzing the financial statement as to the sufficiency of the owner-builder's financial capability to carry out construction. The financial strength must demonstrate the ability of the owner-builder to pay all bills prior to receiving periodic draws of funds from the lender.

(C) A written, dated, and signed statement agreeing to provide any funds necessary in excess of the applicant's contribution and the loan amount to complete the project.

(D) A credit report (obtained at no expense to FmHA or its successor agency under Public Law 103-354) attesting to the owner-builder's credit standing.

(E) A listing of trade references that could be contacted to substantiate the owner-builder's experience and good standing.

(F) Statements from other persons for whom the owner-builder has done similar work, indicating the scope of the work and that person's evaluation of the owner-builder's performance.

(G) A current, dated, and signed trade-item cost breakdown of the estimated total development cost of the project which has been prepared by the applicant/owner-builder. Form FmHA or its successor agency under Public Law 103-354 1924-13 will be used for this purpose. If cost certification services are required by FmHA or its successor agency under Public Law 103-354, the cost of such services may be included in the total development cost of the project. Any subcontractor, material supplier, or equipment lessor sharing an identity of interest with the applicant/owner-builder as defined in § 1924.4(i) of this subpart must also provide a trade-item cost breakdown of the proposed amount.

(H) Prior to the start of construction, the owner-builder and any subcontractor, material supplier, or equipment lessor sharing an identity of interest must submit, to the CPA or LPA, the accounting system that the owner-builder, subcontractor, material supplier or equipment lessor and/or the CPA or LPA proposes to set up and use in maintaining a running record of the actual cost. In order to be acceptable, the owner-builder must provide a written assertion that it has an accounting system that is suitably designed to provide for a trade-item basis comparison of the actual cost as compared to the estimated cost submitted on Form FmHA or its successor agency under Public Law 103-354 1924-13. Costs pertaining to a specific line item will be set up in the accounting system for that particular account. For instance, only costs of materials, supplies, equipment, and labor associated with concrete will be shown in the concrete account. The accounting system must also restrict costs to those pertaining to a specific project so that costs from multiple projects will not be co-mingled. The independent CPA or LPA shall report on the owner-builder's assertion in accordance with the Standards for Attestation Engagements of the AICPA. The owner-builder's and the CPA or LPA's reports on the accounting system shall be provided to FmHA or its successor agency under Public Law 103-354 by the owner-builder.

(I) A written, dated, and signed statement agreeing to permit U.S. Department of Agriculture, the Comptroller General of the United States, or any of their duly authorized representatives, to have access to any books, documents, papers, and records which are directly pertinent to the specific Federal program for the purpose of making audit, examination, excerpts and transcriptions.

(ii) In order to grant an exception to the contract method of construction and proceed with the owner-builder method of construction, the State Director must determine that the following conditions exist:

(A) The applicant or at least one of its principals is a fully qualified and licensed (if necessary under applicable

local law) builder by profession, has adequate experience in constructing the type of units proposed as well as projects of similar size, scope, and complexity and will be able to complete the work in accordance with the FmHA or its successor agency under Public Law 103-354 approved drawings and specifications.

(B) Based upon the information presented in the applicant's financial statements, the applicant is presently able and is likely to continue to be able to provide any funds necessary in excess of the applicant's contribution and the loan amount to complete the project.

(C) The total development cost of the project does not exceed that which is typical for similar type projects in the area. The total development cost recognized by FmHA or its successor agency under Public Law 103-354 for each individual case will be determined by the MFH Coordinator with the advice of the State Architect.

(D) The owner-builder has provided sufficient information on all contracts or subcontracts in excess of \$10,000 to permit compliance with § 1924.6(a)(11)(iv) of this subpart.

(iii) In addition to the requirements for the State Director to authorize the owner-builder method of construction as indicated in § 1924.13(e)(2) (i) and (ii) of this subpart, the following additional steps will be taken by the State Director.

(A) If, after a full review of the case documents by the appropriate members of the State Office staff, the State Director determines that the requirements have been met and the construction cost is reasonable, an exception to competitive bidding may be granted. Written documentation of the State Office review results will be placed in the application file.

(B) If, after the full review by the State Office staff, the State Director determines that the construction cost is not competitive with other similar projects in construction and design being built in the area, the applicant will be requested to competitively bid the construction of the project in accordance with paragraph (e)(1)(i) of this section.

(C) If there is no agreement by FmHA or its successor agency under Public Law 103-354 and the applicant as to construction cost and the applicant is not agreeable to any of the aforementioned alternatives, the State Director will cease any further action on the preapplication and inform the applicant of the right to appeal, in accordance with subpart B of part 1900 of this chapter.

(iv) The development cost of the project may include a typical allowance for general overhead, general requirements and a builder's profit. These amounts may be determined by local investigation and also from HUD data for the area. The applicant/owner-builder and any subcontractors, material suppliers and equipment lessors having or sharing an identity of interest with the applicant/owner-builder may not be permitted a builder's profit, general overhead, and general requirements which exceed the amounts represented on their cost breakdown.

(v) Under no circumstances will loan funds be used to pay the owner/builder or its stockholders, members, directors or officers, directly or indirectly, any profits from the construction of the project except a typical builder's fee for performing the services that would normally be performed by a general contractor under the contract method of construction. Discounts and rebates given the owner-builder in advance must be deducted before the invoices are paid. If discounts or rebates are given after the invoices are paid, the funds must be returned to the supervised bank account or applied on the interim construction loan, as appropriate. Under no circumstances will the dollar amount be placed in the reserve account.

(vi) The plan and specifications must be specific and complete so that there is a clear understanding as to how the facility will be constructed and the materials that will be used.

(vii) When architectural services are required by § 1924.13(a) during the construction and warranty phases they must be provided by an architect who has no identity of interest with the applicant/owner-builder. The services to be rendered during the construction and warranty phases include, but are

not limited to inspections, changes in the scope of project or work to be done, administration of construction accounts, rejection of work and materials not conforming to the FmHA or its successor agency under Public Law 103-354 approved drawings and specifications, and other appropriate service listed in §1924.13(a)(5) (v) and (vi) of this subpart.

(viii) The applicant/owner-builder and any subcontractor, material supplier, or equipment lessor sharing an identity of interest as defined in §1924.4(i) of this subpart must each provide certification as to the actual cost of the work performed in connection with the construction of the project on Form FmHA or its successor agency under Public Law 103-354 1924-13 prior to final payment. The construction costs, as reported on Form FmHA or its successor agency under Public Law 103-354 1924-13, must be audited by a CPA, or LPA licensed on or before December 31, 1970, in accordance with Government Auditing Standards, and certain agreed upon procedures (available in any FmHA or its successor agency under Public Law 103-354 office) performed in accordance with Attestation Standards. In some cases, FmHA or its successor agency under Public Law 103-354 will contract directly with a CPA or LPA for the cost certification. In that event, documentation necessary to have the costs of construction certified by an FmHA or its successor agency under Public Law 103-354 contractor that they were the actual costs of the work performed, as reported on Form FmHA or its successor agency under Public Law 103-354 1924-13, will be provided. Funds which were included in the loan for cost certification and which are ultimately not needed because FmHA or its successor agency under Public Law 103-354 contracts for the cost certification will be returned on the loan.

(A) The CPA or LPA's audit, performed in accordance with Government Auditing Standards, will include such tests of the accounting records and such other auditing procedures of the applicant/owner-builder (and any subcontractor, material supplier, or equipment lessor sharing an identity of interest) concerning the work performed,

services rendered, and materials supplied in connection with the construction of the project he/she considers necessary to express an opinion on the construction costs as reported on Form FmHA or its successor agency under Public Law 103-354 1924-13. Upon completion of construction and prior to final payment, the CPA or LPA will provide an opinion as to whether the construction costs as reported on Form FmHA or its successor agency under Public Law 103-354 1924-13 present fairly the costs of construction in conformity with eligible construction costs as prescribed in FmHA or its successor agency under Public Law 103-354 regulations. FmHA or its successor agency under Public Law 103-354 reserves the right to determine, upon receipt of the certified Form FmHA or its successor agency under Public Law 103-354 1924-13 and the auditor's report, whether they are satisfactory to FmHA or its successor agency under Public Law 103-354. At a minimum, the CPA or LPA shall also perform any additional agreed upon procedures (available in any FmHA or its successor agency under Public Law 103-354 office) specified by FmHA or its successor agency under Public Law 103-354, performed in accordance with Attestation Standards, of the owner-builder (and any subcontractor, material supplier, or equipment lessor sharing an identity of interest) concerning the work performed, services rendered, and materials supplied in connection with the construction. There will exist no business relationship between the CPA or LPA and the borrower except for the performance of the examination of the cost certification, accounting systems work, and tax preparation. Any CPA or LPA who acts as the borrower's accountant (performing manual or automated bookkeeping services or maintains the official accounting records) will not be the same CPA or LPA who cost certifies the project.

(B) Prior to final payment to anyone required to cost certify, FmHA or its successor agency under Public Law 103-354 must be provided with a certification and a trade-item breakdown showing the actual cost compared to the estimated cost furnished in accordance with paragraph (e)(2)(i)(G) of this

section. Form FmHA or its successor agency under Public Law 103-354 1924-13 is the form of comparative breakdown that must be used, and contains the certification required of the applicant/owner-builder prior to final payment. The amounts for builder's general overhead, general requirements, and builder's profit shall not exceed the amounts represented on the estimate of cost breakdown provided in accordance with paragraph (e)(2)(i)(G) of this section for the owner-builder or any subcontractor, material supplier, or equipment lessor having or sharing an identity of interest with the applicant/owner-builder. Final payment to the owner-builder will be adjusted, if necessary, to assure that the amounts shown on the certificate of actual cost do not exceed the amounts represented on the cost breakdown. Any funds remaining as a result of hard cost savings will be applied to the account as an extra payment or used for eligible loan purposes approved by FmHA or its successor agency under Public Law 103-354 as long as the improvements are genuinely needed and will enhance marketability of the project. All increases or decreases of 15 percent or more in line item costs will require documentation as to the reason for the increases or decreases. The State Director may require documentation for increases or decreases of less than 15 percent, if he/she determines it necessary. This information will be required with the cost certification.

(C) Subcontracting development work.

(I) Owner-builders will not be allowed to obtain a profit and overhead unless they are performing actual construction. "Actual construction" means "work" as defined in AIA documents: "* * * labor, materials, equipment, and services provided by the contractor to fulfill the contractor's obligations." Under this definition, owner-builders who choose to subcontract out construction of the project to another contractor will not obtain a builder's fee (general overhead and profit) when:

(i) More than 50 percent of the total cost of the building construction is subcontracted to one subcontractor, material supplier, or equipment lessor, and/or

(ii) Seventy-five percent or more with three or fewer subcontractors, material suppliers, and/or equipment lessors.

(2) NOTE: If two or more subcontractors have common ownership, they are considered as one subcontractor.

(3) How to apply rule:

(i) The 50 percent rule will apply when division of the amount of the largest subcontract by the total amount of the building cost results in more than 50 percent.

(ii) The 75 percent rule will apply when division of the sum of the amounts of the three largest subcontracts by the total building cost results in 75 percent or more.

(D) Qualified contracting entities. Contractors, subcontractors, material suppliers, and any other individual or organization sharing an identity of interest and providing materials or services for the project must certify that it is a viable, ongoing trade or business qualified and properly licensed to undertake the work for which it intends to contract. Form FmHA or its successor agency under Public Law 103-354 1944-31 will be prepared and executed by the contracting entities. The form provides notification to the entities of the penalty, under law, for erroneously certifying to the statements contained therein. Debarment actions will be instituted against entities who fail to disclose an identity of interest in accordance with the provisions of FmHA or its successor agency under Public Law 103-354 Instruction 1940-M (available in any FmHA or its successor agency under Public Law 103-354 office).

(ix) Requests for payment for work performed by the owner-builder method, shall be permitted to the FmHA or its successor agency under Public Law 103-354 District Director for review and approval prior to each advance of funds in order to insure that funds are used for authorized purposes. Requests for payment shall be made on Form FmHA or its successor agency under Public Law 103-354 1924-18 or other professionally recognized form containing the following certification to FmHA or its successor agency under Public Law 103-354:

The undersigned certifies that the work has been carefully inspected and to the best

§ 1924.13

7 CFR Ch. XVIII (1-1-00 Edition)

of their knowledge and belief, the quantities shown in this estimate are correct and the work has been performed in accordance with the contract documents.

(Title)

The review and acceptance of partial payment estimates by FmHA or its successor agency under Public Law 103-354 does not attest to the correctness of the quantities shown or that the work has been performed in accordance with the plans and specifications.

(A) If interim financing is available at reasonable rates and terms for the construction period, such financing shall be obtained. Exhibit B of subpart E of part 1944 of this chapter shall be used to inform the interim lender that FmHA or its successor agency under Public Law 103-354 will not close its loan until the project is complete, ready for occupancy, evidence is furnished indicating that all bills have been paid for work completed on the project, all inspections have been completed and all required approvals have been obtained from any governmental authorities having jurisdiction over the project. Upon presentation of proper partial payment estimates containing an estimate of the value of work in place which has been prepared and executed by the owner-builder, certified by the applicant's architect, and accepted by FmHA or its successor agency under Public Law 103-354, the interim lender may advance construction funds in accordance with the provisions of this section. It is suggested that the partial payment not exceed 90 percent of the value of work in place and material suitably stored on site.

(B) If interim financing is not available, partial payments not to exceed 90 percent of the value of work in place and materials suitably stored on site may be made to the owner-builder for that portion of the estimated cost of

development guaranteed by a letter of credit or deposits meeting the requirements of § 1924.6(a)(3)(iii) (A), (B) or (C) of this subpart. Partial payments may not exceed 60 percent of the value of work in place in all other cases. The determination of the value of work in place will be based upon an application for payment containing an estimate of the value of work in place which has been prepared and executed by the owner-builder, certified by the borrower's architect, and accepted by FmHA or its successor agency under Public Law 103-354. Prior to receiving the first partial payment, the owner-builder must submit a schedule of prices or values of the various trades or phases of the work aggregating the total development cost of the project as required in § 1924.13(e)(2)(i) (G) and (H) of this subpart. Each application for payment must be based upon this schedule, and show the total amount owed and paid to date for materials and labor procured in connection with the project. With each application for payment, the owner-builder must also submit evidence showing how the requested partial payment is to be applied, evidence showing that previous partial payments were properly applied, and a signed statement from the applicant's attorney, title insurance company, or local official in charge of recording documents certifying that the public records have been searched and that there are no liens of record. When the District Director has reason to believe that partial payments may not be applied properly, checks will be made payable to persons who furnish materials and labor for eligible purposes in connection with the project.

(x) Under no circumstances shall funds be released for final payment or to pay any items of the builder's profit until the project is 100 percent complete, ready for occupancy, and the owner-builder has completed and properly executed Form FmHA or its successor agency under Public Law 103-354 1924-13 or complied with the cost certification procedures of § 1924.13(e)(2)(viii) of this subpart.

§ 1924.49 State supplements.

State Supplements or policies will not be issued or adopted to either supplement or set requirements different from those of this subpart, unless specifically authorized in this subpart, without prior written approval of the National Office.

§ 1924.50 OMB control number.

The reporting and recordkeeping requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575-0042. Public reporting burden for this collection of information is estimated to vary from 5 minutes to 4 hours per response, with an average of 37 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to U.S. Department of Agriculture, Clearance Officer, OIRM, AG Box 7630, Washington, DC 20250; and to the Office of Management and Budget, Paperwork Reduction Project (OMB# 0575-0042), Washington, DC 20503.

EXHIBIT B TO SUBPART A—REQUIRE-
MENTS FOR MODULAR/PANELIZED
HOUSING UNITS

For the benefit of FmHA or its successor agency under Public Law 103-354 this exhibit prescribes evaluation, acceptance, inspection and certification procedures for modular/panelized housing units proposed for use in Farmers Home Administration (FmHA) or its successor agency under Public Law 103-354 Rural Housing programs. It applies to proposed development packages provided either under a contract between an FmHA or its successor agency under Public Law 103-354 borrower and a single contractor or under a conditional commitment. This exhibit also describes the use of background information available through the Department of Housing and Urban Development (HUD) for analysis of manufactured products. This exhibit also applies to the evaluation of manufactured farm service buildings in paragraph XI, below. For the purpose of this exhibit, County Supervisor and County Office also mean District Director and District Office, respectively.

I. Applicable Standards and Manuals.

A. The HUD Handbook 4950.1, Technical Suitability of Products Program Technical and Processing Procedures, must be followed by housing manufacturers to obtain acceptance of their products. Acceptance documents issued by HUD include: Structural Engineering Bulletins (SEB) on a national basis, Area Letters of Acceptance (ALA) which when accepted by all Area HUD Offices in a HUD region will, in essence, become Regional Letters of Acceptance (RLA), Truss Connector Bulletins (TCB); and, Mechanical Engineering Bulletins (MEB). These

documents as well as the Use of Material Bulletins (UM) and Materials Release Bulletins (MR) are addendums to the HUD Minimum Property Standards (MPS). Under handbook guidelines, HUD also examines state agency regulations concerning design, construction and labeling of modular/panelized housing units and designates those states having procedures acceptable for use under HUD programs. Modular/panelized housing produced in these states is called *Category III* and is considered technically suitable for use without further structural analysis.

B. All State FmHA or its successor agency under Public Law 103-354 Offices should maintain a close working relationship with each HUD office in their jurisdiction to assure coordination. Any deviations in structure, materials or design from HUD acceptance documents must comply with one of the other applicable development standards.

II. Modular Housing Units that Require Factory Inspections.

Only those types which cannot be completely inspected on site are required to obtain acceptance from HUD. Those that receive acceptance will be periodically factory inspected by HUD or HUD's designated agency, usually about every 6 months.

III. Panelized Housing Units that Do Not Require Factory Inspections.

A. Housing completely assembled on the building site does not require HUD acceptance. This includes housing that is manufactured but is assembled on the site such as: Precut pieces, log wall houses, trussed roof rafters or floor trusses; open panel walls, and other types that can be completely inspected on site.

B. Housing that is assembled in local materials dealers' yards for moving to local sites and to be purchased by an FmHA or its successor agency under Public Law 103-354 applicant, will be inspected during construction in the yard by the local FmHA or its successor agency under Public Law 103-354 County representative. These units must be constructed according to the applicable development standard and not transported out of the local FmHA or its successor agency under Public Law 103-354 County Office jurisdiction. The inspection must be recorded on Form FmHA or its successor agency under Public Law 103-354 1924-12, "Inspection Report."

IV. Manufacturer's Actions Required for Submissions to FmHA or its successor agency under Public Law 103-354 are listed in attachment 1 to this exhibit B.

V. State FmHA or its successor agency under Public Law 103-354 Office Actions when Manufacturing Facilities are in its Jurisdiction. The State Office, upon receipt of manufacturer's submission, must:

A. Determine that the unit structural system has been accepted by HUD as appropriate

under HUD Handbook 4950.1 requirements.

B. Review the thermal characteristics and approach of the calculations to determine actions to be taken in compliance with paragraph IV C of exhibit D of this subpart.

C. Review the proposal for compliance with § 1924.5(d)(1) of this subpart.

D. Determine that the prerequisites for consideration of acceptance by FmHA or its successor agency under Public Law 103-354 are met. The prerequisites include all of the following:

1. A current acceptance document from HUD (SEB, RLA, ALA), except for Category III housing (modular/panelized housing that does not have to have a Structural Engineering Bulletin as designated by HUD). In Category III states, the state government requirements for manufactured housing must be followed.

2. A current HUD Factory Inspection Report, Form No. 2051m, or in the case of Category III housing, a copy of the inspection report from the state government or accepted third party performing the factory inspection. Each report must be made by HUD or a HUD authorized agency, and must be no older than 6 months.

3. A letter from the manufacturer requesting a review for acceptance. Enclosed with the letter shall be all the information listed in attachment 1 to this exhibit B.

E. Issue acceptance letters to the manufacturer stating the conditions of acceptance in the format of attachment 2 to this exhibit B. The letter shall have an attachment listing all models accepted in the format of attachment 3 to this exhibit B. A copy of the acceptance letter and list of models shall be sent to each County Office in the state and, when requested by the manufacturer, to each other FmHA or its successor agency under Public Law 103-354 State Office in which the product is to be marketed.

F. After initial review of a submission, maintain a master file of accepted manufacturers and models and review the file twice yearly to determine the currency of the factory inspection reports and HUD or state government acceptance documents.

G. Notify manufacturers of overdue factory inspection reports, for acceptance of documents review and updating, using the format of attachment 4 to this exhibit B. Accompanying the notification will be a temporary acceptance sheet (Attachment 3 to this exhibit B) indicating to the manufacturer that the company models have temporary acceptance for 60 days. If the manufacturer provides evidence that a review is being processed by HUD, a maximum of an additional 90 days may be granted. Otherwise, the acceptance shall terminate on the last extension date and it will be necessary for the manufacturer to resubmit as if for initial acceptance.

H. Distribute a list of added models, deleted models, or notice of deletion of any manufacturer's product to the County Offices and other State FmHA or its successor agency under Public Law 103-354 Offices as necessary.

I. Issue an initial supply of Manufacturer's and Builder's Certification forms (Attachment 5 to this exhibit B) to each existing and newly accepted manufacturer. Manufacturers are to duplicate this form as necessary in their market areas.

J. Resolve any problems with the manufacturer, as reported by the County Office. Action may include coordination, FmHA or its successor agency under Public Law 103-354 plant inspections or cancellation of acceptance letters when problems persist.

VI. County Office Actions:

A. When an application is received involving any of the manufacturer's products on the accepted list, the County Office FmHA or its successor agency under Public Law 103-354 authorized personnel will:

1. Review the drawings and description of materials described in paragraphs A and B of attachment 1 to this exhibit B. The floor plans and elevations must be identifiable with the model listed in the accepted list issued by the State Office.

2. Require the builder/dealer or manufacturer to provide any drawings necessary to adapt the house to the site conditions where the house will be located.

3. Require site plan drawing such as those illustrated in attachments 1 and 2 to exhibit C of this subpart (available in any FmHA or its successor agency under Public Law 103-354 office).

4. Inspect and identify the model delivered against the manufacturer's certification and the accepted drawings and description of materials before the unit has been set on the foundation.

5. Require the builder/dealer to certify that the work for which the builder/dealer is responsible has been erected in compliance with the applicable development standard. This certification will be completed on a copy of attachment 5 to this exhibit B, and filed in County Office case file.

6. Observe any noncompliance with the applicable development standard or with paragraphs IV and V of this exhibit B. In this respect:

- a. Minor noncompliance will be resolved by the manufacturer through the builder/dealer. In cases where there is no builder/dealer, the County Office may resolve such issues with the manufacturer directly.

- b. Noncompliance that cannot be resolved at the County Office level will be reported to the State Office.

7. Inspect manufactured housing according to §1924.8(d) of this subpart.

8. Be aware that the accepted list may include many models from which loan appli-

cants may choose. No changes from accepted model designs are permitted. The model selected by an applicant should be appropriate to the needs of that particular family in accordance with subpart A of part 1944 of this chapter.

VII. Noncompliance Issues.

A. When minor issues are noted, the County Office will attempt to resolve them as described above. If they cannot be resolved locally, they will be referred to the State Office. When any issues cannot be resolved at State Office level, the National Office Program Support Staff (PSS) will be contacted for guidance.

B. The National Office PSS coordinating with HUD, will take the appropriate actions to resolve the issues reported.

C. Manufacturers and builder/dealers must be aware that if the FmHA or its successor agency under Public Law 103-354 inspector finds any of the following conditions, the inspector may refuse to accept the construction until corrections have been made:

1. Evidence of noncompliance with any option of the method described in the HUD—SEB, RLA, or ALA.

2. Faulty shop fabrication, including surface defects.

3. Damage to shop fabricated items or materials due to transportation, improper storage, handling or assembly operation.

4. Unsatisfactory field or site workmanship.

VIII. Actions by Other State Offices. When a State Office receives a copy of the accepted list from the State Office in which a manufacturing plant is located, it will:

A. Maintain a file, by manufacturer, of each accepted list of models.

B. Provide copies of the accepted list of models to each County Office in the State.

C. Request a copy of the drawings, description of materials, and thermal calculations to determine compliance with the thermal requirements for the county in which the house is to be located according to exhibit D of this subpart.

D. Check to see that County Offices within the state will act as prescribed in paragraph VI of this exhibit B.

E. When two or more State Offices have different interpretations of the acceptability of a particular model, there must be an agreement between the states so that they will have the same requirements. If the states cannot agree, the National Office PSS will be consulted for guidance.

IX. Subsequent Review.

FmHA or its successor agency under Public Law 103-354 will make periodic reviews of houses, both site-built and houses manufactured offsite, to determine acceptability of the finished product. If, in the judgment of the FmHA or its successor agency under Public Law 103-354, the product has failed to perform satisfactorily, acceptance may be

withdrawn. The State Director will notify the manufacturer and/or the builder/dealer of the reasons for the withdrawal no later than the time of withdrawal. Negotiations for corrections will be carried out by the County Office with the assistance of the State Office or National Office, as necessary.

X. Materials and Products Acceptance—Material Release Bulletins, Use of Materials Bulletins, Manufacturer's Instructions.

A. The Materials Release (MR) and Use of Materials Bulletins (UM) provide for the national acceptance of specific nonstandard materials and products not covered in the current HUD MPS.

B. When contractors or builders intend to use products or materials not listed as approved in the MPS, the FmHA or its successor agency under Public Law 103-354 personnel reviewing or concerned with the approval of construction in which the product is to be used, will require the contractor or builder to furnish a Materials Release Bulletin or Use of Materials Bulletin on the materials or products. If the product has been accepted, the supplier should be able to obtain the bulletin for the contractor or builder from the manufacturer. These bulletins describe the products or materials limitations to use, method of installing or applying, approved type of fasteners, if used, etc. and will provide the contractor with instructions as to proper installation or application.

C. When FmHA or its successor agency under Public Law 103-354 personnel are unfamiliar with any materials or products which have been accepted in the MPS, they will request the contractor or builder to furnish the manufacturer's instructions to assure that the materials or products are properly installed or applied. Any questions on any product that cannot be resolved in the County Office should be referred to the State Office. When the question cannot be resolved at the State Office level, the National Office PSS should be consulted for guidance.

XI. Manufactured Farm Service Buildings.

A. When a loan application is received that involves a manufactured building or special equipment that cannot be completely inspected on the site, the local State Land Grant University recommendations should be requested.

B. When the County Office questions the advisability of making a loan on a manufactured building, the State Office should also be consulted.

C. The State Office should review and make recommendations to the County Office. If doubt still exists, the National Office PSS should be consulted for guidance.

ATTACHMENT 1—REQUIRED INFORMATION FOR ACCEPTANCE OF MODULAR/PANELIZED HOUSING UNITS

The manufacturer or sponsor of modular/pvanized housing units wishing to partici-

pate in the Farmers Home Administration (FmHA) or its successor agency under Public Law 103-354 Rural Housing programs shall submit to the FmHA or its successor agency under Public Law 103-354 State Director having jurisdiction over the state in which the proposed housing is to be manufactured, two complete sets of the information listed below for evaluation. Submissions not including all the information requested will be returned.

A. *Statements:*

1. Name and location of organization, including titles and names of its principal officers.

2. A brief description of plant facilities.

3. Extent of intended market distribution, including a list of any other states in which units will be marketed.

4. The method of quality control during site installation.

5. A copy of the applicable current HUD Structural Engineering Bulletin (SEB), Regional Letter of Acceptance (RLA), or Area Letter of Acceptance (ALA).

6. A current factory inspection report made within 6 months by HUD or HUD authorized agency.

7. Name and address of any third party inspection agency.

8. Location of nearest assembled product for inspection.

9. Field manuals for site installation and/or set-up procedures.

10. Specifications or descriptions of materials using either Form FmHA or its successor agency under Public Law 103-354 1924-2, (HUD-FHA Form 2005), "Description of Materials," including sizes, species and grade of all building and finishing materials. All blanks should be filled and additional sheets may be attached as well as equipment manufacturer's brochures. Use an asterisk (*) to denote all items of onsite construction that will be provided by the builder-dealer. The builder-dealer must complete a form for the builder-dealer's portion of the work. Use N/A in any blank which is not applicable.

11. Names and addresses of other public and private agencies which have rendered or been asked to render a technical suitability or acceptance determination with respect to the products or structural methods employed.

12. Written certification that construction drawings and specifications conform with the applicable development standard.

13. Any other pertinent information.

14. An index of all documents submitted.

B. *Working Drawings.* For emphasis as to the details required for modular/pvanized housing proposals, the following items are listed in addition to and in more detail than the requirements in exhibit C of this subpart. In some cases, the drawing presentation sheets may be required to be reduced to 200 mm by 266 mm (8×10½ inches) sheet size:

RHS, RBS, RUS, FSA, USDA

Pt. 1924, Subpt. A, Exh. B

1. Foundation and/or Basement Plan. This plan shall include anchorage details, exterior and interior dimensions, typical footings, wall thickness, pilaster sizes and locations, column or pier sizes and locations and girders required to support the structures. Show location of all equipment (furnace, water heater, laundry tubs, sump, etc.) floor drains, electrical outlets, electrical entrance panels, and all doors and windows or crawl space vents with all sizes indicated.

2. Floor Plans of all levels. Show square footage of each habitable room with square footage of each area of natural light and ventilation. In addition, a design sketch scaled properly to illustrate a typical furniture arrangement for all habitable levels is required to indicate intended occupancy functions of the design. A window and door schedule should also be provided indicating glazed size, sash size, and thermal conductance of each type.

3. All exterior elevations including opening and sizes; wall finish materials, flashing, finish grades intended, depth of footings when known, finish floor, ceiling heights, roof slope, location of downspouts, gutters, vents for both structural spaces and for equipment. Indicate construction joint locations and details of connections between sections, modules or components.

4. Building cross sections showing size and spaces of all framing members from lowest member (bottom of footing) to highest point of roof (ridge) plus:

(a) Type of material and method of application of all covering materials, such as subflooring, combination subflooring and underlayment, sheathing, interior and exterior finishes;

(b) Complete details including computations of trussed rafter systems with the architect/engineer's stamp of those responsible for the design.

(c) Details of insulation and vapor barrier installation and attic ventilation. If the thermal characteristics to be provided are determined according to optional method for overall structure performance allowed in exhibit D of this subpart, the submission and complete engineering calculations with all details of construction shall be sent to Administrator, Attn. PSS, FmHA or its successor agency under Public Law 103-354 Washington, DC 20250, for analysis as prescribed in paragraph IV C of exhibit D of this subpart.

(d) Special details as necessary to show any special features of construction, including method of fabricating, erection, joining, and finishing of all elements; and

(e) Details and sections of stairways including all critical dimensions, such as, riser, run and headroom.

5. Interior elevations of kitchen cabinets and bathroom elevations with schedule of all shelf, counter-top and drawer footage. Indi-

cate whether kitchen cabinets are to be custom made for each model or made for any model by a cabinet manufacturing company.

6. Plumbing schematics, including pipe materials, sizes and plumbing code compliance.

7. Heating plan, including heat loss of each room, is needed for heating systems, sizings and capacities, forced air, electric baseboard, or electric space heaters and, if applicable, heat gain. For forced air systems, include supply and return duct layout and location of appropriate diffusers.

8. Electrical plan, including circuit chart or diagram.

9. Any other pertinent facts or drawings that will better explain why and how certain unusual materials or structural methods are employed.

ATTACHMENT 2

John Dough Manufacturing Company,
3444 Residence Avenue,
Elkton, Indiana 00051.

Dear Sirs: Although the documents submitted to this office have only received a cursory review, they appear to be in substantial compliance to qualify your firm for the type of acceptance indicated on the attached list.

The acceptance being issued is subject to this letter of conditions, compliance with HUD Handbook 4950.1 Technical Suitability of Products Program Technical and Processing Procedures, compliance with Farmer Home Administration (FmHA) or its successor agency under Public Law 103-354 Thermal Performance Construction Standards, and compliance with the conditions set forth in the HUD acceptance document, if applicable, whose number appears on the acceptance.

The manufacturer and the authorized builder-dealer bear the responsibility of complying with the above, the exhibits submitted and the applicable development standards.

The manufacturer and/or builder-dealer also shall:

1. Provide positive identification of the modular unit by model, date of manufacture and factory in which the unit was manufactured.

2. Furnish with each home to be financed by FmHA or its successor agency under Public Law 103-354 in—(State)—, a written certificate (Attachment 5 to this exhibit B) endorsed by the builder-dealer certifying that all requirements have been satisfied.

3. Furnish the local FmHA or its successor agency under Public Law 103-354 County Supervisor with a complete set of drawings including site plans, description of materials,

Pt. 1924, Subpt. A, Exh. B

structural engineering bulletins when applicable in the state, and documentation relating to the manufacture, transportation, erection, and installation for each model of modular/panelized housing to be financed in the county. Electrical, plumbing and heating plans must be furnished for each model in addition to the basic drawings. Floor plans and elevation drawings may vary from those listed in attachment 1 of exhibit B to FmHA or its successor agency under Public Law 103-354 Instruction 1924-A to reflect each of the manufacturer's models provided they are in compliance with the applicable development standard and the FmHA or its successor agency under Public Law 103-354 Thermal Performance Construction Standards and provided they have been accepted and listed in this state's approval of manufactured structures. No field alterations to the accepted models will be allowed.

4. Furnish, when required by the County Supervisor, foundation drawings (including special foundation design considerations when the unit is to be erected in seismic zones 1, 2 or 3) adapting the modular home to any unusual site conditions needing information additional to that furnished by the standard drawings.

5. Furnish the County Office with a copy of inspection reports of the manufacturing facilities immediately after the inspection reports have been completed.

6. Allow FmHA or its successor agency under Public Law 103-354 personnel to inspect the manufacturing facilities at any time and furnish all FmHA or its successor agency under Public Law 103-354 State Offices, where acceptance has been obtained, with a copy of any FmHA or its successor agency under Public Law 103-354 inspection reports immediately after the inspection reports have been completed.

7. In the event there are major changes to the submitted drawings, obtain approval under the HUD Technical Suitability of Products Program and submit verification of this approval to the County Office for listing on the state's accepted list. Any modular home shipped with major changes incorporated, without such changes on file at the County Office may be rejected.

(Add state and local requirements appropriate to this letter of conditions.)

This acceptance may be subject to corrective action when deficiencies are noted in the product, field inspections, manufacturing facilities, or when there is noncompliance with the provisions of the HUD Technical Suitability of Products Program.

The inclusion of these models on the accepted list is based only on the material and structural aspects of the manufactured units. Final determination of acceptability rests with FmHA or its successor agency under Public Law 103-354 personnel. Other factors relating to the property in its en-

7 CFR Ch. XVIII (1-1-00 Edition)

tirety such as appraisal, location, sustained market acceptance, architectural planning and appeal, thermal qualities, mechanical and electrical equipment, etc., must be considered in the final determination.

Your cooperation in this acceptance program is appreciated.

Sincerely,

State Director

ATTACHMENT 4

John Dough Manufacturing Company,
3444 Residence Avenue,
Elktown, Indiana 00051.

Dear Sirs: As set forth in acceptance letters issued by this office, acceptance of modular/panelized homes in this state is based on HUD's Technical Suitability of Products Program and the conditions stated in the acceptance letter. Your file has been reviewed and the following has been noted.

RHS, RBS, RUS, FSA, USDA

Pt. 1924, Subpt. A, Exh. C

—An inspection report of your manufacturing facilities is overdue. Inspections are required twice yearly. The last inspection report on file at this office is dated —.

—Your Structural Engineering Bulletin No. ___ dated ___ has not been reviewed by HUD. Reviews are generally required every three years. Temporary acceptance will be considered when you provide evidence that the review documents have been submitted to HUD.

—The drawings being used for the construction of your homes are not listed in your Structural Engineering Bulletins. Drawings used in the field should be those upon which the Structural Engineering Bulletin was issued.

—There have been ___ revisions to the development standards since ___, the date of the last drawings we have on file for your homes. It is recommended that you review the revisions to ascertain whether your drawings need to be updated.

Please submit a written response and appropriate documents for the above items within ___ days, or your product will be removed from the accepted list until your firm can again qualify. If you have any problems furnishing the above within the time stated, please contact this office.

We look forward to receiving the materials indicated so that your firm's listing may be continued.

Sincerely,
State Director

**EXHIBIT C TO SUBPART A—GUIDE FOR
DRAWINGS AND SPECIFICATIONS**

This exhibit applies to all new buildings to be constructed, including all single family housing and related facilities and, as applicable, farm housing and farm service buildings.

I. General

The documents recommended in this exhibit correspond with the list of exhibits in Chapter 3 of the Department of Housing and Urban Development (HUD) "Architectural Handbook for Building Single-Family Dwellings" No. 4145.2. This exhibit may be used as a public handout and shall be used as a guide for drawings and specifications to be submitted in support of any type of application involving construction of major new buildings or extensive rehabilitation, alterations or additions to existing buildings. Descriptions of work for minor alterations or repairs need pertain only to work to be done and may be in narrative form when acceptable to the County Supervisor. Complete and accurate drawings and specifications are necessary:

A. To determine the acceptability of the proposed development,

B. To determine compliance with the applicable standards and codes,

C. To prepare a cost estimate, and

D. To provide a basis for inspections and the builder's warranty.

II. Drawings for a Specific Structure

Drawings for individual single dwellings shall provide at least the following:

A. *Plot Plan.* Refer to Example Plot Plan No. 1, attachment 1 to this exhibit C (available in any FmHA or its successor agency under Public Law 103-354 office). Ratio: 1:240 (1"=20') (at scale, 1"=20' or 1/16"=1'0" minimum):

1. Lot and block number.
2. Dimensions of plot and north point.
3. Dimensions of front, rear and side yards.
4. Location and dimensions of garage, carport and other accessory buildings.
5. Location and sizes of walks, driveways and approaches.
6. Location and sizes of steps, terraces, porches, fences and retaining walls.
7. Location and dimensions of easements and established setback requirements, if any.
8. Elevations at the following points: (a) first floor of dwelling and floor of garage, carport and other accessory building; (b) finish curb or crown of street at points of extension of lot lines; (c) finish grade elevation at each principal corner of structure; (d) finish grade at bottom of drainage swales at extension of each side of structure as feasible.
9. The following additional elevations, as applicable, if the topography of the site or the design of the structure is such that special grading, drainage or foundations may be necessary. Examples are irregular or steeply sloping sites, filled areas on sites, or multi-level structure designs; (a) finish and existing grade elevations at each corner of the plot; (b) existing and finish grade at each principal corner of dwelling; (c) finish grade at both sides of abrupt changes of grade such as retaining walls, slopes, etc.; (d) other elevations that may be necessary to show grading and drainage.

10. Indication of type and approximate location of drainage swales.

11. When an individual water supply and/or sewage system is proposed, drawings, specifications and other items prescribed in paragraph V of this exhibit.

B. *Floor Plans.*

1. Scale, 1:50 (1/4"=1'0").
2. Floor plan of each floor and basement, if any. Show typical furniture locations to suggest intended use of each habitable space.
3. Plan of all attached terraces and porches, and of garage or carport.
4. If dwelling is of crawl-space type, a separate foundation plan. Slab-type foundation may be shown on sections.
5. Direction, size and spacing of all floor and ceiling framing members, girders, columns or piers.
6. Location of all partitions and indication of door sizes, and direction of door swing.
7. Location and size of all permanently installed construction and equipment such as kitchen cabinets, closets, storage shelving, plumbing fixtures, water heaters, etc. De-

tails of kitchen cabinets may be on separate drawing.

8. Location and symbols of all electrical equipment, including switches, outlets, fixtures, etc.

9. Heating system on separate drawing, or when it may be shown clearly it may be part of the floor or basement plan showing: (a) layout of system; (b) location and size of ducts, piping, registers, radiators, etc.; (c) location of heating unit and room thermostat; (d) total calculated heat loss of dwelling including heat loss through all vertical surfaces, ceiling and floor. When a duct or piped distribution system is used, calculated heat loss of each heated space is required.

10. Cooling system, on separate drawings or, as part of heating plan, floor or basement plan showing: (a) layout of system; (b) location and size of ducts, registers, compressors, coils, etc.; (c) heat gain calculations, including estimated heat gain for each space conditioned; (d) model number and Btu capacity of equipment or units in accordance with applicable Air Conditioning and Refrigeration Institute (ARI) or American Society of Refrigerating Engineers (ASRE) Standard; (e) Btu capacity and total kilowatt (KW) input at stated local design conditions; (f) if room or zone conditioners are used, provide location, size and installation details.

C. *Exterior Elevations.*

1. Scale, 1:50 (1/4"=1'0"). Elevations, other than main elevation, which contain no special details may be drawn at 1:100 (1/8"=1'0").
2. Front, rear and both side elevations, and elevations of any interior courts.
3. Windows and doors—indicate size unless separately scheduled or shown on floor plan.
4. Wall finish materials where more than one type is used.
5. Depth of wall footings, foundations, or piers, if stepped or at more than one level.
6. Finish floor lines.
7. Finish grade lines at buildings.

D. *Details and Sections.*

1. Section through exterior wall showing all details of construction from footings to highest point of roof. Where more than one type of wall material is used, show each type. Scale 1:25 (3/8"=1'0") minimum.
2. Section through any portion of dwelling where rooms are situated at various levels or where finished attic is proposed. Scale, 1:50 (1/4"=1'0") minimum.
3. Section through stair wells, landings, and stairs, including headroom clearances and surrounding framing. Scale, 1:50 (1/4"=1'0") minimum.
4. Details of roof trusses, if proposed, including connections and stress or test data with seal of architect or engineer responsible. Scale of connections, 1:25 (3/8"=1'0") minimum.
5. Elevation and section through fireplace. Scale, 1:25 (3/8"=1'0") minimum.

6. Elevations and section through kitchen cabinets, indicating shelving. Scale, 1:50 ($\frac{1}{4}"=1'0"$) minimum.

7. Sections and details of all critical construction points, fastening systems, anchorage methods, special structural items or special millwork. Scale as necessary to provide information, 1:25 ($\frac{3}{8}"=1'0"$) minimum.

III. Master Drawings for Group Structures

Drawings for a group of structures (such as for several conditional commitments) may be submitted in lieu of drawings for each individual property when a number of applications are simultaneously submitted involving repetition of the same type structure.

A. *Master plot plan* shall include the following:

1. Scale which will provide the following information in a clear and legible manner.
2. North point.
3. Location and width of streets and rights-of-way.
4. Location and dimensions of all easements.
5. Dimensions of each lot.
6. Location of each dwelling on lot with basic dimensions.
7. Dimensions of front, rear and side yards.
8. Location and dimensions of garage, carports and other accessory buildings.
9. Identification of each lot by number and indication of basic plan and elevation type.
10. Location of walks, driveways and other permanent improvements.

B. *Typical plot plan* for each basic type dwelling may be submitted in lieu of fully detailing each lot on master plot plan, when topography and lot arrangements present no individual planning or construction problems.

1. Information not shown on the typical plot plan shall be included on the master plot plan.

2. Typical plot plans shall not be used for corner lots, lots with irregular boundaries, lots involving pronounced topographic variations or other lots where individual detailing is necessary.

3. Location of dwelling on typical lot and full dimensions.

4. Location and dimensions of all typical improvements, such as garage, carport, accessory buildings, walks, drives, steps, porches, terraces, trees, shrubs, retaining walls, fences, etc.

C. *Grading* may be shown on separate grading plan or on the master plot plan. Scale shall be sufficiently large to provide the following information in clear and legible manner:

1. Contours of existing grade at intervals of not more than 1.524 m (5 feet). Intervals less than 1.524 m (5 feet) may be required when indicated by the character of the topography.
2. Location of house and accessory buildings on each lot.

3. Identification of each lot by number.

4. Elevations in accordance with individual plot plan including bench mark and datum or, in lieu of finish grade elevations, contours of proposed finish grading may be submitted. Contour intervals selected shall be appropriate to the topography of the site.

5. Lot grading shall be shown by indicating protective slopes and approximate location of drainage swales.

6. Location of drainage outfall, if any drainage is not to a street.

D. *Floor plans, elevations, sections and details* shall be submitted for each basic plan. Alternate elevations to basic plan may be shown at scale, 1:100 ($\frac{1}{8}"=1'0"$).

IV. Specifications

Form FmHA or its successor agency under Public Law 103-354 1924-2, "Description of Materials," or other acceptable and comparable descriptions of all materials forms shall be submitted with the drawings. The forms shall be completed in accordance with the instructions on Form FmHA or its successor agency under Public Law 103-354 1924-2 to describe the materials to be used in the construction.

A. Form FmHA or its successor agency under Public Law 103-354 1924-2 may be reproduced if size, format and printed text are identical to the current official form. When it is reproduced, the following deletions must be made:

1. All lines indicating FmHA or its successor agency under Public Law 103-354 form numbers or other Government agency initials and/or numbers, and

2. The United States Government Printing Office (GPO) imprint and reference number.

B. The material identification shall be in sufficient detail to fully describe the material, size, grade and when applicable, manufacturer's model or identification numbers. When necessary, additional sheets must be attached as well as manufacturer's specification sheets for equipment and/or special materials, such as aluminum siding or carpeting.

V. Individual Water Supply and Sewage Disposal Systems

When an individual water and/or sewage disposal system is proposed, the following additional information must be submitted:

A. *Approval and recommendations of other authorities.*

1. A written opinion by the health authority having jurisdiction that the site is suitable and acceptable for the proposed systems(s) and,

2. If available, a soils report from the local USDA-Soil Conservation Service and any recommendations they may have.

3. Approval of appropriate environmental control authority.

4. A signature of the health authority on the plot plan indicating approval of the design of the proposed system.

B. *Plot Plan*. Refer to Example Plot Plan No. 2, attachment 2 to this exhibit C (available in any FmHA or its successor agency under Public Law 103-354 office).

1. Location and size of septic tank, distribution box, absorption field or bed, seepage pits and other essential parts of the sewage disposal system and distance to all individual wells, open streams or drainageways.

2. Location of well, service line and other essential parts of the water supply system and distance to other wells and/or sewage disposal systems.

3. Exact location of individual systems (water or sewage) on adjacent properties and description of system, if available.

C. Construction details of all component parts of individual water supply and sewage disposal systems shall clearly indicate material, equipment and construction. Extra sheets and drawings should be added as necessary to fully explain the proposed installation.

EXHIBIT D TO SUBPART A—THERMAL PERFORMANCE CONSTRUCTION STANDARDS

I. Purpose

This exhibit prescribes thermal performance construction standards to be used in all housing loan and grant programs. These requirements shall supersede the thermal performance requirements in any of the development standards in §1924.4(h) of this subpart.

II. Policy

All loan or grant applications involving new construction (except for new Single Family Housing (SFH)) and all applications for conditional commitments (except for new SFH) shall have drawings and specifications prepared to comply with paragraphs IV A or C and IV D of this exhibit. All new SFH construction shall have drawing and specifications prepared to comply with paragraph IV F of this exhibit. All existing dwellings to be acquired with FmHA or its successor agency under Public Law 103-354 loan funds shall be considered in accordance with paragraph IV B or C of this exhibit.

NEW CONSTRUCTION—MAXIMUM U VALUES FOR CEILING, WALL AND FLOOR SECTION OF VARIOUS CONSTRUCTION

| Winter degree days ¹ | Ceilings ² | Walls | Floors ³ | Glazing ⁴ | Doors ⁵ |
|---------------------------------|-----------------------|-------|---------------------|----------------------|--|
| 1000 or less | 0.05 | 0.08 | 0.08 | 1.13 | |
| 1001 to 2500 | .04 | .07 | .07 | .69 | |
| 2501 to 4500 | .03 | .05 | .05 | .69 | Storm door if hollow core door or if over 25% glass. |
| 4501 to 6000 | .03 | .05 | .05 | .47 | Storm Door. |

III. Definitions

A. *British thermal unit* (Btu) means the quantity of heat required to raise the temperature of one pound (.4535 Kg.) of water by one degree Fahrenheit (F). For example, one Btu is the amount of heat needed to raise the temperature of one pound of water from 59 degrees F to 60 degrees F.

B. *Glazing* is the material set into a sash or door when used as a natural light source and/or for occupant's views of the outdoors.

C. "*R*" value, thermal resistance, is a unit of measure of the ability to resist heat flow. The higher the R value, the higher the insulating ability.

D. "*U*" value is the overall coefficient of heat transmission and is the combined thermal value of all the materials in a building section. U is the reciprocal of R. Thus $U=1/R$ or $R=1/U$ or $1/C$ where C is the thermal conductance and is the unit of measure of the rate of heat flow for the actual thickness of a material one square foot in area at a temperature of one degree Fahrenheit. The lower the U value, the higher the insulating ability.

E. *Winter degree-day* is a unit based on temperature difference and time. For any one day, when the mean temperature is less than 65 degrees F (18.3 degrees Celsius), there are as many degree-days as the number of degrees difference between the mean temperature for the day and 65 degrees F. The daily mean temperature is computed as half the total of the daily maximum and daily minimum temperatures.

F. *CABO Model Energy Code, 1992 Edition (MEC-92)*—This code sets forth the minimum energy/thermal requirements for the design of new buildings and structures or portions thereof and additions to existing buildings. The MEC is maintained by the Council of American Building Officials (CABO).

IV. Minimum Requirements

A. All multifamily dwellings to be constructed with FmHA or its successor agency under Public Law 103-354 loan and/or grant funds and all repair, remodeling, or renovation work performed on single family and multifamily dwellings with FmHA or its successor agency under Public Law 103-354 loan and/or grant funds shall be in conformance with the following, except as provided in paragraphs IV C 3 and IV D of this exhibit:

NEW CONSTRUCTION—MAXIMUM U VALUES FOR CEILING, WALL AND FLOOR SECTION OF VARIOUS
CONSTRUCTION—Continued

| Winter degree days ¹ | Ceilings ² | Walls | Floors ³ | Glazing ⁴ | Doors ⁵ |
|---------------------------------|-----------------------|-------|---------------------|----------------------|--------------------|
| 6001 or more | .026 | .05 | .05 | .47 | Storm Door. |

Note.—U values are not adjusted for framing. Values calculated for components may be rounded. For example, a total R Value of 18.88 converts to a U value of .0529 rounded to .05.

¹Winter degree-days may be obtained from the ASHRAE Handbook; the "NAHB Insulation Manual for Homes/Apartments"; local utilities; and the National Climatic Center, Federal Building, Asheville, NC. Manuals are available from NAHB RF, Rockville, MD 20850, or NMWIA, 382 Springfield Avenue, Summit, NJ 07901. Other sources of degree day data may be used if available from a recognized authority.

²Insulation must be continuous (i.e. no gaps) above all ceiling joists. In pitched roof construction, compression of insulation at the outside building walls is permitted to allow a 1" ventilation space under the roof sheathing. For any loose fill insulation, a baffle must be provided. Raised trusses are not required.

³For floors of heated spaces over unheated basements, unheated garages or unheated crawl spaces, the U value of floor section shall not exceed the value shown. A basement, crawl space, or garage shall be considered unheated unless it is provided with a positive heat supply to maintain a minimum temperature of 50 degrees F. Positive heat supply is defined by ASHRAE as "heat supplied to a space by design or by heat losses occurring from energy-consuming systems or components associated with that space."

Where the walls of an unheated basement or crawl space are insulated in lieu of floor insulation, the total heat loss attributed to the floor from the heated area shall not exceed the heat loss calculated for floors with required insulation.

Insulation may be omitted from floors over heated basement areas or heated crawl spaces if foundation walls are insulated. The U value of foundation wall sections shall not exceed the value shown. This requirement shall include all foundation wall area, including header joist (band joist), to a point 50 percent of the distance from a finish grade to the basement floor level. Equivalent Uo configurations are acceptable.

MAXIMUM U VALUES OF THE FOUNDATION WALL SECTIONS OF HEATED BASEMENT NOT CONTAINING HABITABLE
LIVING AREA OR HEATED CRAWL SPACE

| Winter degree-days (65 F base) | Maximum U value | Glazing* |
|--------------------------------|----------------------|----------|
| 2500 or less | No requirement | 1.13 |
| 2501 to 4500 | 0.17 | 1.13 |
| 4501 or more | 0.10 | .69 |

*Glazing in heated basement shall be limited to 5 percent of floor area unless alternative Uo combination is documented.

⁴Sliding glass doors are considered as glazing. The glazing value is for glass only. Glazing shall be limited to 15 percent of the gross area of all exterior walls enclosing heated space, except when demonstrated that the winter daily solar heat gain exceeds the heat loss and the glass area is properly screened from summer solar heat gain.

⁵1½ inch metal-faced door systems with rigid insulation core and durable weatherstripping providing a "U" value equivalent to a wood door with storm door and an infiltration rate no greater than .50 cfm per foot of crack length tested according to ASTM E-283 at 1.567 psf of air pressure, may be substituted for a conventional door and storm door. All doors shall be weatherstripped. Any glazed areas must be double-glazed.

MINIMUM R VALUES OF PERIMETER INSULATION FOR SLABS-ON-GRADE

| Winter degree-days (65 F base) | Minimum R values* | |
|--------------------------------|-------------------|---------------|
| | Heated slab | Unheated slab |
| 500 or less | 2.8 | |
| 1000 | 3.5 | |
| 2000 | 4.0 | 2.5 |
| 3000 | 4.8 | 2.8 |
| 4000 | 5.5 | 3.5 |
| 5000 | 6.3 | 4.2 |
| 6000 | 7.0 | 4.8 |
| 7000 | 7.8 | 5.5 |
| 8000 | 8.5 | 6.2 |
| 9000 | 9.2 | 6.8 |
| 10000 or greater | 10.0 | 7.5 |

*For increments between degree days shown, R values may be interpolated.

B. All existing dwellings to be purchased with RH loan and grant funds shall be insulated in accordance with the following:

EXISTING CONSTRUCTION—MAXIMUM U VALUES FOR CEILING, WALL AND FLOOR SECTION OF VARIOUS
CONSTRUCTION

| Winter degree days ¹ | Ceilings | Walls ² | Floors ^{3, 4} | Glazing | Doors ⁵ |
|---------------------------------|----------|--------------------|------------------------|---------|--------------------|
| 1000 or less | 0.05 | | 0.08 | 1.13 | |
| 1001 to 2500 | .04 | | .07 | .69 | |

EXISTING CONSTRUCTION—MAXIMUM U VALUES FOR CEILING, WALL AND FLOOR SECTION OF VARIOUS
CONSTRUCTION—Continued

| Winter degree days ¹ | Ceilings | Walls ² | Floors ^{3, 4} | Glazing | Doors ⁵ |
|---------------------------------|----------|--------------------|------------------------|---------|--|
| 2501 to 4500 | .03 | | .05 | .69 | Storm door if hollow core door or if over 25% glass. |
| 4501 to 6000 | .03 | | .05 | .69 | Storm Door. |
| 6001 to 7000 | .026 | | .05 | .69 | Storm Door. |
| 7001 or more | .026 | | .05 | .69 | Storm Door. |

Note.—U values are not adjusted for framing. Values calculated for components may be rounded. For example, a wall section with a total R Value of 18.88 converts to a U value of .0529 rounded to .05.

¹ Winter degree days may be obtained from the ASHRAE Handbook; the "NAHB Insulation Manual for Homes/Apartments;" local utilities; and the National Climatic Center, Federal Building, Asheville, NC. Manuals are available from NAHB RF, Rockville, MD 20850, or NMWIA, 382 Springfield Avenue, Summit, NJ 07901. Other sources of degree day data may be used if available from a recognized authority.

² Walls shall be insulated as near to new construction standards as economically feasible. Any exterior wall framing exposed during repair or rehabilitation work shall have vapor barrier installed and be fully insulated.

³ For floors of heated spaces over unheated basements, unheated garages or unheated crawl spaces the U value of floor section shall not exceed the value shown.

A basement, crawl space or garage shall be considered unheated unless it is provided with a positive heat supply to maintain a minimum temperature of 50 degrees F. Positive heat supply is defined by ASHRAE as "heat supplied to a space by design or by heat losses occurring from energy-consuming systems or components associated with that space."

Where the walls of an unheated basement or crawl space are insulated in lieu of floor insulation, the total heat loss attributed to the floor from the heated area shall not exceed the heat loss calculated for floors with required insulation.

Insulation may be omitted from floors over heated basement areas or heated crawl spaces if foundation walls are insulated. The U value of foundation wall sections shall not exceed the value shown. This requirement shall include all foundation wall area, including header joist (band joist), to a point 50 percent of the distance from a finish grade to the basement floor level. Equivalent Uo configurations are acceptable.

MAXIMUM U VALUES OF THE FOUNDATION WALL SECTIONS OF HEATED BASEMENT NOT CONTAINING HABITABLE
LIVING AREA OR HEATED CRAWL SPACE

| Winter degree days (65 F base) | Maximum U value | Glazing* |
|--------------------------------|----------------------|----------|
| 2500 or less | No requirement | 1.13 |
| 2501 to 4500 | 0.17 | 1.13 |
| 4501 or more | 0.10 | .69 |

* Glazing in heated basement shall be limited to 5 percent of floor area unless alternative Uo combination is documented.

⁴ Slab edge insulation should be provided wherever practical in areas of 2500 or more winter degree-days. Rigid insulation placed on the exterior face of the slab shall be protected by a durable and weather resistant material.

⁵ Storm doors are not required for double doors, sliding doors or others where installation would be economically infeasible.

^{1 3/4} inch metal-faced door systems with rigid insulation core and durable weatherstripping providing a "U" value equivalent to a wood door with storm door and an infiltration rate no greater than .50 cfm per foot of crack length, tested according to ASTM E-283 at 1.567 psf of air pressure may be substituted for a conventional door and storm door. All doors shall be weatherstripped.

C. Optional Standards

Housing design not in compliance with the requirements of paragraph IV A or B of this exhibit may be approved in accordance with the provisions of this paragraph. Requests for acceptance proposed under paragraph C 1 of this exhibit, must be approved by the State Director. Requests for acceptance of site-built housing proposed under paragraph C 2 of this exhibit must be approved by the Administrator. Requests for acceptance of manufactured housing proposed under paragraph C 2 of this exhibit may be approved by the State Director. All submissions of proposed options to the State Director or Administrator shall contain complete descriptions of materials, engineering data, test data (when U values claimed are lower than the ASHRAE Handbook of Fundamentals), and calculations to document the validity of the proposal. All data and calculations will be based upon the current edition of the ASHRAE Handbook of Fundamentals or other universally accepted data sources.

1. Overall "U" values for enveloped components. The following requirements shall be used in determining acceptable options to the requirements of paragraphs IV A and IV B of this exhibit.

a. Uo (gross wall)—Total exterior wall area (opaque wall and window and door) shall have a combined thermal transmittance value (Uo value) not to exceed the values shown in attachment 1 to this exhibit D (available in any FmHA or its successor agency under Public Law 103-354 office). Equation 1 in attachment 1 shall be used to determine acceptable combinations to meet the requirements.

b. Uo (gross ceiling)—Total ceiling area (opaque ceiling and skylights) shall have a combined thermal transmittance value (Uo value) not to exceed the values shown in attachment 2 to this exhibit D (available in any FmHA or its successor agency under Public Law 103-354 office). Equation 2 in attachment 2 shall be used to determine acceptable combinations to meet the requirements.

2. *Overall structure performance.* The following requirements shall be used in determining acceptable options to the requirements of paragraphs IV A and B of this exhibit.

a. The methodology must be cost effective to the energy user, and must not adversely affect the structural capacity, durability or safety aspects of the structure.

b. All data and calculations must show valid performance comparisons between the proposed option and a structure comparable in size, configuration, orientation and occupant usage designed in accordance with paragraphs IV A or B. Structures may be considered for FmHA or its successor agency under Public Law 103-354 loan consideration which can be shown by accepted engineering practice to have energy consumption equal to or less than those which would be attained in a representative structure utilizing the requirements of paragraphs IV A or B.

3. *Special consideration for seasonally occupied farm labor housing.* The following sets forth the minimum acceptable options to the requirements of paragraphs IV A or B of this exhibit for seasonally occupied housing serving as security for farm labor housing loans and grants.

a. When the period of occupancy does not encounter 500 or more heating degree-days (HDD) as determined by an average of the previous 10 years based upon local climatological data published by the National Oceanic and Atmospheric Administration, Environmental Data Service, the standards of paragraphs IV A or B will not apply.

b. When the period of use exceeds 500 HDD, the 10-year average value for the period of occupancy shall be used to determine the degree to which the thermal insulation requirements of paragraphs IV A or B shall apply.

c. If mechanical cooling is provided and the period of occupancy encounters more than 700 cooling degree-days (CDD), as determined by an average of the previous 8 years based upon local climatological data published by the same source cited in paragraph IV C3a above, the thermal insulation requirements for 1,000 and less degree-days as stated in paragraph IV A or B shall apply.

D. *Energy efficient construction practices.* This section prescribes those items of design and quality control which are necessary to guarantee the energy efficiency of homes built according to the standards of this exhibit. Also included are recommendations for extra energy efficiency in dwellings. This section does not apply to new SFH construction.

1. *Infiltration.* a. Requirements: All construction shall be performed in such a manner as to provide a building envelope free of excessive infiltration.

(i) Caulking and sealants. Exterior joints around windows and door frames, between

wall cavities and window or door frames, between wall and foundation, between wall and roof, between wall panels, at penetrations of utility services through walls, floors and roofs, and all other openings in the exterior envelope shall be caulked, gasketed, weatherstripped, or otherwise sealed. Caulking shall be silicone rubber base or butyl rubber base, conforming to Federal Specifications TT-S-1543 and TT-S-1657 respectively, or materials demonstrating equivalent performance in resilience and durability.

(ii) Windows shall comply with ANSI 134.1, NWMA 15-2; the air infiltration rate shall not exceed 0.5 ft³/min per ft. of sash crack.

(iii) Sliding glass doors shall comply with ANSI 134.2, NWM 15-3; the air infiltration rate shall not exceed .5 ft³/min per square ft. of door area.

(iv) All insulation placed in open cavity walls shall be installed so that all space behind electrical switches and receptacles, plumbing, ductwork and other obstructions in the cavity are insulated as completely as possible. Insulation shall be omitted on the side facing the conditioned area; however, the vapor barrier in walls must not be cut or destroyed.

b. Recommendations: (i) Wrap outside corners of wall sheathing with 15 lb. asphalt impregnated building felt before siding application.

(ii) Utilize vestibules for entry doors, especially those facing into the direction of winter wind.

(iii) Install plumbing, mechanical and electrical components in interior partitions as much as possible. All water piping should be insulated from freezing temperatures.

2. *Heating and/or Cooling Equipment.* a. Requirements: All mechanical equipment for heating and/or cooling habitable space shall be designed to provide economy of operations.

(i) All space heating equipment (including fireplaces) requiring combustion air shall be sealed combustion types, or be located in a nonconditioned area (such as unheated basements) or adequate combustion air must be provided from outside the conditioned space.

(ii) All ductwork shall be designed and installed to minimize leakage. All metal to metal connections shall be mechanically joined and taped.

b. Recommendations: (i) Whenever possible, locate ductwork inside of conditioned areas in dropped ceilings, interior partitions or other similar areas.

(ii) Locate outside cooling units in areas not subject to direct sunlight or heat build-up.

3. *Vapor Barrier.* a. Requirements: Adequate vapor barriers must be provided adjacent to the interior finish material of the wall or other closed envelope components

which do not have ventilation space on the non-conditioned side of the insulation.

(i) A vapor barrier at the inside of the wall or other closed envelope component must have a permeability (perm) rating less than that of any other material in the component and in no case have a perm rating greater than one. All vapor barriers must be sealed around all openings in the interior surface. Vapor barriers are not required in ceilings and floors. Continuous vapor barriers on ceilings, walls, and floors require adequate moisture vapor control in the conditioned space.

(ii) All vapor producing or exhaust equipment shall be ducted to the outside and equipped with dampers. This equipment includes rangehoods, bathroom exhaust fans and clothes dryers. If a dwelling design proposes the use of windows to satisfy the kitchen and/or bathroom ventilation requirements of the development standards, the incorporation of dehumidification equipment should be considered in accordance with paragraph IV D 3 b. Exhaust of any equipment shall not terminate in an attic or crawl space.

b. Recommendation: Forced air heating/cooling systems should include humidification/dehumidification systems where conditions indicate.

E. [Reserved]

F. *New SFH construction.* New SFH construction shall meet the requirements of CABO Model Energy Code, 1992 Edition (MEC-92).

G. *New manufactured housing.*

The Uo Value Zone indicated on the "Heating Certificate" for comfort heating shall be equal to or greater than the HUD Zone listed in the following table:

| RHS climate zones (winter degree days) | FMHCSS (HUD code) Uo value zones |
|--|---|
| 0–1000 | 1 |
| 1001–2500 | 2 |
| 2501–4500 | 2 |
| 4501–6000 | 3 |
| > 6000 | 3 |

EXAMPLE: If a manufactured home is to be located in a geographic area having between

2501 and 4500 RHS winter degree days, the Agency will accept a Uo value Zone 2 unit or Zone 3 unit constructed to the HUD FMHCSS.

If a central air conditioning system is provided by the home manufacturer, a "Comfort Cooling Certificate" must be permanently affixed to an interior surface of the unit that is readily visible. This certificate may be combined with the heating certificate on the data plate.

V. General Design Recommendations:

A. Orient homes with greatest glass area facing south with adequate overhangs to control solar gain during non-heating periods. Examples of proper roof overhangs are given in attachment 3 to this exhibit D (available in any FmHA or its successor agency under Public Law 103-354 office).

B. Arrange plantings with evergreen wind buffers on north side and deciduous trees on south.

C. Whenever possible, orient entry door away from winter winds.

D. Design house with simple shape to minimize exterior wall area.

E. Minimize glass areas within constraints of required light and ventilation, applicable safety codes and other appropriate consideration.

F. Minimize the amount of paved surface adjacent to the structure where heat gain is not desirable.

VI. *State Supplements:* State supplements or policies will not be issued or adopted to either supplement or set requirements different from those of this exhibit without the prior written approval of the National Office.

[52 FR 8002, Mar. 13, 1987, as amended at 54 FR 6874, Feb. 15, 1989; 59 FR 43723, Aug. 25, 1994; 64 FR 48085, Sept. 2, 1999]

EXHIBIT E—VOLUNTARY NATIONAL MODEL BUILDING CODES

The following documents address the health and safety aspects of buildings and related structures and are voluntary national model building codes as defined in § 1924.4(h)(2) of this subpart. Copies of these documents may be obtained as indicated below:

| Building code | Plumbing code | Mechanical code | Electrical code |

**EXHIBIT F TO SUBPART A—PAYMENT
BOND**

KNOW ALL PERSONS BY
THESE PRESENTS: that

(Name of Contractor)

(Address of Contractor)

a _____,
(Corporation, Partnership or Individual)
hereinafter called
PRINCIPAL and

(Name of Surety)
hereinafter called SURETY, are held and
firm
bound unto _____

(Name of Owner)

(Address of Owner)

hereinafter called OWNER and the United States of America acting through the Farmers Home Administration or its successor agency under Public Law 103-354 hereinafter referred to as GOVERNMENT, and unto all persons, firms, and corporations who or which may furnish labor, or who furnish materials to perform as described under the contract and to their successors and assigns in the total aggregate penal sum of _____, _____ Dollars (§____) in lawful money of the United States, for the payment of which sum well and truly to be made, we bind ourselves, our heirs, executors, administrators, successors, and assigns, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION is such that whereas, the PRINCIPAL entered into a certain contract with the OWNER, dated the _____ day of _____ 19____, a copy of which is hereto attached and made a part hereof for the construction of:

NOW, THEREFORE, if the PRINCIPAL shall promptly make payment to all persons, firms, and corporations furnishing materials for or performing labor in the prosecution of the WORK provided for in such contract, and any authorized extension or modification thereof, including all amounts due for materials, lubricants, oil, gasoline, coal and coke, repairs on machinery; equipment and tools, consumed or used in connection with the construction of such WORK, and for all labor cost incurred in such WORK including that by a SUBCONTRACTOR, and to any mechanic or materialman lienholder whether it acquires its lien by operation of State or Federal law; then this obligation shall be void, otherwise to remain in full force and effect.

PROVIDED, that beneficiaries or claimants hereunder shall be limited to the SUBCONTRACTORS, and persons, firms, and corporations having a direct contract with the PRINCIPAL or its SUBCONTRACTORS.

PROVIDED, FURTHER, that the said SURETY for value received hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the contract or to the WORK to be performed thereunder or the SPECIFICATIONS accompanying the same shall in any way affect its obligation on this BOND, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of this contract or to the WORK or to the SPECIFICATIONS.

PROVIDED, FURTHER, that no suit or action shall be commenced hereunder by any claimant: (a) Unless claimant, other than one having a direct contract with the PRINCIPAL (or with the GOVERNMENT in the event the GOVERNMENT is performing the obligations of the OWNER), shall have given written notice to any two of the following: The PRINCIPAL, the OWNER, or the SURETY above named within ninety (90) days after such claimant did or performed the last of the work or labor, or furnished the last of the materials for which said claim is made, stating with substantial accuracy the amount claimed and the name of the party to whom the materials were furnished, or for whom the work or labor was done or performed. Such notice shall be served by mailing the same by register mail or certified mail, postage prepaid, in an envelope addressed to the PRINCIPAL, OWNER, or SURETY, at any place where an office is regularly maintained for the transaction of business, or served in any manner in which legal process may be served in the state in which the aforesaid project is located, save that such service need not be made by a public officer. (b) After the expiration of one (1) year following the date of which PRINCIPAL ceased work on said CONTRACT, it being understood, however, that if any limitation embodied in the BOND is prohibited by any law controlling the construction hereof, such limitation shall be deemed to be amended so as to be equal to the minimum period of limitation permitted by such law.

PROVIDED, FURTHER, that it is expressly agreed that the BOND shall be deemed amended automatically and immediately, without formal and separate amendments hereto, upon amendment to the Contract not increasing the contract price more than 20 percent, so as to bind the PRINCIPAL and the SURETY to the full and faithful performance of the Contract as so amended. The term "Amendment", wherever used in this BOND and whether referring to this BOND, the contract or the loan Documents shall include any alteration, addition,

Pt. 1924, Subpt. A, Exh. G

7 CFR Ch. XVIII (1-1-00 Edition)

extension or modification of any character whatsoever.

PROVIDED, FURTHER, that no final settlement between the OWNER or GOVERNMENT and the CONTRACTOR shall abridge the right of any beneficiary hereunder, whose claim may be unsatisfied.

IN WITNESS WHEREOF, this instrument is executed in [number] counterparts, each one of which shall be deemed an original, this the ____ day of ____.

NOTE.— Date of BOND must not be prior to date of Contract.

If CONTRACTOR is partnership, all partners should execute BOND.

Important: Surety companies executing BONDS must appear on the Treasury Department's most current list (Circular 570 as amended) and be authorized to transact business in the state where the project is located.

EXHIBIT G—PERFORMANCE BOND

KNOW ALL PERSONS BY THESE PRESENTS: that

(Name of Contractor)

(Address of Contractor)

(Corporation, Partnership, or Individual) hereinafter called PRINCIPAL, and

(Name of Surety)

(Address of Surety)

hereinafter called SURETY, are held and firmly bound unto

(Name of Owner)

(Address of Owner)

hereinafter called OWNER, and the United States of America acting through the Farmers Home Administration or its successor agency under Public Law 103-354 hereinafter referred to as the GOVERNMENT in the total aggregate penal sum of

Dollars (\$ ____)

in lawful money of the United States, for the payment of which sum well and truly to be made, we bind ourselves, our heirs, executors, administrators, successors, and assigns, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION is such that whereas, the PRINCIPAL entered into a certain contract with the OWNER, dated the ____ day of ____ 19 __, a copy of which is hereto attached and made a part hereof for the construction of:

NOW, THEREFORE, if the PRINCIPAL shall well, truly and faithfully perform its duties, all the undertakings, covenants, terms, conditions, and agreements of said contract during the original term thereof, and any extensions thereof which may be granted by the OWNER, or GOVERNMENT, with or without notice to the SURETY and during the guaranty period and if the PRINCIPAL shall satisfy all claims and demands incurred under such contract, and shall fully indemnify and save harmless the OWNER and GOVERNMENT from all costs and damages which it may suffer by reason of failure to do so, and shall reimburse and repay the OWNER and GOVERNMENT all outlay and expense which the OWNER and GOVERNMENT may incur in making good any default, then this obligation shall be void, otherwise to remain in full force and effect.

PROVIDED, FURTHER, that the liability of the PRINCIPAL AND SURETY hereunder to the GOVERNMENT shall be subject to the same limitations and defenses as may be available to them against a claim hereunder by the OWNER, provided, however, that the GOVERNMENT may, at its option, perform any obligations of the OWNER required by the contract.

PROVIDED, FURTHER, that the said SURETY, for value received hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the contract or to WORK to be performed thereunder or the SPECIFICATIONS accompanying same shall in any way affect its obligation on this BOND, and it does hereby waive notice of any such change, extension

RHS, RBS, RUS, FSA, USDA

of time, alteration or addition to the terms of the contract or to the WORK or to the SPECIFICATIONS.

PROVIDED, FURTHER, that it is expressly agreed that the BOND shall be deemed amended automatically and immediately, without formal and separate amendments hereto, upon amendment to the Contract not increasing the contract price more than 20 percent, so as to bind the PRINCIPAL and the SURETY to the full and faithful performance of the CONTRACT as so amended. The term "Amendment", wherever used in this BOND, and whether referring to this BOND, the Contract or the Loan Documents shall include any alteration, addition, extension, or modification of any character whatsoever.

PROVIDED, FURTHER, that no final settlement between the OWNER or GOVERNMENT and the PRINCIPAL shall abridge the right of the other beneficiary hereunder, whose claim may be unsatisfied. The OWNER and GOVERNMENT are the only beneficiaries hereunder.

IN WITNESS WHEREOF, this instrument is executed in [Number] counterparts, each one of which shall be deemed an original, this the ____ day of ____.

Pt. 1924, Subpt. A, Exh. H

**EXHIBIT H TO SUBPART A—PROHIBITION
OF LEAD-BASED PAINTS**

I. Purpose

This exhibit prescribes the methods to be used to comply with the requirements of the Lead-Based Paint Poisoning Prevention Act, Public Law 91-695, as amended, (42 U.S.C. 4801 et seq.) and the amendment to section 501 (3) of Public Law 91-695 (42 U.S.C. 4841 (3)) as amended by the National Consumer Health Information and Health Promotion Act of 1976, Public Law 94-317.

II. Policy

The Farmers Home Administration (FmHA) or its successor agency under Public Law 103-354 shall not permit the use of lead-based paint on applicable surfaces of any housing or buildings purchased, repaired, or rehabilitated for human habitation with financial assistance provided by this agency. Paints used on applicable surfaces shall not contain more than 0.06 percent lead by weight calculated as lead metal in the total nonvolatile content of liquid paints or in the dried film of paint already applied.

III. Definitions

A. Housing and buildings mean any house, apartment, or structure intended for human habitation. This includes any institutional structure where persons reside, such as an orphanage, boarding school, dormitory, day care center or extended care facility, college housing, domestic or migratory labor housing, hospitals, group practice facilities, community facilities, and business or industrial facilities.

B. Applicable surfaces means all interior surfaces, whether accessible or not, and those exterior surfaces which are readily accessible to children under 7 years of age, such as stairs, decks, porches, railings, windows, and doors.

C. Lead-based paint means any paint containing more than .5 of 1 percentum lead by weight, or with respect to paint manufactured after June 22, 1977, lead-based paint containing more than six one-hundredths of 1 percentum lead by weight.

IV. Requirements

A. All new housing and buildings shall comply with paragraph II of this exhibit H.

B. For all existing housing and buildings built *after* 1950, on which a loan is closed after July 19, 1978, FmHA or its successor agency under Public Law 103-354 requires that the applicant, borrower or tenant be notified of the potential hazard of lead-based paints, of the symptoms and treatment of lead poisoning, and of the importance and availability of maintenance and removal techniques for eliminating such hazards. This will be accomplished by providing each

Pt. 1924, Subpt. A, Exh. I

7 CFR Ch. XVIII (1-1-00 Edition)

applicant, borrower and/or tenant with a copy of attachment 1 to this exhibit H, "Lead-based Paint Hazards, Symptoms, Treatment and Techniques for Eliminating Hazards," available in any FmHA or its successor agency under Public Law 103-354 County Office. Copies of attachment 1 may be obtained by the County Supervisor from the Finance Office, 1520 Market Street, St. Louis, MO 63103.

C. For all existing housing or buildings built *before* 1950 on which a loan is closed after July 19, 1978, FmHA or its successor agency under Public Law 103-354 requires that the applicant, borrower and/or tenant be notified as in paragraph IV B and a copy of attachment 2 to this exhibit H, "Caution Note on Lead-Based Paint Hazard," available in any FmHA or its successor agency under Public Law 103-354 County Office, shall be delivered to the hands of the applicant, borrowers and/or tenant.

D. For all property transfers and inventory property sales, attachments 1 and 2 to this Exhibit H (available in any FmHA or its successor agency under Public Law 103-354 office) shall be handed to the purchaser by the FmHA or its successor agency under Public Law 103-354 representative.

E. All inventory housing or buildings built before 1950 to be repaired, renovated, or rehabilitated shall have tests for lead content, and where found to be hazardous, shall have any interior lead-based paint removed entirely. Loose or cracked surfaces shall be cleaned down to the base surface before repainting with a paint containing not more than six one-hundredths of 1 percentum lead by weight in the total nonvolatile content of the paint or the equivalent measure of lead in the dried film of paint already applied or both. Contracting officers shall include the following provision prohibiting the use of lead-based paint in all contracts and subcontracts for construction or rehabilitation of housing or buildings:

Lead-Based Paint Prohibition

No lead-based paint containing more than .5 of 1 percentum lead by weight (calculated as lead metal) in the total nonvolatile content of the paint, or the equivalent measure of lead in the dried film of paint already applied, or both, or with respect to paint manufactured after June 22, 1977, no lead-based paint containing more than .06 of 1 percentum lead by weight (calculated as lead metal) in the total nonvolatile content of the paint, or the equivalent measure of lead in the dried film of paint already applied, or both, shall be used in the construction or rehabilitation of residential structures under this contract or any subsequent subcontracts.

Authority: This amendment is made under provisions of 5 U.S.C. 301, 40 U.S.C. 486 (c).

Done at _____, _____ this ____ day of _____, 19__.

FmHA or its successor agency under Public Law 103-354 Representative

V. Summary

Section 401 of the Lead-Based Paint Poisoning Prevention Act as amended by the National Consumer Health Information and Health Promotion Act of 1976, Pub. L. 94-317, provides a requirement that each federal agency issue regulations and to take such other steps necessary to prohibit the use of lead-based paint on all applicable surfaces in Federal and Federally-assisted construction or rehabilitation of residential structures. The Lead-Based Paint Poisoning Prevention Act, Pub. L. 91-695, January 13, 1971, provides for grants to units of general local government in any state for the purpose of detecting and treating incidents of lead-based paint poisoning. Title II of this Act also provides for grants to the same units to identify those areas of risk including testing to detect the presence of lead-based paint on surfaces of residential housing.

**EXHIBIT I TO SUBPART A—GUIDELINES
FOR SEASONAL FARM LABOR HOUSING**

Section 100

General—This exhibit sets forth the guidelines and minimum standards for planning and construction of new Labor Housing (LH) that will be occupied on a seasonal basis. Rehabilitation LH projects will be in substantial conformance with these guidelines and standards. A "seasonal basis" is defined as 6 months or less per year. Seasonal housing for the farmworker need not be convertible to year-round occupancy; however, the living units shall be designed for the intended type of tenant, the time of occupancy, the location, the specific site, and the planned method of operation. It is important that the design of the LH site and buildings will help to create a pleasing lifestyle which will promote human dignity and pride among its tenants.

Section 200

Codes and Regulations—Compliance is required with National, state and local codes or regulations affecting design, construction, mechanical, electrical, fire prevention, sanitation, and site improvement.

Section 300

Planning

300-1 Complete architectural/engineering services in accordance with this subpart will be required if an LH grant is involved or the LH loan will involve more than four individual family units, or any number of group

living units, or dormitory units accommodating 20 or more persons.

300-2 Buildings and site design shall provide for a safe, secure, economical, healthful, and attractive living facility and environment suited to the needs of the domestic farm laborer and his/her family.

300-3 At least 5 percent of the individual family units in a project, or one unit, whichever is greater, and all common use facilities will be accessible to or adaptable for physically handicapped persons. This requirement may be modified if a recipient/borrower shows, through a market survey acceptable to FmHA or its successor agency under Public Law 103-354, that a different percentage of accessible or adaptable units is more appropriate for a particular project and its service area.

Site Design

301-1 General—The site design shall be arranged to utilize and preserve the favorable features and characteristics of the property and to avoid or minimize the potential harmful effect of unfavorable features. Particular attention is directed to §1944.164 (l), (m) and (n) of subpart D of part 1944 of this chapter with reference to compliance with subpart G of part 1940 of this chapter. Some of the features which must be considered are the topography, drainage, access, building orientation to sun and breezes; and advantageous features, such as vegetation, trees, good views, etc. or disadvantageous features, such as offensive odors, noxious plants, noise, dust, health hazards, etc.

301-2 Drainage—Surface and subsurface drainage systems shall be provided in accordance with the applicable development standard and subpart C of part 1924 of this chapter.

301-3 Water and Sewage Disposal—Water supply and sewage disposal installations shall comply with subpart C of part 1924 of this chapter, the applicable development standard and all governing state and local department of health requirements. Where environmentally and economically feasible, the LH facility shall connect to public water and waste disposal systems.

301-4 Electrical—Adequate electrical service shall be provided for exterior and interior lighting and for the operation of equipment.

301-5 Vehicular Access and Parking.

301-5.1 Safe and convenient all-weather roads shall be provided to connect the site and its improvements to the off-site public road.

301-5.2 All-weather drives and parking shall be provided for tenants, and for trucks and buses as needed within the site. Driveways, parking areas and walkway locations shall be in substantial conformance with the applicable development standard.

301-6 Walks:

301-6.1 Walks shall be provided for safe convenient access to all dwellings and for safe pedestrian circulation throughout the development between locations and facilities where major need for pedestrian access can be anticipated, such as laundry, parking to dwelling units, common dining rooms, etc.

301-6.2 Walkways shall be hard surface, such as concrete, asphalt, or stabilized gravel, and shall be adequately drained.

301-7 Building Location:

301-7.1 Side and rear yards and distances between buildings shall conform to the applicable development standard.

301-8. Garbage and Refuse:

301-8.1 Garbage and refuse containers for individual units are required and shall be stored on durable functional racks or shall be located in a central screened area with easily cleaned surfaces. Single containers for multiple units shall be screened and in locations designed to accommodate collection vehicle functions.

301-9 Fencing:

301-9.1 Fencing used in the site design for project privacy or building security shall be harmonious in appearance with other fences and surrounding facilities which fall within the same view.

301-10 Outdoor living:

301-10.1 All public areas where pedestrian use can be anticipated after sunset shall be adequately lighted for security purposes, such as walkways to common use facilities—laundry, dining halls, building entrances, parking areas, etc.

301-11 Planting and Landscaping:

301-11.1 Planting and lawns or ground covers shall be provided as required to protect the site from erosion, control dust, for active and passive recreation areas, and provide a pleasant environment.

Building Design

302-1.1 Living Units Design:

302-1.1 *Individual Family Unit*—One family or extended family to a unit which shall contain adequate space for living, dining, kitchen, bath and bedrooms. Multifamily type units are required whenever possible for economy of site and building construction.

a. The minimum total net living unit size shall be 400 square feet. This size assumes occupancy of four persons. Units planned for additional occupants shall include an additional 60 square feet of living area per person.

b. A living/dining area shall be provided to accommodate a table and chairs with adequate dining and circulation space for the intended number of occupants. The living/dining area should be combined with the kitchen area.

c. The kitchen shall contain a sink, cooking range and refrigerator. A minimum free

countertop area of six square feet is required. A minimum of 40 square feet of shelf area is required.

d. Each bathroom shall contain adequate space and circulation for a bathtub and/or shower, water closet and lavatory. Access to the bathroom shall not be through another bedroom in dwelling units containing more than one bedroom.

e. Bedroom areas separate from living areas are required. The design of the unit shall provide a minimum of 50 square feet of sleeping area per intended occupant including storage. Housing for families with children shall have a separate bedroom or sleeping area for the adult couples. A two foot by two foot shelf with a two foot long clothes hanging rod is required for each occupant.

302-1.2 Group Living Unit— A living unit designed for the occupancy of more than one family or for separate occupancy of male and/or female groups. Common bath spaces shall be contained in the same building. Group living units for families shall have separate bedrooms for each adult couple.

a. The design of the unit shall provide for a minimum of 620 square feet of total net living area for eight persons and an additional 60 square feet for each additional occupant. Additional area shall be planned for a second bathroom when anticipated occupancy will exceed eight persons, or if it will be occupied by persons of both sexes.

b. The kitchen shall contain an adequate sink, cooking range, refrigerator, and space the size of which is commensurate with the needs of the group living unit. A minimum of free countertop area of eight square feet is required. A minimum of 50 square feet of shelf area is required.

c. Refer to paragraph 302-1.1 b for living/dining requirements.

d. Each bathroom shall contain adequate space and circulation for comfortable access to, and use of, fixtures which will include a bathtub and/or shower, water closet and lavatory. In no case shall minimum fixtures be less than that required per paragraph 302-1.3 c below.

e. Refer to paragraph 301-1.1 e for bedroom requirements.

302-1.3 Dormitory Living Unit— A building which provides common sleeping quarters for persons of the same sex and may or may not contain kitchen and/or dining facilities in the same building as the sleeping quarters.

a. The design of areas for sleeping purposes, using single beds, shall provide for not less than 72 square feet per occupant including storage.

b. The design of areas for sleeping purposes, using double bunk beds, shall provide for not less than 40 square feet per occupant. Triple bunk beds will not be allowed.

c. The design of each dormitory building must include a water closet and a bathtub or shower for each 12 occupants, and a lavatory

for each 8 persons. Urinals may be substituted for men's water closets on the basis of one urinal for one water closet, up to maximum of one-third of the required water closets.

d. Adequate kitchen and dining facilities must be provided which may be in the dormitory building or detached at a distance of not more than 200 feet from the sleeping quarters. In either case, the space must contain adequate cooking ranges, refrigerators, sinks, countertop, food storage shelves, tables and chairs, and circulation space. These facilities will comply with the requirements of the "Food Service Sanitation Ordinance and Code," part V of the "Food Service Sanitation Manual," U.S. Public Health Service Publication 934 (1965).

302-2 Other Facilities:

302-2.1 General—Other facilities, authorized by subpart D of part 1944 of this chapter, needed by farm workers may be provided in several ways: part of a living unit, located in the project, or, with the exception of laundry facilities, available nearby.

302-2.2 Laundry Facilities—Laundry facilities shall be required on-site. Drying yards shall be provided if dryer units are not provided. The design of washing facilities shall plan for a minimum rate of one washer for each 20 occupants. One drying unit may be provided for every two washers, if automatic dryers are customarily provided for rental housing in the community. Laundry facilities shall have adequate space for loading the units, circulation, and clothes folding.

302-2.3 Office and Maintenance—An office and maintenance space shall be provided or available, commensurate with the number of living units served, and shall meet the criteria of the FmHA or its successor agency under Public Law 103-354 Manual of Acceptable Practices. If necessary, the maintenance space shall have sufficient area to accommodate furniture storage.

302-2.4 Child Care Center—Where feasible, a child care center may be included to provide supervised activity and safety for children while the parents work. Supervisors and workers for such centers are sometimes enlisted on a volunteer basis and the cost borne by nonprofit associations or community organizations. Grants are sometimes available through Federal or state programs. Consequently, the design of the child care center should meet the requirements of those sources providing organizational personnel and/or financing.

302-2.5 Manager's Dwelling—If a manager's dwelling unit is to be provided as a part of the FmHA or its successor agency under Public Law 103-354 loan or grant, it will meet these guidelines. However, if it is necessary to provide a year-round caretaker/manager dwelling unit with FmHA or its successor agency under Public Law 103-354

loan or grant funds, it will meet the applicable development standard.

302-2.6 *Recreation*—Outdoor recreation space is required and shall be commensurate with the needs of the occupants. Active and passive recreation areas will be provided which may consist of outdoor sitting areas, playfields, tot lots and play equipment.

General Requirements

303-1 *Materials and Construction*—All materials and their installation in a LH facility shall meet the applicable development standard. Any exceptions to these requirements for materials and their installation must be obtained with the approval of the FmHA or its successor agency under Public Law 103-354 National Office. Material should be selected that is durable and easily cleaned and maintained.

303-2 *Fire Protection*—Fire protection and egress shall be provided to comply with the applicable development standard.

303-3 *Light, Ventilation, Screening*—Natural light and ventilation requirements as specified in the applicable development standard shall be followed. Screening of all exterior openings is required.

303-4 *Ceiling Heights*—Ceiling heights of habitable rooms shall be a minimum of seven feet six inches clear, and seven feet in halls or baths in dwelling units. Public rooms shall have a minimum of eight feet clear ceiling height. Sloping ceilings shall have at least seven feet six inches for $\frac{1}{2}$ the room with no portion less than five feet in height.

303-5 *Heating and Cooling*—Heating and cooling and/or air circulation equipment shall be installed as needed for the comfort of the tenants, considering the climate and time of year the facility will be in operation. Maximum feasible use of passive solar heating and cooling techniques shall be required. All equipment installed will be in accordance with the applicable development standard to protect the health and safety of occupants.

303-6 *Plumbing*—Plumbing materials and their installation shall meet the applicable development standard. Hot water will be required to all living units, baths, kitchens and laundry facilities.

303-7 *Insulation, Thermal Standards, Winterization*—Insulation will be required where either heating or cooling is provided as per paragraph 303-5 above or when climatic conditions dictate a need for insulation. Insulation Standards will comply with exhibit D, paragraph IV C 3, of this subpart, or the state insulation standards, whichever are the more stringent.

303-8 *Electrical*—Electrical design, equipment and installation shall comply with the requirements of the latest edition of the National Electrical Code, and the applicable development standard for materials and their installation. Individual family units may be

separately metered; other types of dwelling units may be separately metered as required.

303-9 *Security and Winterization*—Adequate management and physical measures will be provided as necessary to protect the facility during off-season periods, including adequate heating and insulation as required.

[52 FR 8002, Mar. 13, 1987, as amended at 52 FR 19283, May 22, 1987; 58 FR 38922, July 21, 1993]

EXHIBIT J TO SUBPART A—MANUFACTURED HOME SITES, RENTAL PROJECTS AND SUBDIVISIONS: DEVELOPMENT, INSTALLATION AND SET-UP

Part A—Introduction

Part B—Construction and Land Development
Part C—Drawings, Specifications, Contract Documents and Other Documentation
Part D—Inspection of Development Work

Part A—Introduction

I. *Purpose and Scope.* This exhibit describes and identifies acceptable site development, installation and set-up practices and concepts for manufactured homes. It is intended for FmHA or its successor agency under Public Law 103-354 field personnel, builders, developers, sponsors, and others participating in FmHA or its successor agency under Public Law 103-354 housing programs.

This exhibit applies to all manufactured homes (except those referenced in exhibit B of this subpart) on scattered sites or in rental projects and subdivisions and covers the requirements for design and construction of manufactured home communities. FmHA or its successor agency under Public Law 103-354 may approve alternatives or substitutes if it finds the proposed design satisfactory for the proposed use, and if the materials, installation, device, arrangement, or method of work is at least equivalent to that prescribed in this exhibit considering quality, strength, effectiveness, durability, safety and protection of life and health.

FmHA or its successor agency under Public Law 103-354 will require satisfactory evidence to be submitted to substantiate claims made regarding the use of any proposed alternative.

II. *Background.* FmHA or its successor agency under Public Law 103-354 has authority to make (1) section 502 Rural Housing (RH) loans with respect to manufactured homes and lots, and (2) section 515 Rural Rental Housing (RRH) loans with respect to manufactured home rental projects.

The manufactured home must be constructed in conformance with the Federal Manufactured Home Construction and Safety Standard (FMHCSS) and be permanently attached to a site-built permanent foundation which meets or exceeds the Minimum Property Standards (MPS) for One- and Two-

Family Dwellings or Model Building Codes acceptable to FmHA or its successor agency under Public Law 103-354. The manufactured home must be permanently attached to that foundation by anchoring devices adequate to resist all loads identified in the MPS. This includes resistance to ground movements, seismic shaking, potential shearing, overturning and uplift loads caused by wind. Note that anchoring straps or cables affixed to ground anchors other than footings will *not* meet these requirements.

Subpart G of part 1940 of this chapter applies on scattered sites, in subdivisions and rental projects to the development, installation and set-up of *manufactured homes*. To determine the level of environmental analysis required for a particular application, each manufactured home or lot involved shall be considered as equivalent to one housing unit or lot as these terms are used in §§1940.310-1940.312 as well as in any other sections of subpart G of part 1940 of this chapter. The implementation of FmHA or its successor agency under Public Law 103-354 environmental policies and the consideration of important land use impacts are of particular relevance in the review of proposed manufactured home sites and in achieving the two purposes highlighted below. Because the development, installation and set-up of manufactured home communities, including scattered sites, rental projects, and subdivisions, differ in some requirements from conventional site and subdivision development, two of the purposes of this exhibit are to:

A. Encourage economical and orderly development of such communities and nearby areas, and

B. Promote the safety and health of residents of such communities.

Therefore, this exhibit identifies those required standards and regulations and suggested guidelines for eliminating and preventing health and safety hazards and promoting the economical and orderly development and utilization of land for planning and development of manufactured home communities. The exhibit also provides the requirements for meeting the following:

A. *Resistance to Wind*. Foundations and anchorages shall be designed to resist wind forces specified in American National Standards Institute (ANSI) A-58.1-1982 for the geographic area in which the manufactured home will be sited;

B. *Proper Installation*. The manufacturer's installation instructions provided with each manufactured home shall contain instructions for at least one site-built foundation with interior and/or perimeter supports. FmHA or its successor agency under Public Law 103-354 field office personnel shall review to determine its adequacy as security for an FmHA or its successor agency under Public Law 103-354 loan only, the foundation design concept for compliance with this ex-

hibit, the FmHA or its successor agency under Public Law 103-354/MPS and any Model Building Code acceptable to FmHA or its successor agency under Public Law 103-354 in that particular geographic area; and

C. *Proper Foundation Design*. Manufactured homes shall be installed on a foundation system which is designed and constructed to sustain, within allowable stress and settlement limitations, all applicable loads. Any foundation and anchorage system or method of construction to be used should be analyzed in accordance with well-established principles of mechanics and structural engineering.

III. *Definitions*. For the purpose of this exhibit the following definitions apply:

Accessory Building or Structure.

A subordinate building or structure which is an addition to or supplements the facilities provided by a manufactured home.

Anchoring Systems. An approved system for securing the manufactured home to the ground or foundation system that will, when properly designed and installed, resist overturning and lateral movement of the home from wind forces.

Contiguous. Sharing a boundary, adjoining or adjacent. A lot or subdivision is considered to be contiguous to other lots or subdivisions if it is adjoining, touching or adjacent.

Federal manufactured Home Construction and Safety Standards (FMHCSS). A 1976 federal standard, commonly known as the HUD Standard, for the construction, design and performance of a manufactured home which meets the needs of the public including the need for quality, durability and safety. Units conforming to the FMHCSS are certified by an affixed label that reads as follows:

AS EVIDENCED BY THIS LABEL NO. _____ THE MANUFACTURER CERTIFIES TO THE BEST OF THE MANUFACTURER'S KNOWLEDGE AND BELIEF THAT THIS MANUFACTURED HOME HAS BEEN INSPECTED IN ACCORDANCE WITH THE REQUIREMENTS OF THE DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT AND IS CONSTRUCTED IN CONFORMANCE WITH THE FEDERAL MANUFACTURED HOME CONSTRUCTION AND SAFETY STANDARDS IN EFFECT ON THE DATE OF MANUFACTURE. SEE DATA PLATE.

Manufactured Home. A structure which is built to the Federal Manufactured Home Construction and Safety Standards and FmHA or its successor agency under Public Law 103-354's thermal requirements. It is transportable in one or more sections, which in the traveling mode is ten body feet or more in width, and when erected on site is four hundred or more square feet, and which is built on a permanent foundation when

connected to the required utilities. It is designed and constructed for permanent occupancy by a single family and contains permanent eating, cooking, sleeping and sanitary facilities. The plumbing, heating, and electrical systems are contained in the structure.

Manufactured Home Community. A parcel or contiguous parcels of land which contains two or more manufactured home sites available to the general public for occupancy. Sites and units may be for rent, or sites may be sold for residential occupancy (as in a subdivision).

Manufactured Home Rental Project. A parcel or multiple parcels of land which have been so designated and improved to contain manufactured homes with sites available for rent.

Manufactured Home Site. A designated parcel of land in a manufactured home rental project, subdivision or scattered site designed for the accommodation of a unit and its accessory structures for the exclusive use of the occupants.

Manufactured Home Subdivisions. Five or more contiguous (developed or undeveloped) lots, or building sites that meet the requirements of subpart C of part 1924 of this chapter.

Permanent Perimeter Enclosure. A permanent perimeter structural system completely enclosing the space between the floor joist of the manufactured home and the ground. If separate from the foundation system, the permanent perimeter enclosure shall be secured to the perimeter of the manufactured home, properly ventilated and accessible and constructed of materials that conform to the FmHA or its successor agency under Public Law 103-354 adopted MPS requirements for foundations.

Pier Support System. Consists of footings, piers, caps, leveling spacers, or approved prefabricated load bearing devices.

Related Facilities. Any nonresidential structure or building used for rental housing related purposes.

Site-Built Permanent Foundation System. A foundation system (consisting of a combination of footings, piers, caps and shims and anchoring devices or required structural connections) which is designed and constructed to support the unit and sustain, within allowable stress and settlement limitations, all applicable loads specified in ANSI A58.1-1982. All loads shall be transferred from the manufactured home to the earth at a depth below the established frost line without exceeding the safe bearing capacity of the supporting soil.

Set-Up. The work performed and operations involved in the placement of a manufactured home on a foundation system, to include installation of accessories or appurtenances and anchoring devices, and when local regu-

lations permit, connection of utilities, but excluding preparation of the site.

IV. Compliance with Local Regulations. These requirements do not replace site development standards established by local law, ordinances, or regulations. Whenever such local standards contain more stringent provisions than any of the site development, installation and set-up minimums of FmHA or its successor agency under Public Law 103-354, the more stringent standards shall govern.

V. Applicable Standards, Regulations and Manuals.—A. Manufactured housing to be financed by FmHA or its successor agency under Public Law 103-354 must comply with the following standards:

1. Federal Manufactured Home Construction and Safety Standards, 24 CFR part 3280, mandated by Congress under title VI of the Federal Housing and Community Development Act of 1974, except for §3280.506, "Heat Loss," of subpart F, "Thermal Protection," to part 3280.

2. Foundation requirements of the Minimum Property Standards as adopted by FmHA or its successor agency under Public Law 103-354 or a Model Building Code acceptable to FmHA or its successor agency under Public Law 103-354.

3. [Reserved]

4. Uniform Federal Accessibility Standard (UFAS).

5. ANSI A58.1-1982, Minimum Design Loads for Buildings and Other Structures.

B. Manufactured housing to be financed by FmHA or its successor agency under Public Law 103-354 shall comply with all applicable FmHA or its successor agency under Public Law 103-354 regulations, including but not limited to the following:

1. Subpart C of part 1924 of this chapter, "Planning and Performing Development Work."

2. Subpart A of part 1924, exhibit D, "Thermal Performance Construction Standards."

3. Subpart G of part 1940, "Environmental Program."

4. Subpart A of part 1944, "Section 502 Rural Housing Loan Policies, Procedures, and Authorizations."

5. Subpart E of part 1944, "Rural Rental Housing Loan Policies, Procedures, and Authorizations."

The requirements of the above references have not been repeated in this exhibit. Those requirements contained above are either mandatory or minimums and every effort should be made by the applicant, builder-developer or dealer-contractor to utilize higher standards, when appropriate.

Part B—Construction and Land Development

I. General Acceptability Criteria. The following criteria apply to development on scattered sites, in subdivisions and in rental project communities.

A. A manufactured home development including a site, rental project or subdivision shall be located on property designated for that use, where designations exist, by the local jurisdiction.

B. Conditions of soil, ground water level, drainage, flooding and topography shall not create hazards to the property and health or safety of the residents.

C. The finished grade elevation beneath the manufactured home or the first flood elevation of the habitable space, whichever is lower, shall be above the 100-year return frequency flood elevation. This requirement applies wherever manufactured homes may be installed, not just in locations designated by the National Flood Insurance Program as areas of special flood hazards. The use of fill to accomplish this is a last resort. However, as stated in §1940.304 of subpart G of part 1940 of this chapter, it is FmHA or its successor agency under Public Law 103-354's policy not to approve or fund any proposal in a 100-year floodplain area unless there is no practicable alternative to such a floodplain location.

D. Essential service such as employment centers, shopping, schools, recreation areas, police and fire protection, and garbage and trash removal shall be convenient to the development and any site, community, or subdivision must meet the environmental and location requirements contained in subpart G of part 1940 of this chapter.

E. Manufactured home sites, rental projects and subdivisions shall not be subject to any adverse influences of adjacent land uses. An adverse influence is considered as one that is out of the acceptable level or range of a recognizable standard or where no standard exists is considered a nuisance irrespective of a site being zoned for manufactured home use. Health, safety and aesthetic consequences of location shall be carefully assessed by inspection of the site prior to selection of development. Undesirable land uses such as deteriorated residential or commercial areas and noxious industrial properties shall be avoided to ensure compatibility. Other undesirable elements such as heavily traveled highways, airport runways, railroad, or fire hazards and other areas subject to recognizably intolerable noise levels shall be avoided.

F. The requirements for streets shall be those found in subpart C of part 1924 of this chapter.

G. The site design and development shall be in accordance with sound engineering and architectural practices and shall provide for all utilities in a manner which allows adequate, economic, safe, energy efficient and dependable systems with sufficient easements for their required installation and maintenance.

H. Utilities for each manufactured home site, rental housing project or subdivision shall be designed and installed in accordance

with subpart C of part 1924 of this chapter; and the State health authority having jurisdiction, and all local laws and regulations requiring approval prior to construction.

I. Exhibit C, section V of this subpart shall be complied with by the applicant, dealer-contractor or builder-developer for manufactured home projects with individual water supply and sewage disposal systems. This exhibit shall be used by the FmHA or its successor agency under Public Law 103-354 County Supervisors, District Directors, and State Directors in reviewing submissions.

J. During the planning, design, and construction of the foundation system and/or perimeter enclosure, provisions shall be made for the installation and connection of on-site water, gas, electrical and sewer systems, which are necessary for the normal operation of the manufactured home. Water and sewer system hookups shall be adequately protected from freezing.

II. *Development on Scattered Sites and in Subdivisions.*—A. *General.* Scattered sites and subdivision developments will be planned and constructed in accordance with specific requirements of this subpart, subpart C of part 1924, and subpart G of part 1940 of this chapter, and the applicable FmHA or its successor agency under Public Law 103-354/MPS or Model Building Codes acceptable to FmHA or its successor agency under Public Law 103-354. Manufactured homes for development in a manufactured home community shall:

1. Be erected with or without a basement on a site-built permanent foundation that meets or exceeds applicable requirements of the FmHA or its successor agency under Public Law 103-354/MPS for One- and Two-Family Dwellings or Model Building Codes acceptable to FmHA or its successor agency under Public Law 103-354;

2. Be permanently attached to that foundation by anchoring devices adequate to resist all loads identified in the FmHA or its successor agency under Public Law 103-354 adopted MPS (this includes resistance to ground movements, seismic shaking, potential shearing, overturning and uplift loads caused by wind, etc.);

3. Have had the towing hitch or running gear, which includes tongues, axles, brakes, wheels, lights and other parts of the chassis that operate only during transportation removed;

4. Have any crawl space beneath the manufactured home properly ventilated and enclosed by a continuous permanent perimeter enclosure. If it is not the supporting foundation, designed to resist all forces to which it may be subject without transmitting to the building superstructure movements or any effects caused by frost heave, soil settlement (consolidation), or shrinking or swelling of expansive soils; and be constructed of materials that conform to FmHA or its successor

agency under Public Law 103-354 adopted MPS requirements for foundations;

5. Have the manufactured home insulated to meet the energy conserving requirements contained in exhibit D of this subpart;

6. Have a manufactured home site, site improvements, and all other features of the mortgaged property not addressed by the Federal Manufactured Home Construction and Safety Standards, meet or exceed applicable requirements of this subpart and subpart C of part 1924 of this chapter, the FmHA or its successor agency under Public Law 103-354 adopted MPS except paragraph 31-2.2 or a Model Building Code acceptable to FmHA or its successor agency under Public Law 103-354;

7. Have had the manufactured unit itself braced and stiffened where necessary before it leaves the factory to eliminate racking and potential damage during transportation; and

8. Be eligible for financing in accordance with the requirements of either section 502, or section 515 of FmHA or its successor agency under Public Law 103-354's Housing Program, for which purpose the beginning of construction will be the commencement of on-site work even though the manufactured home itself may have been produced and temporarily stored prior to the date of application for financing.

B. Site Planning and Development. The site planning and development of manufactured home scattered sites and subdivisions shall also comply with the following:

1. *Arrangement of Structures and Facilities.* The site, including the manufactured home, accessory structures, and all site improvements shall be harmoniously and efficiently organized in relation to topography, the shape of the plot, and the shape, size and position of the unit. Particular attention shall be paid to use, appearance and livability.

2. *Adaptation to Site Assets.* The manufactured home shall be fitted to the terrain with a minimum disturbance of the land. Existing trees, rock formations, and other natural site features shall be preserved to the extent practical. Favorable views or outlooks shall be emphasized by the plan.

3. *Site Plan.* The site plan shall provide for a desirable residential environment which is an asset to the community in which it is located.

4. *Lot Size.* The size of manufactured home lots (scattered sites and subdivision) shall be determined by §1944.11(e) of subpart A of part 1944 and subpart C of part 1924 of this chapter.

C. Foundation Systems, Anchoring and Set-up.

1. The foundation system shall be constructed in accordance with this subpart and one of the following: (a) The foundation system included in the manufacturer's installation instructions meeting FmHA or its suc-

cessor agency under Public Law 103-354/MPS requirements, (b) the FmHA or its successor agency under Public Law 103-354/MPS 4900.1, which specifies performance requirements for foundations in section 600 "General" and paragraph 601-16 "Foundations," or (c) an FmHA or its successor agency under Public Law 103-354 recognized model building code.

2. The manufactured home permanent foundation system shall constitute a permanent load bearing support system for the manufactured home. The manufacturer or applicant shall be permitted to design or specify the installation of a foundation system which meets FmHA or its successor agency under Public Law 103-354/MPS design requirements for foundations and the general requirements above.

3. The applicant's responsibility for proper design and installation of the permanent foundation system, anchoring and set-up shall be in accordance with §1924.5(f)(1), of this subpart.

4. The builder/developer of the manufactured home property, for proposed construction, shall submit with the application for financing by the applicant or for a conditional commitment design calculations, details and drawings for the installation, anchorage and construction of permanent foundation and perimeter enclosure to be used.

III. Rental Housing Project Development.— **A. General.** Manufactured housing rental developments shall be planned and constructed in accordance with requirements of subpart C of part 1924; this subpart; subpart G of part 1940, the FmHA or its successor agency under Public Law 103-354/MPS; and the requirements of subpart E of part 1944 of this chapter.

B. Site Planning and Development. Site planning and development shall adapt to individual site conditions and the type of market to be served, reflect advances in site planning and development techniques, and be adaptable to the trends in design of the manufactured home. Site planning and development shall utilize existing terrain, trees, shrubs and rocks formations to the extent practicable. A regimental style site plan design should be avoided.

C. Foundation Systems, Anchoring and Set-up. Foundation systems, anchoring and set-ups for manufactured home rental projects (site and home) developed under FmHA or its successor agency under Public Law 103-354 section 515 Rural Rental Housing program shall comply with the requirements of paragraphs II A and II C above.

IV. Accessory Structures and Related Facilities.— **A. General.** Accessory structures and related facilities are dependent upon the manufactured home and its environment.

1. Accessory structures and related facilities shall be planned, designed and constructed in accordance with the applicable provisions of this subpart; the FmHA or its

successor agency under Public Law 103-354/MPS; and local criteria of the authority having jurisdiction.

2. Accessory structures and related facilities shall be designed in a manner that will eliminate and prevent health and safety hazards and enhance the appearance of the manufactured home and its environment.

3. Accessory structures and related facilities shall not obstruct required openings for light and ventilation of the manufactured home and shall not hamper installation and utility connections of the unit.

B. *Accessory Structures.* 1. Accessory structures shall not include spaces for pantries, bath, toilet, laundries, closets or utility rooms.

2. Accessory structures shall be carefully designed and constructed for the convenience and comfort of the manufactured home occupant. These features significantly affect the visual appearance of the community and influence livability.

C. *Related Facilities (Rental Housing Projects).* 1. This includes those facilities as defined in §§1944.205(i) and 1944.212(f) of subpart E of part 1944 of this chapter.

1. This includes those facilities as defined in §1944.212(e) of subpart E of part 1944 of this chapter.

2. Related facilities built on-site must meet the FmHA or its successor agency under Public Law 103-354/MPS and subpart A of part 1924 of this chapter or other building codes approved by FmHA or its successor agency under Public Law 103-354.

3. Workmanship shall be of a quality equal to good standard practice. Material shall be of such kind and quality as to assure reasonable durability and economy of maintenance, all commensurate with the class of building under consideration.

4. All members and parts of the construction shall be properly designed to carry all loads imposed without detrimental effect on finish or covering materials.

5. The structure shall be adequately braced against lateral stresses and each member shall be correctly fitted and connected.

6. Adequate precautions shall be taken to protect against fire and accidents.

7. All related facilities which require accessibility to the handicapped must comply with the Uniform Federal Accessibility Standard (UFAS).

V. *Fire Protection and Safety.* A. The design of the site plan for each manufactured community and scattered site shall meet the fire protection and safety requirements of the local authority responsible for providing the necessary fire protection services.

B. All fire detection and alarm systems, and water supply requirements for fire protection for manufactured communities shall be in accordance with the local authority responsible for providing the necessary fire protection services.

C. Any portion of a manufactured home shall not be closer than the local separation requirements of the development standard for side to side, end to end, and end to side siting. If the exposed composite wall and roof of two or more manufactured homes are proposed to be joined they shall be without openings and constructed of materials which will provide a minimum one-hour fire rating each, or the manufactured homes are separated by a one-hour fire rated barrier designed and approved for such installation and permitted by the authority having jurisdiction.

D. Manufactured homes shall not be positioned vertically (stacked) with one over the other in whole or in part without the specific approval of the authority having jurisdiction.

Part C—Drawings, Specifications, Contract Documents and Other Documentation

I. *General.* Adequate site development and foundation installation drawings and specifications shall be provided by the applicant or dealer-contractor to FmHA or its successor agency under Public Law 103-354 to fully describe the construction and other development work. These documents shall be provided according to the requirements of §1924.5(f)(1) of this subpart. Contract documents will be prepared in accordance with §1924.6 and, in the case of multiple family housing construction and development, §1924.13 of this subpart.

A. The documents recommended shall be used as a guide for drawings and specifications to be submitted in support of all types of loan and/or grant applications involving manufactured homes. Adequate and accurate drawings and specifications are necessary to:

1. Determine the acceptability of the physical environment and improvements,

2. Determine compliance with the applicable standards and codes,

3. Review cost estimates, and

4. Provide a basis for financing, inspections, and the warranty.

B. Detailed floor plans, drawings and specifications are not required for any manufactured home to be installed on a scattered site, in a subdivision or rental housing project. However, a schematic floor plan should be submitted by the applicant when applying for FmHA or its successor agency under Public Law 103-354 financing. The unit must have an affixed label as specified in paragraph XIV (c)(3) of exhibit F of subpart A of part 1944 indicating that the unit is constructed to the FmHA or its successor agency under Public Law 103-354 thermal requirements for the appropriate winter degree days. This will indicate that the manufacturer certifies that the unit has been properly inspected and it meets the FmHA or its successor agency under Public Law 103-354

Thermal Performance Construction Standard.

C. For proposed construction, the builder or dealer-contractor shall submit with the loan or grant application design calculations, details and drawings for the installation, anchorage and construction of the permanent foundations and perimeter enclosure to be used. Drawings and specifications for foundation systems will be reviewed and examined by either the FmHA or its successor agency under Public Law 103-354 County Supervisor, District Director, or State Architect/Engineer for foundation support locations, loads and connection requirements specified by the manufacturer as a basis for evaluating foundation compliance with the FmHA or its successor agency under Public Law 103-354/MPS or Model Building Code, and for determining design suitability for soil conditions. Drawings and specifications will also be examined by FmHA or its successor agency under Public Law 103-354 to determine compliance with all other on-site features not covered by the FMHCSS.

D. Foundation design sections and details of all critical construction points systems, anchorage methods, and structural items shall be scaled as necessary to provide all appropriate information 1:30 (3/8"=1'-0") minimum.

II. *Scattered Sites.* Drawings for single family manufactured housing shall be submitted by the applicant in addition to the requirements of paragraph I above and the requirements of paragraphs II A and D-7 of exhibit C of this subpart.

III. *Subdivisions.* Subpart C of part 1924 of this chapter will be used in preparing and providing supporting documents.

IV. *Rental Housing Projects.* Subpart C of part 1924 of this chapter will be used in preparing and providing supporting documents.

V. *Specifications.* A. Form FmHA or its successor agency under Public Law 103-354 424-2, "Description of Materials," or other acceptable and comparable descriptions of all materials used for site development, foundation installation and the permanent perimeter enclosure shall be submitted with the drawings by the applicant.

B. The material identification information shall be in sufficient detail to fully describe the material, size and grade. Where necessary, additional sheets shall be attached as well as manufacturer's specification sheets for equipment and/or special materials.

Part D—Inspection of Development Work

I. *General.* The following policies will govern the inspection of all manufactured housing development work. This includes scattered sites, subdivisions, rental housing projects and all accessory structures and related facilities unless otherwise indicated.

II. *Inspections.* A. The responsibility for frequency and propose of inspections shall be in

accordance with §1924.9(b) (1), (2) and (3) of this subpart. The inspection requirements of §1924.13 apply to the planning and conduct of construction work on all 515 housing developments that are more extensive in scope and more complex in nature than those involving an individual manufactured housing unit. The Stage 2 inspection customary for site-built housing when the building is enclosed is not required for manufactured homes.

The Stage 2 inspection for manufactured homes will be made within two working days after erection or placement on the foundation to determine compliance with accepted installation drawings and specifications for installation and set-up and to verify that the correct unit is on the site.

Stages 2 and 3 inspections for manufactured homes may be combined when authorized by the State Director.

B. The borrower will join the County Supervisor or the District Director in making periodic inspections as often as possible and always for the final inspection.

C. The borrower should be encouraged to make enough periodic visits to the site to be familiar with the progress and performance of the work in order to protect the borrower's interest. If the borrower observes or otherwise becomes aware of any fault or defect in the work or nonconformance with the contract documents, the borrower should give prompt written notice thereof to the dealer-contractor and a copy of the notice to the appropriate County Supervisor or District Director.

D. During inspection, it will generally be infeasible to determine whether a manufactured unit erected on a site was properly braced and stiffened during transportation. Inspectors should examine these units to determine that there is no obvious damage or loosening of fastenings that may have occurred during transportation. The dealer-contractor must warrant these units against such damage, which should protect FmHA or its successor agency under Public Law 103-354's interest.

III. *Warranty Plan Coverage.* The warranty requirements for all development work shall be in accordance with §1924.9(d) of this subpart and exhibit F of subpart A of part 1944 of this chapter.

[51 FR 41603, Nov. 18, 1986, as amended at 52 FR 19283, May 22, 1987; 53 FR 2156, Jan. 26, 1988]

EXHIBIT K TO SUBPART A—CLASSIFICATIONS FOR MULTI-FAMILY RESIDENTIAL REHABILITATION WORK

I. General

This exhibit distinguishes between what FmHA or its successor agency under Public

Law 103-354 considers maintenance and repair work, moderate rehabilitation and substantial rehabilitation. In all cases, the building or project to be rehabilitated shall be structurally sound. The applicant shall have a structural analysis of the existing building made to determine the adequacy of all structural systems for the proposed rehabilitation.

II. Definitions

Maintenance and Repair—Work involved in the selective replacement and general maintenance and repair of certain materials, appliances or components of an existing residential building.

Moderate Rehabilitation—All work directly involved in the rearrangement of interior space, the replacement of finish materials or components of the electrical, plumbing, heating or conveyance systems of an existing multi-family residential building. Work and improvements are considered to be more than routine maintenance and repair.

Substantial Rehabilitation—All work directly involved in the rearrangement of interior space that involves alteration of load bearing partitions and columns; the replacement of the electrical, plumbing, heating or conveyance systems; and the addition to and/or major conversion of existing multi-family residential buildings or other building structures.

Moderate rehabilitation and repair shall not be limited to building changes for cosmetic or convenience purposes. In all cases moderate rehabilitation shall involve a minimum of three (3) components of building rehabilitation listed as moderate. Unless combined with other improvements in a project that are considered to be moderate or substantial rehabilitation the items identified as maintenance and repair are considered to be cosmetic and convenience changes.

When a rehabilitation project consists of both moderate and substantial rehabilitation components, those substantial rehabilitation components shall be in accordance with FmHA or its successor agency under Public Law 103-354's development standards and local codes and regulation requirements. Where the majority of project components of building rehabilitation are considered substantial the project shall be considered in the substantial rehabilitation category.

Those site components of rehabilitation such as landscaping, grading, drainage, fencing, parking areas, recreation areas, water and waste disposal systems, etc., whether considered either maintenance and repair, moderate rehabilitation or substantial rehabilitation shall be in accordance with FmHA or its successor agency under Public Law 103-354's development standards for site development work; all local codes and regulation requirements; and sound engineering and architectural practices.

Any alteration of a structure listed or eligible for listing on the National Register of Historic Places may be considered either moderate or substantial rehabilitation; however, it shall conform first to the Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings and then to FmHA or its successor agency under Public Law 103-354's requirements. In cases where the Secretary of the Interior's standards cannot be met, rehabilitation will conform to the agreed upon approaches, treatments and techniques resulting from the consultation process between FmHA or its successor agency under Public Law 103-354, the borrower, the State Historic Preservation Officer and the Advisory Council of Historic Preservation.

III. Components of Multi-Family Building Rehabilitation

The components of multi-family building rehabilitation necessary and generally considered by FmHA or its successor agency under Public Law 103-354 to be either maintenance and repair, moderate rehabilitation or substantial rehabilitation include but are not limited to those listed in the following chart.

COMPONENTS OF MULTI-FAMILY BUILDING REHABILITATION

| Components | Maintenance and repair | Moderate rehabilitation | Substantial rehabilitation |
|--|------------------------|-------------------------|----------------------------|
| Air conditioning | 0 | | |
| Appliance replacement or repair | 0 | | |
| Cabinet replacement or repair | 0 | | |
| Carpeting | 0 | | |
| Caulking | 0 | | |
| Ceiling framing | 0 | | |
| Clothes closets or shelving improvements | 0 | | |
| Door repair | 0 | | |
| Drywall repair | 0 | | |
| Gutters and downspouts | 0 | | |
| Hardware replacement or repair | 0 | | |
| Kitchen cabinet improvement | 0 | | |
| Lighting fixture replacement or repair | 0 | | |
| Mail boxes | 0 | | |
| Painting | 0 | | |
| Paneling | 0 | | |
| Partition repair | 0 | | |
| Roof repair | 0 | | |
| Signage | 0 | | |
| Stair repair | 0 | | |
| Tile work | 0 | | |
| Wallpapering | 0 | | |
| Window shades and curtains | 0 | | |
| Door replacement | | 0 | |
| Drywall replacement | | 0 | |
| Elevator components replacement | | 0 | |

COMPONENTS OF MULTI-FAMILY BUILDING
REHABILITATION—Continued

| Components | Maintenance and repair | Moderate rehabilitation | Substantial rehabilitation |
|---|------------------------|-------------------------|----------------------------|
| Exterior entrance redesign, relocation | | 0 | |
| Finish flooring materials | | 0 | |
| Flashing | | 0 | |
| Furnace replacement | | 0 | |
| Gas pipes | | 0 | |
| Insulation | | 0 | |
| Lath and plaster replacement | | 0 | |
| New shingles or roof replacement | | 0 | |
| Partition (nonbearing) replacement, or relocation | | 0 | |
| Plumbing fixture replacement | | 0 | |
| Pointing | | 0 | |
| Porch and steps alterator or replacement | | 0 | |
| Stair replacement, or relocation | | 0 | |
| Storm windows and weatherstripping | | 0 | |
| Subfloor material replacement | | 0 | |
| Trim—exterior and interior | | 0 | |
| Window replacement | | 0 | |
| New or alteration to the: | | | |
| Mechanical system | | | 0 |
| Soil pipes | | | 0 |
| Vent pipes | | | 0 |
| Waste pipes | | | 0 |
| Alteration or replacement of structural components: | | | |
| Beams | | | |
| Chimneys and vents | | | 0 |
| Columns and post .. | | | 0 |
| Electrical service—replacement or new | | | 0 |
| Elevator replacement | | | 0 |
| Exterior walls | | | 0 |
| Floor construction ... | | | 0 |
| Footing | | | 0 |
| Foundation wall | | | 0 |
| Foundation waterproofing | | | 0 |
| Interior walls | | | 0 |

Moderate repair and rehabilitation shall not be limited to building changes for cosmetic purposes. In all cases moderate rehabilitation shall involve a minimum of three (3) components of building rehabilitation listed as moderate. Unless combined with other improvements in a project that are considered to be moderate or substantial rehabilitation the items identified as maintenance and repair are considered to be cosmetic and convenience changes.

EXHIBIT L TO SUBPART A—INSURED 10-YEAR HOME WARRANTY PLAN REQUIREMENTS

I. Purpose

In recent years, numerous third-party home warranty plans have been developed offering new homeowners varying degrees of protection against builder default and/or major structural defects in their homes. This exhibit establishes the criteria and procedures by which a warranty plan is found acceptable for new construction of single family homes financed by Farmers Home Administration (FmHA) or its successor agency under Public Law 103-354. An acceptable warranty plan will:

A. Assure that FmHA or its successor agency under Public Law 103-354 borrowers receive adequate warranty coverage,

B. In certain circumstances, eliminate the requirement for FmHA or its successor agency under Public Law 103-354 personnel to make the first two construction inspections, and

C. Permit a loan up to the market value of the security (less the unpaid principal balance and past due interest of any other liens against the security), even though FmHA or its successor agency under Public Law 103-354 personnel may not have performed period inspections during construction.

II. Types of Warranty Companies

A. An insured warranty company is underwritten by an insurance carrier, licensed to operate as an insurer by the states where the warranty company plans to operate, and has an acceptable rating from a nationally recognized rating company such as A.M. Best Company.

B. A risk retention group is an insurer which is licensed in one state and is authorized, under the Products Liability Risk Retention Act of 1981, to issue its policies in all states. This authority is not challenged by FmHA or its successor agency under Public Law 103-354; however, there remains some question as to the legal propriety of a 10-year insured warranty insurer to be a risk-retention group. If at some future time any state insurance commission or regulatory agency challenges the legal authority of such group, FmHA or its successor agency under Public Law 103-354 will reconsider its acceptance of the group.

C. Individual state warranty plans, such as that offered by the State of New Jersey, are backed by the full faith and credit of the state government.

III. Plan Requirements

To be considered acceptable, a warranty plan must include the following features:

A. The entire cost (fee, premium, etc.) of the coverage is prepaid and coverage automatically transfers to subsequent owners without additional cost.

B. The coverage is not cancellable by the warrantor (builder), warranty company or insurer.

C. The coverage age includes at least the following:

(1) For one year from the effective date, any defects caused by faulty workmanship of defective materials.

(2) During the second year after the effective date, the warranty continues to cover the wiring, piping and duct work of the electrical, plumbing, heating and cooling systems, plus the items in (3).

(3) During the third through the tenth years, the warranty continues to cover major structural defects. A major structural defect is actual damage to the load-bearing portion of the home including damage due to subsidence, expansion or lateral movement of the soil (excluding movement caused by flood or earthquake) which affects its load-bearing function and which vitally effects or is imminently likely to affect use of the home for residential purposes.

D. A system is provided for complaint (claims) handling which includes a conciliation and, if necessary to resolve matters in dispute, arbitration arranged by the American Arbitration Association or similar organization.

E. A construction inspection plan is required if FmHA or its successor agency under Public Law 103-354 is to eliminate the first two FmHA or its successor agency under Public Law 103-354 inspections or permit a full market value loan when FmHA or its successor agency under Public Law 103-354 inspections are not conducted.

IV. Information for Review

A. Companies submitting warranty plans for a determination of acceptability must support requests with the following information.

(1) Evidence that the insured warranty company has met the applicable state licensing and/or regulatory requirements in the state in which the company plans to operate.

(2) Evidence that the insurance carrier underwriting the warranty plan is licensed to operate as an insurer in the states in which the company plans to operate and has an acceptable rating from a nationally recognized company such as A.M. Best Company.

(3) State warranty plan agencies will provide evidence that the plan is backed by the full faith and credit of the state.

(4) A full description of the warranty plan including information on the fees, builder and home registration procedures, required construction standards, construction inspection procedures, coverage provided and claims procedures.

(5) A sample copy of the warranty information and/or policy which is provided to the homeowner.

(6) Suggested means by which FmHA or its successor agency under Public Law 103-354 field offices can readily assure that the builder is a member in good standing prior to loan approval and that a warrant will be issued upon the completion of construction prior to the final release of funds.

B. Submission and Acceptance:

(1) Insured warranty companies, except those operating as risk retention groups, and state warranty plan agencies will submit their requests and supporting information to the FmHA or its successor agency under Public Law 103-354 State Director in the state in which they plan to operate. State Directors will determine the acceptability of insured warranty plans and state warranty plans in their jurisdictions, notify the company or agency of the decision in writing and notify field offices by issuance of a State Supplement including the names and addresses of acceptable warranty companies and any other pertinent information.

(2) Warranty companies claiming authority as risk retention groups will submit their requests and supporting information including certification that it has complied with all requirements of the Products Liability Risk Retention Act of 1981 (Pub. L. 97-45) and information indicating the state in which it is licensed, information to the FmHA or its successor agency under Public Law 103-354 National Office, Single Family Housing Processing Division. The National Office will determine the acceptability of the warranty of a risk retention group, notify the company of the decision in writing and notify field offices by issuance of an attachment to this exhibit.

V. Warranty Performance

A. County Supervisors will report inadequate warranty performance through their District Director to the State Director. State Directors will review the situation, assist in resolving any problems and, if necessary, initiate action under subpart F of part 1942 of this chapter. State Directors will inform, by memorandum, the Director, Single Family Housing Processing Division, National Office, of any problems with warranty performance and if any debarment action is initiated.

B. State Directors will annually monitor each warranty company and/or its insurer to assure continued compliance with state licensing and/or regulatory requirements.

Attachment 1—Acceptable Warranty Companies

The warranty companies listed below claim authority to act as a risk retention group under the Products Liability Risk Retention Act of 1981 and as such, to operate in

RHS, RBS, RUS, FSA, USDA**§ 1924.54**

all States to provide 10-year home warranties. This authority remains subject to future challenges by any State insurance commissioner or regulatory agency; however, until such challenge is made, FmHA or its successor agency under Public Law 103-354 accepts their warranty.

| Name and address | Area of operation |
|---|-------------------|
| Home Owners Warranty Corporation/ HOW Insurance Company, 11 North Glebe Road, Arlington, Virginia 22201, (703) 516-4100. | All States. |

[52 FR 8002, Mar. 13, 1987, as amended at 56 FR 29167, June 26, 1991]

Subpart B—Management Advice to Individual Borrowers and Applicants

SOURCE: 53 FR 35679, Sept. 14, 1988, unless otherwise noted.

§ 1924.51 General.

This subpart contains policies for providing management advice to all Farm Credit Programs direct loan applicants and borrowers. Forms and Farm Assessment and Supervision Reference handbooks are available in any Agency county office.

[61 FR 35922, July 9, 1996]

§§ 1924.52–1924.53 [Reserved]

§ 1924.54 Definitions.

As used in this subpart, the following definitions apply:

Agency. This term refers to the Farm Service Agency, its county and State committees and their personnel, and any successor agency.

Commercial classified. The Agency's highest quality Farm Credit programs accounts. The financial condition of the borrowers is strong enough to enable them to absorb the normal adversities of agricultural production and marketing. There is ample security for all loans, there is sufficient cash flow

to meet the expenses of the agricultural enterprise and the financial needs of the family, and to service debts. The account is of such quality that commercial lenders would likely view the loans as a profitable investment.

Farm Assessment and Supervision Reference. This reference provides guidance to field staff on conducting assessments, year-end analyses, and general borrower supervision.

Farm business plan. The automated or manual Farm and Home Plan system which contains a projection that accurately reflects the borrower's plan of operation for the production or marketing cycle. The annual plan may cover a period of more or less than 12 months. A normal year's plan, as defined in this section, will be used when the annual plan does not reflect typical income, expenses, and debt payments. The Agency will accept farm business plans other than the Farm and Home Plan if they provide sufficient information to enable Agency officials to render a sound credit decision in accordance with Agency regulations.

Farm Credit Programs loan. Includes Farm Ownership (FO), Soil and Water (SW), Operating (OL), Emergency (EM), Economic Emergency (EE), Recreation (RL), Special Livestock (SL), Economic Opportunity (EO) and Softwood Timber (ST) loans. Also included are Rural Housing loans for farm service buildings (RHF), and Rural Housing (RH) loans where the borrower is also indebted for an Agency direct farm loan that is not a collection only or judgment account. Non-Program loans, which are defined in §1951.451(a), are excluded.

Financially viable operation. A financially viable operation projects that it can generate sufficient income to meet annual operating expenses and debt payments as they become due, meet basic family living expenses to the extent they are not met by dependable non-farm income, provide for the replacement of capital items, and provide for long-term financial progress to enable the operator to obtain commercial credit.

Individual. The term "individual" is used throughout this subpart to refer to the person receiving Agency supervision and management advice. If an

applicant or borrower applies as an individual applicant, the term "individual" means the operator. In the case of an eligible corporation, cooperative, partnership, or joint operation, the term "individual" means the entity members with the primary responsibility for making management decisions and carrying out the day-to-day physical tasks.

Normal year plan. A projected farm business plan most representative, or typical, of an operation's normal income, expenses (including family living expenses), and capital debt payments.

Prospectus. Consists of a transmittal letter similar to FmHA Guide Letter 1951-F-3 with a current balance sheet and projected year's budget attached. The applicant or borrower name and address need not be withheld from the lender. The prospectus is used to determine lender interest in financing or refinancing specific direct loan applicants and borrowers. The prospectus will provide information regarding the availability of Agency loan guarantee and interest assistance.

Standard classified. These loan accounts are fully acceptable by Agency standards. Loan risk and potential loan servicing costs are higher than would be acceptable to other lenders, but all loans are adequately secured. Repayment ability is adequate, and there is a high probability that all loans will be repaid as scheduled and in full.

[61 FR 35922, July 9, 1996]

§ 1924.55 Assessment of the agricultural operation.

Assessments will be completed for direct Farm Credit Programs loan applicants. An assessment is a comprehensive evaluation of the components of an operation, the identification and prioritization of training and supervisory needs, and the resulting plan of supervision to assist the borrower in achieving financial viability. The assessment is the central foundation upon which to build strategies for planning, credit and management counseling, loan controls, analysis, borrower training, and all other needed supervision. An assessment will include thorough inspections of the operation and face-to-face meetings and discussions with all key individuals. At least

semi-annual reviews of progress will be performed in accordance with paragraph (e) of this section.

(a) *Agency evaluation.* The Agency will assess each of the areas described in paragraph (b) of this section in close cooperation with the applicant or borrower. As part of that assessment, the Agency will determine whether the proposed budget is feasible on a direct or guaranteed loan basis, the type and nature of any material financial or production management weaknesses in the operation, and the specific strategy needed, including timeframes, to effect improvements and control risks. Material weaknesses are those that have a significant impact on the net income of the operation and need to be corrected to enable the borrower to progress financially and eventually graduate from FSA farm credit programs. Examples of material weaknesses include, but are not limited to: lack of a farm recordkeeping system, obsolete or inadequate facilities, and use of outdated production practices. In the case of Youth loans, it is recognized that most of the component areas will be "Not Applicable" since there is no full-scale farming operation to consider.

(b) *The assessment is an evaluation, conducted with an applicant or borrower, of the following components:*

- (1) Type of operation.
- (2) Goals.
- (3) Real estate, including facilities.
 - (i) Location and size.
 - (ii) Proposed and existing improvements.
- (iii) Presence of environmental hazards.
- (iv) Conservation practices and measures.
- (v) Adequacy and continued availability of real estate.
- (vi) External factors, such as urban encroachment and zoning changes.
- (4) Chattel property used in the operation.
- (5) Farm business organization and key personnel.
- (6) Historical financial data.
- (7) Projected budget.
- (8) Planned changes.
- (9) Ability to obtain guaranteed credit.

(c) *Supervision and training.* Appropriate supervisory oversight and training recommendations will be developed based on the Agency's evaluation of the strengths and weaknesses of the operation in accordance with paragraphs (a) and (b) of this section and § 1924.59.

(d) *Performing the year-end analysis.* A year-end analysis is required for borrowers (except for Youth loans and loans flagged as having bankruptcy, foreclosure, or other action pending) the first year after an initial or subsequent loan, chattel subordination, or restructuring is received, borrowers who are financially distressed or delinquent, borrowers who have loans deferred, and borrowers who are receiving limited resource interest rates. All other borrowers (including flagged accounts) will receive a year-end analysis at the discretion and judgment of the Agency. However, at least every two years, the borrower will provide upon Agency request, a year-end balance sheet, actual financial performance, and a projected farm budget so that the borrower can be classified for graduation purposes in accordance with subpart F of part 1951. The year-end analysis should coincide with the borrower's farm budget planning period. The borrower will work with the Agency to:

(1) Complete the year-end analysis, whenever possible, within the 60-day period after completion of the borrower's business year or farm budget planning period.

(2) Complete and review the "actual" columns on the farm business plan and Form FmHA 1962-1, "Agreement for the Use of Proceeds/Release of Chattel Security," if applicable.

(3) Develop a farm business plan for the next production cycle in accordance with § 1924.56.

(4) Reach agreement on key management issues. Any such agreements will be documented for the borrower case file and signed by the borrower.

(e) *For all borrowers, the assessment described under this section will be reviewed on at least a semi-annual basis to monitor progress.* The borrower will consult with the Agency official in person, or if that is not possible, by telephone, or in writing. A meeting must be scheduled

as soon as practicable to determine corrective options if: the borrower is, or expects to be, delinquent; the borrower is experiencing difficulties; or other significant changes have occurred. The year-end analysis under this section may be treated as one of the required assessment reviews.

[61 FR 35922, July 9, 1996]

§ 1924.56 Farm business planning.

The automated Farm and Home Plan system is the primary tool used by the Agency to evaluate loan feasibility and prospects for achieving financial viability. Other manual or automated business planning systems may be used with the consent of the Agency.

(a) [Reserved]

(b) *Documentation and revision of plans.* Individuals must submit a farm business plan to the Agency, upon request, for loan approval and servicing purposes. An individual may request the assistance of the Agency official, as needed, in completing the plan. Farm business plans will be based only on accurate, verifiable information. If the Agency official and the individual cannot reach agreement, on the farm business plan, then the Agency will make loan approval and servicing determinations based on the Agency's separate, revised farm business plan. The individual will have the right to appeal any resulting adverse decision.

(1) Historical information will be used as a guide to evaluate the feasibility of projected farm business plans. Individuals must provide the Agency with their previous 5-year production history, if available. Positive and negative trends, mutually agreed upon changes and improvements, and current input prices, will be taken into consideration when arriving at reasonable projections.

(i) For individuals with less than a 5-year history, actual production records from an operation to be taken over by the individual will be considered, whenever available.

(ii) In the absence of the information listed in paragraph (b)(1)(i) of this section, other reliable data sources that may be used include: FSA Farm Programs (formerly Agriculture Stabilization and Conservation Service) actual

§ 1924.57

yield records and county or State averages.

(iii) This paragraph applies when an accurate projection cannot be made because the individual's production history in any or all of the previous 5 years has been substantially affected by a disaster that has been declared by the President or designated by the Secretary of Agriculture. This paragraph also applies to those individuals who would have had a qualifying physical or production loss, as defined in § 1945.154(a), from such a disaster, but who were not located in a designated or declared disaster area.

(A) If the individual's disaster years yields are less than the county average yields, county average yields will be used for those years. If county average yields are not available, State average yields will be used.

(B) In calculating a baseline average yield, the individual may exclude the production year with the lowest actual or county average yield, providing the individual's yields were affected by disasters during at least 2 of the 5 years.

(2) Unit prices for agricultural commodities as published in the State supplement will generally be used. However, regional or county unit prices may be used when there are transportation costs or other significant factors that cause a difference in commodity prices within the State. Individuals who can provide reliable evidence that they will receive a premium price for a commodity will be allowed to use the higher price for farm planning. The determination of disaster years will be based on the 5-year history of disaster declarations or designations for all counties contained in the State supplement.

(3) When the Agency official and individual revise the farm business plan, the plan will be signed and initialed by both parties. Form FmHA 1962-1 (available in any Agency office) will be revised whenever significant changes occur during the year that will affect repayment ability. It is the individual's responsibility to notify the Agency of any necessary changes. If the changes would result in a major change in the operation, a completely new farm business plan must be developed. The individual and Agency official will

7 CFR Ch. XVIII (1-1-00 Edition)

initial and date revisions to the Form FmHA 1962-1.

(4) If the borrower and Agency cannot reach an agreement on revisions to the farm plan and an adverse decision results, the borrower may appeal. During an appeal, the Agency will make releases of normal income security for essential family living and farm operating expenses in accordance with § 1962.17. If the borrower refuses to execute Form FmHA 1962-1 as finally determined by the Agency after an appeal, the account will be serviced under § 1962.18. If the borrower does not appeal, the planned releases documented on Form FmHA 1962-1 are binding.

[61 FR 35923, July 9, 1996]

§ 1924.57 [Reserved]

§ 1924.58 Recordkeeping.

(a) All borrowers must have a recordkeeping system, which must be documented as part of the assessment under § 1924.55.

(b) The selected recordkeeping system must provide information similar to that contained in Forms FmHA 431-2, FmHA 432-1, "Farm Family Record Book," and FmHA 432-2, "Five Year Inventory Record." The recordkeeping system must enable borrowers to make informed management decisions and allow the Agency to render loan making and servicing decisions in accordance with Agency program regulations.

(c) Borrowers must maintain accurate records and submit financial information to the Agency when required. Failure to do so will result in the borrower's ineligibility for future Agency financing and loan servicing and may result in acceleration and collection action.

[61 FR 35924, July 9, 1996]

§ 1924.59 Supervision.

The Agency's supervision is based on the information and evaluation resulting from the assessment of the operation. The borrower is required to:

(a) Cooperate with the Agency and comply with all supervisory agreements, farm plans, and all other loan-related requirements.

(b) Promptly notify the Agency of any significant change in the business

or family expenses or the development of problem situations.

(c) Maintain and protect the collateral for Agency loans and promptly report to the Agency any losses or other significant changes in the collateral.

(d) Complete any training required by § 1924.74.

[61 FR 35924, July 9, 1996]

§ 1924.60 Nonfarm enterprises.

A nonfarm enterprise is any business enterprise which supplements farm income by providing goods or services for which there is a need and a reasonably reliable market. The same general policies covered in this subpart for giving management assistance to an applicant or borrower on farm loans will be followed in dealing with an applicant or borrower on nonfarm enterprise loans. The appropriate plans and record book will be used for the nonfarm enterprise. The borrower responsibilities in § 1924.59(a) also apply to nonfarm enterprises.

[61 FR 35924, July 9, 1996]

§§ 1924.61–1924.73 [Reserved]

§ 1924.74 Borrower Training program.

(a) *Introduction.* (1) Supervised credit includes helping borrowers to develop the skills necessary for successful, efficient production and financial management of a farm business. An effective, formal training program provides a solid foundation on which borrowers can build the skills which will enable them to become efficient, financially sound producers who can obtain commercial financing. The goal of this training is for borrowers to develop and improve the financial and production management skills necessary to successfully operate a farm, build equity in the farm business, and become financially successful to graduate from Agency programs to commercial sources of credit.

(2) The authorities contained in this section require certain Farm Credit Programs borrowers to obtain training in production and financial management concepts. Unless waived, this training will be an eligibility requirement for all Farm Credit Programs direct and guaranteed loans. The train-

ing requirement will also apply to all direct borrowers who receive Primary Loan Servicing actions approved under subpart S of part 1951 of this chapter, with the exception of net recovery buyout offers. Borrowers who do not request new loans or servicing actions will be notified during farm visits and annual analyses of approved courses in their area. Also, a current list of approved courses will be posted in the County Office.

(3) The training will be carried out by public and/or private sector providers of farm management and credit counseling services (including, but not limited to, community colleges, the Extension Service, State Departments of Agriculture, farm management firms, lenders, and similar qualified organizations).

(4) State Directors will enter into agreements with one or more qualified providers in each State to conduct the training.

(b) *Processing*—(1) *Agency review.* The determination of an applicant/borrower's need for enhanced training in production and financial management concepts will be made by the Agency. To make this determination, the Agency will review the case file (in the case of borrowers) and the complete application package for the assistance requested. A decision that the applicant/borrower needs such training cannot be used as a basis for rejecting the request for assistance. In the case of a cooperative, corporation, partnership, or joint operation, any individual member, stockholder, partner, or joint operator holding a majority interest in the entity or who is operating the farm must agree to complete the training on behalf of the entity. However, if one entity member is solely responsible for financial or production management, then only that entity member will be required to complete the training in that area for the entity or qualify for a partial waiver. If the financial and production functions of the farming operation are shared, the knowledge and skills of the individual(s) with the responsibility of production and/or financial management of the operation will be considered in the aggregate for granting a waiver or requiring that training be completed. If a waiver is

not granted, these individuals will be required to complete the training in accordance with their responsibilities for production and/or financial management. This training must be completed within 2 years after "Agreement to Complete Training," is signed if a waiver is not granted. When production training is required, a borrower must complete course work covering production management in crop or livestock enterprises which constitute twenty percent of the projected cash farm income for the coming production cycle, as determined by the Agency. Borrowers who are adding a new enterprise must agree to complete any required production training in that enterprise unless a waiver is granted by the Agency. Borrowers must also complete financial management training unless a waiver has been granted by the Agency.

(i) *Loan applicants.* After the Agency has determined that the applicant meets all eligibility criteria for the type of assistance requested, the Agency will consider the applicant's need for enhanced training in production and financial management concepts. If the Agency determines the applicant is ineligible for assistance, the training requirement will not be considered.

(ii) *Requests for Primary Loan Servicing.* Prior to Agency offer of any Primary Loan Servicing action, the Agency must determine whether the borrower must complete a training program or qualifies for a waiver. This determination should be made after a feasible plan has been developed using consolidation, rescheduling, reamortization, deferral, softwood timber, and/or writedown, but prior to Agency actual offer to restructure the borrower's accounts. This training requirement does not apply to those borrowers offered net recovery buyout or preservation loan servicing. If the borrower must complete a training program, fees will be included in the plan as an operating expense.

(2) *Waivers.* Applicants for loans and Primary Loan Servicing programs may request a waiver from the training requirement by submitting Form FmHA 1924-27, "Request for Waiver of Borrower Training Requirements," with the application for assistance. The

waiver request must include the required documentation and records as specified in paragraphs (b)(2)(i) and (b)(2)(ii) of this section. A waiver is not required for those applicants who have previously received a waiver, or who have previously satisfied the training requirements. The applicant/borrower must meet all training requirements for both production and financial management if no waiver is granted. If the borrower receives a waiver for production training, the requirements for financial management training must still be met. Conversely, if the borrower receives a waiver for financial management training, the requirements for production training must still be met. In the case of entity applicants, only those entity members who hold a majority interest in the operation or who operate the farm must meet the waiver conditions for the entity to qualify for a waiver. However, if one entity member is solely responsible for financial or production management, then only that entity member will be required to complete the training in that area for the entity or qualify for a partial waiver. If the financial and production functions of the farming operation are shared, the knowledge and skills of the individual(s) with the responsibility of production and/or financial management of the operation will be considered in the aggregate for granting a waiver or requiring that training be completed. If a waiver is not granted, these individuals will be required to complete the training in accordance with their responsibilities for production and/or financial management. The Agency may waive the financial and/or production training requirements under the following conditions:

(i) The applicant has successfully completed an equivalent training program. To meet this requirement, the applicant must submit evidence of completion of a production and/or financial management course similar to a course approved under this section. The submission must include a description of the content and subjects covered in the course(s) completed by the applicant or entity members. The submission must also include evidence of

completion, such as a grade report, certificate of completion, or written certification by the course instructor. The program must have covered subject areas in paragraph (d)(3)(iii) of this section. The Agency will review the documentation submitted by the applicant(s) for assistance to determine whether the training completed satisfies the training requirements of this section; or

(ii) The applicant has the experience and/or training which demonstrates the abilities necessary for successful, efficient production as determined by the Agency based on documentation provided by the applicant with the request for the waiver. This documentation must include, at a minimum, the applicant's production records for the past 5 years and a statement explaining how the records demonstrate production ability.

(3) *Notifying applicants/borrowers of the the Agency's decision regarding training.* The applicant/borrower will be informed of the the Agency's decision as follows:

(i) Loan applicants receiving a waiver from the training will be notified in the letter of eligibility, required under § 1910.6 of subpart A of part 1910 of this chapter. Applicants for Primary Loan Servicing actions who are receiving a waiver will be notified through exhibit B or exhibit F to subpart S of part 1951 of this chapter, as appropriate.

(ii) Loan applicants required to complete the training will be notified in the letter of eligibility. Applicants for Primary Loan Servicing actions who are required to complete the training will be notified through exhibit B or exhibit F to subpart S of part 1951 of this chapter, as appropriate. The notification will include the name(s) of the approved vendor(s) in the applicant/borrower's area and the specific courses required. The notification to the applicant/borrower will also include a description of the scoring system to be used to determine if the applicant/borrower has successfully met the training requirements. In both loan making and servicing cases, the decision to require certain training is not appealable. However, the decision is reviewable.

(4) *Notification of applicants determined ineligible for assistance.* In the letter informing them of the Agency's decision, applicants determined ineligible for assistance due to lack of management training and experience will be notified, for their information, of training programs approved under this section. If the ineligible applicant chooses to enroll in a training program, eligibility for future assistance will not be automatic upon completion of the course. Applicants who complete an approved course and later apply for a new loan must still demonstrate that they possess sufficient training and experience to assure reasonable prospects of success and meet other eligibility requirements for the assistance requested.

(5) *Contacting vendor and payment.* Upon receiving the notification of the training requirement, the borrower is responsible for selecting and contacting a vendor(s), and making all arrangements to begin the training. Agency is not a party to fee or other agreements between the borrower and the vendor. Training fees must be included in the plan of operation as a farm operating expense. Payment of training fees is an authorized use of operating loan funds.

(6) *Training agreement.* Prior to closing the loan or Primary Loan Servicing action, the applicant/borrower must sign Form FmHA 1924-23. This agreement will be placed in position 2 of the borrower case file.

(7) *Automated tracking system.* Field offices will process certain data to the automated Finance Office records in order to properly track borrower training-related information. Reference the automated system user manuals for more specific information on this automated tracking system.

(8) *County Office monitoring.* Required training will be included in table C of Form FmHA 431-2. Agency personnel will monitor borrower progress during farm visits and analyses in accordance with this subpart. The County Supervisor will also contact the borrower to follow up on unsatisfactory training progress reports. All contacts with the borrower will be noted in the running case record, together with the topics discussed and agreements reached.

(c) *Vendor's evaluation of borrower progress*—(1) All required training must be completed within 2 years after the borrower signs Form FmHA 1924-23. The County Supervisor may grant a 1-year written extension to the agreement in cases where the borrower demonstrates he/she was unable to complete the training due to circumstances beyond his/her control, such as poor health or discontinuance of the necessary approved courses. Refusal to grant a 1-year extension is not an appealable decision.

(2) The vendor will provide Agency with periodic progress reports. The frequency of these reports will be determined by the State Director. These reports are not intended to reflect a grade or score, but to indicate whether the borrower is attending sessions and honestly endeavoring to complete the training program. Upon completion of the training, the vendor will provide the County Office with an evaluation of the borrower's knowledge of the course material. This evaluation shall specifically address the borrower's improvement toward meeting the goals outlined in this section. The instructor will also assign the borrower a score according to the following criteria:

Score

1. The borrower attended classroom sessions as agreed, satisfactorily completed all assignments, and demonstrated an understanding of the course material.
2. The borrower attended classroom sessions as agreed and attempted to complete all assignments; however, the borrower does not demonstrate an understanding of the course material.
3. The borrower did not attend classroom sessions as agreed and/or did not attempt to complete assignments. In general, the borrower did not make a good faith effort to complete the training.

(i) Borrowers receiving a score of 1 will have met the requirements of the agreement. The accounts of these borrowers will be serviced in accordance with existing regulations.

(ii) Borrowers receiving a score of 2 will have met the requirements of the agreement. However, since these borrowers do not adequately demonstrate an understanding of the course material, the County Supervisor will develop a plan outlining the additional

supervision the borrower will require to accomplish the objectives of Agency assistance, such as recommending further training, more frequent farm visits, or retaining professional services of an accountant, farm management consultant, or similar expert based upon the borrower's abilities.

(iii) Borrowers receiving a score of 3 will not have met the requirements of the agreement for training. Failure to complete the training as agreed will cause the borrower to be ineligible for future Agency benefits including future direct and guaranteed loans, Primary Loan Servicing, Interest Assistance renewals, and restructuring of guaranteed loans.

(d) *Selection and approval of organizations and courses*—(1) *Identification of potential vendors*. Prior to the initial approval of vendors and prior to renewal of approved vendor's training agreements, the State Director or designee shall solicit applications from all interested organizations, keeping in mind its cultural diversity responsibilities. The State Director shall contact the Chief Executive Officer of the State and appropriate officials from the State Department of Agriculture, the State Extension Service, community colleges, and other private or nonprofit organizations which may be interested in conducting this training.

(2) *Application*. The vendor must submit the following items prior to consideration for approval:

(i) A sample of the course materials and a description of the method(s) of training to be used.

(ii) Specific training objectives for each section of the course. These objectives should relate to the general objectives outlined in paragraph (d)(3)(i) of this section.

(iii) A detailed course agenda specifying the topics to be covered, the time to be devoted to each topic, and the number of sessions to be attended.

(iv) A list of instructors and their qualifications, and the criteria by which additional instructors will be selected.

(v) The proposed locations where training will take place. These sites should be within a reasonable commuting distance for borrowers to be served by the vendor.

(vi) Cost per participant and/or cost per organization, *i.e.*, cost for husband/wife joint operation; father/son partnership; or multiple members of a corporation.

(vii) Minimum and/or maximum class size.

(viii) A description of the organization's experience in developing and administering training to farmers.

(ix) A description of the monitoring and/or quality control methods the organization intends to use.

(x) A description of the policy on allowing Agency employees to attend the course for monitoring purposes, *i.e.*, the number of employees authorized to attend; the cost (if any); and the number of classes each employee can attend.

(xi) A description of how the needs of borrowers with physical and/or mental handicaps or learning disabilities will be met.

(xii) A plan of how the needs of borrowers for whom English is not their primary language will be met.

(3) *State Office review and recommendation.* Upon receipt of the application packages from the potential vendors, the State Director will review the material to assure the vendor's proposal meets the following minimum criteria for accomplishment of educational objectives, instructor qualifications, curriculum content, and vendor qualification:

(i) *Educational objectives.* Upon completion of the course, the borrower shall be able to:

(A) Describe the specific goals of the business, describe what changes are required to attain the business goals, and outline how these changes will occur using present and projected enterprise budgets.

(B) Maintain and utilize a financial management information system which includes financial and production records, a household budget, a statement of financial condition, and an accrual adjusted income statement. The borrower shall also be able to use this system when making financial and production decisions.

(C) Understand and utilize an income statement. Specifically, the borrower must understand the structure and major components of an income state-

ment and its role in analyzing the performance of a business, be familiar with the cash and accrual methods of determining net farm income, and understand the relationship between a balance sheet and an income statement.

(D) Understand and utilize a balance sheet. Specifically, the borrower must understand the major components of a balance sheet and its role in analyzing the business, be familiar with the categories of assets and liabilities and be able to provide examples of entries under each, and be familiar with the cost and market methods of valuing assets and liabilities and the advantages of each method.

(E) Understand and utilize a cash flow budget. Specifically, the applicant must be able to explain and justify estimates for production and expenses, and analyze the cash flow to identify potential problems.

(F) Using production records and other production information, be able to identify problems, evaluate alternatives, and make needed corrections to current production practices to achieve greater efficiency and profitability.

(ii) *Instructor qualifications.* Instructor qualifications will be reviewed to assure sufficient knowledge of the material and sufficient experience in adult education. The instructors must have a bachelor's degree or comparable experience in the subject area they will teach and a minimum of three years experience in conducting training courses or teaching. Also, the instructors must successfully complete any instructor training which may be associated with the Agency approved course.

(iii) *Curriculum.* The curriculum shall be reviewed to assure that the following subject matter is sufficiently addressed. A single vendor is not required to provide all the courses necessary to cover the entire curriculum; however, to the extent practicable, all topics must be available for all Agency districts. The State Director shall identify the specific crop or livestock enterprises for which training must be available in a given area or district, and any additional subject matter to be covered for each.

(A) *Business Planning.* The course(s) shall cover the general areas of goal setting, risk management, and planning. Goal setting will include identification of personal and family goals, business goals, and short- and long-term goals. Risk management concepts will include the sources, magnitude and frequency of risk, risk tolerance, risk-taking ability of the business, and strategies for managing risk such as use of credit, marketing, production practices, and insurance. Finally, the course(s) will guide the borrower through the formulation of a long-term business plan for the farm and presentation of this plan to a lender.

(B) *Financial Management Systems.* The course(s) shall cover all aspects of farm accounting, specifically: Instruction in financial record keeping, preparation of a household budget, development and analysis of accrual adjusted income statements, balance sheets, and cash flow budgets. The course(s) shall focus on integrating these elements into a financial management system which enables the borrower to make business decisions based on his/her analysis of financial information.

(C) *Crop Production.* The course(s) shall focus on improving the profitability of the borrower's crop enterprises. Specifically, the course shall address keeping and analyzing production records, identifying problems in current production practices, identifying sources of production information and assistance, and using production information to analyze alternatives and identify the most profitable solution.

(D) *Livestock Production.* The course(s) shall focus on improving the profitability of the borrower's livestock enterprises. Specifically, the course shall address keeping and analyzing production records, identifying problems in current production practices, identifying sources of production information and assistance, and using production information to analyze alternatives and identify the most profitable solution.

(iv) *Vendor.* The proposed vendor of the training must have demonstrated a minimum of three years experience in conducting training courses or teaching the proposed subject matter.

(4) *Approval.* After review of the applications, the State Director shall determine which vendors should be recommended for final approval. Complete application packages from the selected vendors should be submitted to the National Office for concurrence prior to final approval. Applications from accredited colleges (including community colleges) or universities, however, do not require National Office concurrence prior to final approval. If all of the instructors have not been selected at the time of request for approval of the vendor, the vendor may be approved with the condition that instructors will meet the criteria set out in paragraph (d)(3)(ii) of this section. After approval, the State Director and the vendor(s) will sign Form FmHA 1924-24, "Agreement to Conduct Production and Financial Management Training for Farmers Home Administration or its successor agency under Public Law 103-354 Borrowers." This agreement will be valid for three years, unless revoked in writing and giving 30 days notice by the State Director or the vendor. The State Director may revoke the agreement if the vendor does not comply with the responsibilities listed in the agreement. Such revocation is nonappealable. The State Director will issue a State supplement to this subpart listing the approved vendor(s), the contact person for the vendor, the terms of the vendor agreements, and the subject matter in which each vendor is approved to conduct training.

(5) *Renewals.* Renewal of agreements to conduct training will not be automatic. The vendor must request renewal in writing, provide updates to any changes in curricula, and provide information which indicates the training provided by the vendor is effective. Such information may include course evaluations, test scores, or statistics on the improvement of borrowers who have completed the course. The State Director must obtain National Office concurrence on any decisions to deny renewal of a vendor's agreement. A decision to deny renewal of a vendor's agreement is nonappealable.

(e) *Vendor monitoring.* An operational file will be maintained in the State Office for each approved vendor. This file

RHS, RBS, RUS, FSA, USDA

will include the application, National Office concurrence (if required), the signed Form FmHA 1924-24, documentation of Agency monitoring of the vendor, and any further documentation to determine the success of the vendor's program. To assure the training organization is correctly and effectively implementing the training as proposed, the State Director or designee will be responsible for monitoring the vendor. This monitoring shall, as a minimum, consist of:

(1) Attendance at selected training sessions for each vendor to verify that the agreed-upon subject matter is being covered in sufficient detail and to assess the effectiveness of the training provided by the instructors.

(2) Review of course and instructor evaluations. Course and instructor evaluations will be completed by the borrowers on Form FmHA 1924-22, "Borrower Training Course Evaluation." This form will be provided to the borrowers by the instructor as they complete the course. The evaluations will be forwarded to the State Director for review. The results will be summarized and made part of the operational file on each vendor.

(3) Monitoring of borrowers' improvement upon completion of a course. The State Director will analyze statistics regarding borrower performance, such as the graduation and delinquency of borrowers who have completed the required training course.

**EXHIBIT A TO SUBPART B—LETTER TO
BORROWER REGARDING RELEASES OF
FARM INCOME TO PAY FAMILY LIV-
ING AND FARM OPERATING EXPENSES**

**UNITED STATES DEPARTMENT OF
AGRICULTURE**

Farmers Home Administration or its
successor agency under Public Law 103-354

(Insert Address)

(Date)

Borrower's Name)

(Address)

Dear _____:

Public Law 100-233 requires the Agency to notify you that you are entitled to have Agency release proceeds from the sale of crops, livestock, and livestock products planned to be marketed in the regular course of business including ASCS and CCC payments, so that you can pay essential family living and farm operating expenses. The releases will continue until such time as your account should become in default and Agency has to accelerate your account.

To provide these releases to you, Agency regulations require that you fill out Form FmHA 1962-1 to explain what items of Agency security you intend to sell during this crop year. Please see attachment 1 of this letter for an explanation of this form. We request that you contact this office within 10 days of when you receive this letter so that we can complete this form and you can receive releases on a timely basis.

Sincerely,

County Supervisor

ATTACHMENT 1 TO EXHIBIT A

Periodically, you will be asked to complete Form FmHA 1962-1, "Agreement for the Use of Proceeds/Release of Chattel Security," which will document the agreement between you and the Agency as to how proceeds from the sale of chattel property which serves as security for your Agency loans will be released. You will also need to list those buyers to whom you plan to sell your farm products. This plan will give you and the Agency a clear idea of what income you expect from your operation and how those proceeds will be used. The plan will set forth the amount of money required for paying essential family living, farm operating expenses, and debt service payments. You and the Agency must agree on how much money will be released

§ 1924.101

from your crop proceeds. Such releases must be in accordance with Agency regulations.

If the County Supervisor is unable to agree with and approve your plan for the use of the sales proceeds, you will receive a letter explaining why the County Supervisor is unable to approve your plan and how you may appeal the County Supervisor's decision. While an appeal is pending, Agency will release sales proceeds to be used to pay essential family living and farm operation expenses.

Once a plan has been agreed on, it is important that you abide by the plan. The plan can always be revised or changed, as circumstances require, provided you and Agency can agree to the revisions.

Planned sales can be listed by month, by quarter or by whatever period suits your operation the best. The form does not have to be completed to show each individual animal, bushel, bale, etc. The form is a plan: it contains only projections. We expect your projections to be realistic and based on your past experience, but we know that you cannot predict exactly how many bushels per acre you will harvest, exactly how many animals you will wean, etc. We also realize that you cannot predict prices to the penny. Sometimes you will have a buyer for your products who is not listed on the form. All we expect of you is to be as accurate as you can. Later, if the plan needs to be changed, you and the County Supervisor can work together to revise it. Many revisions can be agreed on over the telephone and a trip to the County Office is not always needed. You are not required to check with Agency before making a sale just because the price you expected to receive is different from what you had planned to receive. However, a difference in price might require your plan to be revised, so Agency wants to be told about the difference as soon as possible after the sale is made. you are expected to obtain Agency approval before making a major change in your operation or before you use sale proceeds in a way different than you agreed to.

If at all possible, you should let Agency know if you are going to sell to a buyer who is not listed on the form. The attached chart gives certain examples when you must get prior consent from the Agency and when you may advise Agency after the sales of your farm products.

7 CFR Ch. XVIII (1-1-00 Edition)

WHAT TO DO IF YOU WANT TO TAKE ACTIONS THAT ARE DIFFERENT THAN WHAT IS LISTED ON YOUR FORM FMHA 1962-1

| Get prior consent | Give notice afterwards |

[53 FR 35679, Sept. 14, 1988, as amended at 56 FR 15821, Apr. 18, 1991; 61 FR 35924, July 9, 1996]

Subpart C—Planning and Performing Site Development Work

SOURCE: 60 FR 24543, May 9, 1995, unless otherwise noted.

EDITORIAL NOTE: Nomenclature changes appear at 61 FR 2899, Jan. 30, 1996.

§ 1924.101 Purpose.

This subpart establishes the basic Rural Housing Service (RHS) policies for planning and performing site development work. It also provides the procedures and guidelines for preparing site development plans consistent with Federal laws, regulations, and Executive Orders.

§ 1924.102 General policy.

(a) *Rural development.* This subpart provides for the development of building sites and related facilities in rural areas. It is designed to:

(1) Recognize community needs and desires in local planning, control, and development.

(2) Recognize standards for building-site design which encourage and lead to the development of economically stable communities, and the creation of attractive, healthy, and permanent living environments.

(3) Encourage improvements planned for the site to be the most cost-effective of the practicable alternatives. Encourage utilities and services utilized to be reliable, efficient, and available at reasonable costs.

(4) Provide for a planning process that will consider impacts on the environment and existing development in order to formulate actions that protect, enhance, and restore environmental quality.

(5) No site will be approved unless it meets the requirements of this part and all state and local permits and approvals in connection with the proposed development have been obtained.

(b) *Subdivisions.* RHS does not review or approve subdivisions. Each site approved by RHS must meet the requirements of §1924.115, on a site by site basis.

(c) *Development related costs.* (1) *Applicant.* The applicant is responsible for all costs incurred before loan or grant closing associated with planning, technical services, and actual construction. These costs may be included in the loan or grant as authorized by RHS regulations.

(2) *Developer.* The developer is responsible for payment of all costs associated with development.

§ 1924.103 Scope.

This subpart provides supplemental requirements for Rural Rental Housing (RRH) loans, Rural Cooperative Housing (RCH) loans, Farm Labor Housing (LH) loans and grants, and Rural Housing Site (RHS) loans. It also provides a site development standard, as indicated in exhibit B of FmHA Instruction 1924-C (available in any RHS field office), which supplements this subpart

to provide the minimum for the acceptability of development. All of this subpart applies to Single Family Housing unless otherwise noted. All of this subpart also applies to Multiple Family Housing except §§1924.115 and 1924.120, and any paragraph specifically designated for Single Family Housing only. In addition, RHS will consult with appropriate Federal, state, and local agencies, other organizations, and individuals to implement the provisions of this subpart.

§ 1924.104 Definitions.

As used in this subpart:

Applicant. Any person, partnership, limited partnership, trust, consumer cooperative, corporation, public body, or association that has filed a preapplication, or in the case of RHS programs that do not require a preapplication, an official application, with RHS in anticipation of receiving or utilizing RHS financial assistance.

Community. A community includes cities, towns, boroughs, villages, and unincorporated places which have the characteristics of incorporated areas with support services such as shopping, post office, schools, central sewer and water facilities, police and fire protection, hospitals, medical and pharmaceutical facilities, etc., and are easily identifiable as established concentrations of inhabited dwellings and private and public buildings.

Developer. Any person, partnership, public body, or corporation who is involved with the development of a site which will be financed by RHS.

Development. The act of building structures and installing site improvements on an individual dwelling site, a subdivision, or a multiple family tract.

Multiple Family Housing. RHS RRH loans, RCH loans, LH loans and grants, and RHS loans.

Single Family Housing. RHS Rural Housing loans for individuals for construction of, repair of, or purchase of a dwelling to be occupied by one household.

Site. A parcel of land proposed as a dwelling site, with or without development.

Site approval official. The RHS making the determination that a site meets the requirements in this subpart to be

acceptable for site loans. (See § 1924.120.)

Street surfaces. Streets may be hard or all-weather surfaced.

(1) *Hard surface*—a street with a portland cement concrete, asphaltic concrete, or bituminous wearing surface or other hard surfaces which are acceptable and suitable to the local public body for use with local climate, soil, gradient, and volume and character of traffic.

(2) *All-weather*—a street that can be used year-round with a minimum of maintenance, such as the use of a grader and minor application of surface material, and is acceptable and suitable to the local public body for use with local climate, soil, gradient, and volume and character of traffic.

Subdivision. Five or more contiguous (developed or undeveloped) lots or building sites. Subdivisions may be new or existing.

§ 1924.105 Planning/performing development.

(a) *General.* Planning is an evaluation of specific development for a specific site. Planning must take into consideration topography, soils, climate, adjacent land use, environmental impacts, energy efficiency, local economy, aesthetic and cultural values, public and private services, housing and social conditions, and a degree of flexibility to accommodate changing demands. All planning and performing development work is the responsibility of the applicant or developer. All development will be arranged and completed according to applicable local, state, or Federal regulations including applicable health and safety standards, environmental requirements, and requirements of this subpart. When a public authority requires inspections prior to final acceptance, written assurance by the responsible public authority of compliance with local, city, county, state or other public codes, regulations, and ordinances is required prior to final acceptance by RHS.

(1) [Reserved]

(2) *Technical Services.* [Reserved]

(i) [Reserved]

(ii) An applicant or developer for a Multiple Family Housing project or a Single Family Housing site which re-

quires technical services under § 1924.13(a), must contract for the technical services of an architect, engineer, land surveyor, landscape architect, or site planner, as appropriate, to provide complete planning, drawings, and specifications. Such services may be provided by the applicant's or developer's "in house" staff subject to RHS concurrence. Technical services must be performed by professionals who are qualified and authorized to provide such services in the state in which the project would be developed. All technical services must be provided in accordance with the requirements of professional registration or licensing boards. At completion of all construction or completion of a phase or phases of the total project, the persons providing technical services under this section must notify the RHS field office in writing that all work has been completed in substantial conformance with the approved plans and specifications.

(iii) For developments not specifically required to have technical services under paragraph (a)(2)(ii) of this section, such services may be required by the state director when construction of streets or installation of utilities is involved.

(3) *Drawings, specifications, contract documents, and other documentations.* Adequate drawings and specifications must be provided by the applicant or developer to RHS in sufficient detail to fully and accurately describe the proposed development. Contract documents must be prepared in accordance with § 1924.6 or, in the case of more complex construction, § 1924.13.

(b) *Single Family Housing.* Proposals for development of individual dwelling sites must meet the following requirements:

(1) *Site development design requirements.* Exhibit B (available in any RHS field office) will be used as a minimum by applicants or developers in preparing proposals and supporting documents for Single Family Housing loans, in addition to specific requirements made in this subpart.

(2) [Reserved]

(c) *Multiple Family Housing.* Exhibit C (available in any RHS office) should be

used as a guide by the applicant or developer in preparing a proposal and supporting documents for multiple family housing projects.

§ 1924.106 Location.

(a) *General.* It is RHS's policy to promote compact community development and not to approve sites located in floodplains, on wetlands, or on important farmlands, unless there is no practical alternative. Furthermore, RHS will not finance development on locations that adversely affect properties which are listed or are eligible for listing on the National Register of Historic Places, located within the Coastal Barrier Resource System, or on a barrier island. (Environmental requirements are found in 7 CFR part 1940, subpart G.) In order to be eligible for RHS participation:

(1) The site must be located in an eligible area as defined in the program regulations under which the development is being funded or approved.

(2) The site must comply with the applicable environmental laws, regulations, Executive Orders, and subpart G of part 1940.

(b) *Single Family Housing.* In addition to the general requirements in paragraph (a) of this section, sites must provide a desirable, safe, functional, convenient, and attractive living environment for the residents.

(c) *Multiple Family Housing.* Multiple family housing projects shall be located in accordance with the requirements in paragraph (r) of § 1944.215. Locating sites in less than desirable locations of the community because they are in close proximity to undesirable influences such as high activity railroad tracks; adjacent to or behind industrial sites; bordering sites or structures which are not decent, safe, or sanitary; or bordering sites which have potential environmental concerns such as processing plants, etc., is not acceptable. Screening such sites does not make them acceptable. Sites which are not an integral part of a residential community and do not have a reasonable access, either by location or terrain, to essential community facilities such as water, sewerage, schools, shopping, employment opportunities, medical facilities, etc., are not acceptable.

§ 1924.107 Utilities.

All development under this subpart must have adequate, economic, safe, energy efficient, dependable utilities with sufficient easements for installation and maintenance.

(a) *Water and wastewater disposal systems.* (1) *Single Family Housing.* If sites are served by central water or sewer systems, the systems must meet the requirements of paragraphs (a)(2) (i) and (ii) of this section. If sites have individual water or sewer systems, they must meet the requirements of the state department of health or other comparable reviewing and regulatory authority and the minimum requirements of exhibit B (available in any RHS field office), paragraphs V and VI. Sites in subdivisions of more than 25 dwelling units on individual systems, or sites that do not meet the requirements of exhibit B, paragraphs V and VI, must have state director concurrence.

(2) *Multiple Family Housing.* Proposals processed under this paragraph shall be served by centrally owned and operated water and wastewater disposal systems unless this is determined by RHS to be economically or environmentally not feasible. All central systems, whether they are public, community, or private, shall meet the design requirements of the state department of health or other comparable reviewing and regulatory authority. The regulatory authority will verify in writing that the water and wastewater systems are in compliance with the current provisions of the Safe Drinking Water Act and the Clean Water Act, respectively.

(i) Sites which are not presently served by a central system, but are scheduled for tie-in to the central system within 2 years, should have all lines installed during the initial construction. Such sites must have an approved interim water supply or wastewater disposal system installed capable of satisfactory service until the scheduled tie-in occurs.

(ii) In addition to written assurance of compliance with state and local requirements, there must be assurance of continuous service at reasonable rates for central water and wastewater disposal systems. Public ownership is preferred whenever possible. In cases

where interim facilities are installed pending extension or construction of permanent public services, the developer must assume responsibility for the operation and maintenance of the interim facility or establish an entity for its operation and maintenance which is acceptable to the local governing body. If a system is not or will not be publicly owned and operated, it must comply with one of the following:

(A) Be an organization that meets the ownership and operating requirements for a water or wastewater disposal system that RHS could finance under 7 CFR part 1942, subpart A or be dedicated to and accepted by such an organization.

(B) Be an organization or individual that meets other acceptable methods of ownership and operation as outlined in HUD Handbook 4075.12, "Ownership and Organization of Central Water and Sewerage Systems." RHS should be assured that the organization has the right, in its sole discretion, to enforce the obligation of the operator of the water and sewerage systems to provide satisfactory continuous service at reasonable rates.

(C) Be adequately controlled as to rates and services by a public body (unit of Government or public services commission).

(iii) Multiple family developments of more than 25 units with individual system must have national office concurrence.

(A) [Reserved]

(B) Supporting information for the proposed individual water systems, covering the following points:

(1) In areas where difficulty is anticipated in developing an acceptable water supply, the availability of a water supply will be determined before closing the loan.

(2) Documentation must be provided that the quality of the supply meets the chemical, physical, and bacteriological standards of the regulatory authority having jurisdiction. The maximum contaminant levels of U.S. EPA shall apply. Individual water systems must be tested for quantity and bacteriological quality. Where problems are anticipated with chemical quality, chemical tests may be required. Chemical tests would be limited to analysis

for the defects common to the area such as iron and manganese, hardness, nitrates, pH, turbidity, color, or other undesirable elements. Polluted or contaminated water supplies are unacceptable. In all cases, assurance of a potable water supply before loan closing is required.

(C) Supporting information for individual wastewater disposal systems with subsurface discharge provided by a soil scientist, geologist, soils engineer, or other person recognized by the local regulatory authority. This data must include the following:

(1) Assurance of nonpollution of ground water. The local regulatory authority having jurisdiction must be consulted to ensure that installation of individual wastewater systems will not pollute ground water sources or create other health hazards or otherwise violate State water quality standards.

(2) Records of percolation tests. Guidance for performing these tests is included in the EPA design manual, "On-site Wastewater Treatment and Disposal Systems" and the minimum RHS requirements are in exhibit B, paragraph VI. (These may be waived by the state director when the state has established other acceptable means for allowing onsite disposal.)

(3) Determination of soil types and description. The assistance of the SCS or other qualified persons should be obtained for soil type determination and a copy of its recommendations included in the documentation.

(4) Description of ground water elevations, showing seasonal variations.

(5) Confirmation of space allowances. An accurate drawing to indicate that there is adequate space available to satisfactorily locate the individual water and wastewater disposal systems; likewise, documented assurance of compliance with all local requirements. Structures served by wastewater disposal systems with subsurface discharge require larger sites than those structures served by another type system.

(6) Description of exploratory pit observations, if available.

(D) Supporting information for individual wastewater disposal systems with surface discharge covering the following points:

(1) Effluent standards issued by the appropriate regulatory agency that controls the discharge of the proposed individual systems. Assurance from this regulatory agency that the effluent standards will not be exceeded by the individual systems being proposed must be included.

(2) Program of maintenance, parts, and service available to the system-owner for upkeep of the system.

(3) A plan for local inspection of the system by a responsible agency with the authority to ensure compliance with health and safety standards.

(b) *Electric service.* The power supplier will be consulted by the applicant to assure that there is adequate service available to meet the needs of the proposed site. Underground service is preferred.

(c) *Gas service.* Gas distribution facilities, if provided, will be installed according to local requirements where adequate and dependable gas service is available.

(d) *Other utilities.* Other utilities, if available, will be installed according to local requirements.

§ 1924.108 Grading and drainage.

(a) *General.* Soil and geologic conditions must be suitable for the type of construction proposed. In questionable or unsurveyed areas, the applicant or developer will provide an engineering report with supporting data sufficient to identify all pertinent subsurface conditions which could adversely affect the structure and show proposed solutions. Grading will promote drainage of surface water away from buildings and foundations, minimize earth settlement and erosion, and assure that drainage from adjacent properties onto the development or from the development to adjacent properties does not create a health hazard or other undesirable conditions. Grading and drainage will comply with exhibit B, paragraphs III and IV, of this subpart.

(b) *Cuts and fills.* Development requiring extensive earthwork, cuts and fills of 4 feet or more shall be designed by a professional engineer. Where topography requires fills or extensive earthwork that must support structures and building foundations, these must be controlled fills designed, su-

pervised, and tested by a qualified soils engineer.

(c) *Slope protection.* All slopes must be protected from erosion by planting or other means. Slopes may require temporary cover if exposed for long periods during construction.

(d) *Storm water systems.* The design of storm water systems must consider convenience and property protection both at the individual site level and the drainage basin level. Storm water systems should be compatible with the natural features of the site. In areas with inadequate drainage systems, permanent or temporary storm water storage shall be an integral part of the overall development plan. Design of these facilities shall consider safety, appearance, and economical maintenance operations.

§§ 1924.109–1924.114 [Reserved]

§ 1924.115 Single Family Housing site evaluation.

(a) *Site review.* The site approval official will evaluate each site (developed or undeveloped) to determine acceptance for the program. Information on the site will be provided by the appraiser or site approval official on a form provided by RHS and available in any RHS field office.

(b) *Site access.* Each site must be contiguous to and have direct access from:

(1) A hard surfaced or all weather road which is developed in full compliance with public body requirements, is dedicated for public use, and is being maintained by a public body or a home owners association that has demonstrated its ability or can clearly demonstrate its ability to maintain the street; or

(2) An all weather extended driveway which can serve no more than two sites connecting to a hard surface or all weather street or road that meets the requirements of paragraph (b)(1); or

(3) A hard surfaced street in a condominium or townhouse complex which:

(i) Is owned in common by the members or a member association and is maintained by a member association that has demonstrated its ability or can clearly demonstrate its ability to maintain the street; and

(ii) Connects to a publicly owned and dedicated street or road.

(c) *Exceptions to street requirements.* A site not meeting the conditions in paragraph (b) of this section will be acceptable if:

(1) The applicant is a builder for a conditional commitment (a loan will not be approved until the site meets the conditions in paragraph (b) of this section), or the builder posts an irrevocable performance and payment bond (or similar acceptable assurance) that assures the site approval official that the site will be developed to meet the conditions in paragraph (b) of this section; or

(2) The site is recommended by the site approval official and approved by the state director. A request for state director approval must justify that it is in the best interest of both the government and the applicant to approve the site.

(d) *Site layout.* (1) Sites shall be surveyed and platted. Permanent markers shall be placed at all corners.

(2) Sites shall meet all requirements of state and local entities and RHS.

(e) *Covenants, conditions and restrictions.* Sites in subdivisions shall be protected by covenants, conditions, and restrictions (CC&Rs) to preserve the character, value, and amenities of the residential community and to avoid or mitigate potential environmental impacts unless, an exception is granted by RHS after considering the suitability of local ordinances, zoning, and other land use controls.

(1) CC&Rs shall be recorded in the public land records and specifically referenced in each deed.

(2) The intent of the CC&Rs is to assure the developers that the purchasers will use the land in conformance with the planned objectives for the community. In addition, the CC&Rs should assure the purchasers that the land covered by the CC&Rs will be used as planned and that other purchasers will use and maintain the land as planned to prevent changes in the character of the neighborhood that would adversely impact values or create a nuisance.

§§ 1924.116–1924.118 [Reserved]

§ 1924.119 Site Loans.

Subdivisions approved under subpart G of part 1822 (FmHA Instruction 444.8) or exhibit F of subpart I of part 1944 (available in any RHS field office), will meet the general requirements of this subpart to insure lots in the subdivision will meet the requirements of § 1924.115.

§§ 1924.120–1924.121 [Reserved]

§ 1924.122 Exception authority.

The Administrator of RHS may in individual cases, make an exception to any requirement or provision of this subpart or address any omission of this subpart which is not inconsistent with the authorizing statute or other applicable law if the Administrator determines that application of the requirement or provision would adversely affect the Government's interest. The Administrator will exercise this authority upon the written request of the state director or the appropriate program assistant administrator. Requests for exceptions must be supported with documentation to explain the adverse effect on the Government, proposed alternative courses of action, and show how the adverse effect will be eliminated or minimized if the exception is granted.

§§ 1924.123–1924.149 [Reserved]

§ 1924.150 OMB Control Number.

The reporting requirements contained in this subpart have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575-0164. Public reporting burden for this collection of information is estimated to vary from 5 minutes to 10 minutes per response, with an average of .13 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this

RHS, RBS, RUS, FSA, USDA

burden to the Department of Agriculture, Clearance Officer, OIRM, Ag Box 7630, Washington, DC 20250; and to the Office of Management and Budget, Paperwork Reduction Project (OMB #0575-0164), Washington, DC 20503.

EXHIBIT A TO SUBPART C [RESERVED]

EXHIBIT B TO SUBPART C—SITE DEVELOPMENT DESIGN REQUIREMENTS

This exhibit prescribes site development requirements to be used in developing residential sites in all housing programs. These requirements cover only those areas which involve health and safety concerns. They are not intended to cover all aspects of site development. Applicants and developers are expected to follow local practice, as a minimum, in all areas of site development not addressed in this exhibit. When State, local, or other requirements are applicable in addition to FmHA or its successor agency under Public Law 103-354's requirements, the most stringent requirement shall apply.

Proper integration of the natural features of a site with the manmade improvements is one of the most critical aspects of residential development. Poor site planning in large scale subdivisions, rental projects and individual sites, has resulted in a loss of valuable private and public natural resources and caused economic burdens and conditions unsuitable for healthy and pleasant living. Proper site design can preserve desirable natural features of the site, minimize expenses for streets and utilities, and provide a safe and pleasant living environment.

 - 2. Design

I. Streets

A. *Types*—1. *Collector streets*. Collector streets are feeder streets which carry traffic from local streets to the major system of arterial streets and highways. They include the principal entrance streets of residential developments and streets for circulation within such developments.

2. *Local streets*. Local streets are minor streets used primarily for access to abutting properties. These include drives serving multi-family housing units.

B. *Design Features*—1. *Emergency Access*. Access for fire equipment and other emergency vehicles shall be within 100 feet of main building entrances.

2. *Cul-de-sacs.* Cul-de-sac streets shall have a turn-around with an outside roadway diameter of at least 80 feet, and a right-of-way diameter of at least 100 feet.

3. *Intersection Angle.* Streets shall be laid out to intersect as nearly as possible at right

angles and no street shall intersect any other street at an angle less than 75 degrees. Curb radii shall be a minimum of 20 feet for street intersections.

4. *Intersection Sight Distance.* Adequate distances must be maintained at intersections. Vehicles must be visible when within 75 feet of the centerlines of uncontrolled intersecting streets.

C. *Street Geometry*—1. *Definitions.* The definitions in Sections I.C.1.a and I.C.1.b. apply to the requirements in Section I.C.2.

a. *Terrain Classifications.*

- (1) Ordinary—Slope less than 8%.
- (2) Rolling—Slope range of 8% to 15%.
- (3) Hilly—Slope greater than 15%.

b. *Development Density* (Number of Lots). (Land Area minus Undeveloped Areas greater than Average Lot Size)

- (1) Low—Less than 2 lots per acre.
- (2) Medium—2 to 6.0 lots per acre.
- (3) High—More than six lots per acre.

2. *Design Requirements.* Collector streets and local streets shall comply with the requirements in tables 1 and 2 unless an exception is granted by the State Director. These requirements may need modification in localities having winter icing conditions.

TABLE 1—PAVEMENT WIDTHS (FEET)

| Street type | On-street parallel parking | Development density | | |
|-----------------|--------------------------------------|---------------------|--------|------|
| | | Low | Medium | High |
| Collector | Prohibited | 26 | 32 | 36 |
| Collector | No Restrictions | 36 | 36 | 40 |
| Local | Prohibited | 18 | 18 | 20 |
| Local | Partial, One Side ¹ | 18 | 20 | 26 |
| Local | Partial, One Side ¹ | 22 | 26 | 32 |
| Local | Total, One Side ² | 22 | 26 | 26 |
| Local | Total, Both Sides ² | 26 | 32 | 36 |

(1) At least one parking space per dwelling is provided off-street.

(2) No parking spaces are provided off-street.

TABLE 2—STREET DESIGN (FEET)

| | Terrain | | |
|--|----------|---------|-------|
| | Ordinary | Rolling | Hilly |
| (1) <i>Collector street:</i> | | | |
| (a) Minimum centerline radius of curvature | 300 | 225 | 150 |
| (b) Minimum sight distance | 250 | 200 | 150 |
| (c) Minimum right-of-way width | 60 | 60 | 60 |
| (2) <i>Local Street:</i> | | | |
| (a) Minimum centerline radius of curvature | 200 | 150 | 100 |
| (b) Minimum sight distance | 200 | 150 | 100 |

TABLE 2—STREET DESIGN (FEET)—Continued

| | Terrain | | |
|---|----------|---------|-------|
| | Ordinary | Rolling | Hilly |
| (c) Minimum right-of-way width ¹ | 50 | 50 | 50 |

(¹) For cul-de-sac streets, the minimum right-of-way width is 40 feet.

D. *Construction.* Street configuration and wearing surfaces must provide safe and economical access to all building sites. The design and construction of the street shall be appropriate for all anticipated traffic, climatic and soil conditions. Streets shall meet or exceed all local, county, and State requirements.

II. Walks and Steps

A. *Walks.* Where walks are provided, they shall be located to assure a minimum vertical clearance of 7 feet from all permanent or temporary obstructions. Walks shall have a slip resistant surface.

B. *Exterior Steps Not Contiguous to Dwelling or Building—1. Flight.* a. Single steps or flights of steps exceeding a vertical height of 12 feet shall not be accepted.

b. Steps shall be set back from an intersecting walk or drive a minimum of 1 foot at a retaining wall and 2 feet at slopes.

2. *Risers and Treads.* a. Risers shall be a maximum of 6 inches, a minimum of 3 inches and uniform throughout the flight.

b. Treads shall be a minimum of 12 inches and uniform throughout the flight.

c. Treads shall have a slip resistant surface.

d. Treads shall be pitched appropriately to ensure drainage.

3. *Landings.* a. Minimum length shall equal 3 feet or walk width whichever is greater.

b. A change in direction in a flight of stairs shall be accomplished only at a landing or by

a winder which has a tread width at a point 18 inches from the converging end, equal to the full straight stair tread width.

4. *Handrails.* Stairways having a flight rise exceeding 30 inches shall have a 36 inch high handrail located on one side for stairs 5 feet or less in width and on both sides of stairways over 5 feet wide.

III. Grading

A. *Compaction.* All fill for street or home construction shall have compaction of not less than 95 percent maximum density, as determined by proctor or other accepted testing methods. Maximum thickness of compaction layers shall be 6 inches except where compaction equipment of demonstrated capability is used under the direction of a qualified soils engineer. Earth fill used to support a building foundation shall be a controlled fill which is designed, supervised, and tested by a qualified soils engineer in accordance with good practice.

B. *Gradients.* Grading design shall be arranged to assure safe and convenient all-weather pedestrian and vehicular access to residential buildings and to all other necessary site facilities. Site grading shall be designed to establish building floor elevations and ground surface grades which allow drainage of surface water away from buildings and adjacent sites. Grading design shall conform with tables 3 and 4.

TABLE 3—ACCESS AND PARKING GRADIENTS¹
[In percent]

| | Minimum | | Maximum | |
|--|-------------|----------------------|-------------|----------------------|
| | Center line | Crown or cross slope | Center line | Crown or cross slope |
| Streets | 0.5 | 1.0 | 14.0 | 5.0 |
| Street Intersections | 0.5 | 1.0 | 25.0 | 5.0 |
| Driveways (³) | .05 | 1.0 | 14.0 | 5.0 |
| Sidewalks (⁴): | | | | |
| Concrete | | 0.5 | | |
| Bituminous | | 1.0 | | |
| Building Entrances & Short Walks | 1.0 | | 12.0 | 5.0 |
| Main Walks | 0.5 | | 10.0 | 5.0 |
| Adjoining Steps | | | 2.0 | |
| Landings | | 1.0 | | |
| Stepped Ramp Treads | 1.0 | | 2.0 | 5.0 |
| Parking | | 0.5 | 5.0 | 5.0 |

¹ Approximate Equivalents .5%=1/16" ft., 1.0%=1/8" ft., 2.0%=1/4" ft., 5.0%=5/8" ft., 10.0%=1 1/4" ft., 12.0%=1 1/2" ft., 21%=2 5/8" ft.

² Grades approaching intersections shall not exceed 5 percent for a distance of not less than 100 feet from the centerline of the intersection.

³Vertical transitions shall percent contact of car undercarriage of bumper with driveway surface.

⁴Five percent maximum for major use by elderly tenants.

TABLE 4—SLOPE GRADIENTS ¹
[In percent]

| | Minimum | Maximum |
|--|------------------|-------------------|
| Slope Away From Foundations: | | |
| Pervious Surfaces | ² 5.0 | ³ 21.0 |
| Impervious Surfaces | ² 1.0 | 21.0 |
| Pervious Surfaces: | | |
| Ground Frost Area | 2.0 | |
| Non-Ground Frost Areas | ⁴ 1.0 | |
| Impervious Surfaces | 0.5 | |
| Slopes to be maintained by Machine | | ³ 33.0 |

¹ See table 3, footnote (1).

² Minimum length of 10 feet or as limited by property lines.

³ Minimum length of 4 feet.

⁴ The minimum is 2.0% if the annual precipitation is more than 50 inches.

IV. Drainage

A. *General*—1. *Collection and Disposal*. Surface and subsurface drainage systems shall be provided, as appropriate, for collection and disposal of storm drainage and subsurface water. These systems shall provide for the safety and convenience of occupants. They shall protect dwellings, other improvements and useable lot areas from water damage, flooding, and erosion.

2. *Concentrated Flow*. Where storm drainage flow is concentrated, permanently maintained facilities shall be provided to prevent significant erosion and other damage or flooding on site or on adjacent properties.

B. *Drainage Design and Flood Hazard Exposure*—1. *Storm Frequency*. Drainage facilities shall be designed for a 10 year storm frequency of 24-hour duration. Full potential development of all contributing areas shall be used as a basis for this determination.

2. *Street Drainage*. Streets shall be useable during runoff equivalent to a 10-year return frequency. Where drainage outfall is inadequate to prevent runoff equivalent to a 10-year return frequency from ponding over 6 inches deep, streets shall be made passable for local commonly used emergency vehicles during runoff equivalent to a 25-year return frequency except where an alternative access street not subject to such ponding is available.

3. *Foundation Drainage*. Appropriate crawl space and foundation drainage shall be provided for the removal of subsurface moisture.

C. *Primary Storm Sewer*—1. *Pipe Size*. Pipe size for the primary storm sewer (any storm sewer or inlet lateral located in a street or other public right-of-way) shall have an inside diameter based on design analysis but not less than 15 inches. Where anticipated runoff from the five-year return frequency rainfall will not fill a 15 inch pipe, a primary storm sewer system usually is unnecessary.

2. *Minimum Gradient*. Minimum gradient shall be selected to provide for self-scouring

of the conduit under low-flow conditions and for removal of sediments foreseeable from the drainage area.

3. *Easements*. Easements for storm sewers shall be a minimum of 10 feet in width.

D. *Drainage Swals and Gutters*—1. *Design*. Paved gutters shall have a minimum grade of 0.5 percent. Paved gutters and unpaved drainage swales shall have adequate depth and width to accommodate the maximum foreseeable runoff without overflow. Swales and gutters shall be seeded, sodded, sprigged or paved as appropriate to minimize potential erosion. Side slopes shall be no steeper than 2:1.

2. *Easements*. Surface channels shall have an easement which is at least the width of the channel plus 10 feet.

E. *Downspouts*—1. *Outfall*. Where downspouts are provided, they shall either be connected to an available storm sewer, provided with suitable splash blocks, or empty at acceptable locations onto paved areas so that water drains away from buildings. Downspouts shall not connect to sanitary sewers.

2. *Piped Drainage*. Piped roof drainage from buildings shall be connected to available storm sewers or empty at locations where no erosion or other damage will be caused.

F. *Storm Inlets and Catch Basins*—1. *Openings*. Where inlets are accessible to small children, openings shall have one dimension limited to 6 inch access. Inlet openings in paved areas shall be designed to avoid entrapment or impedence of bicycles, baby carriages, etc.

2. *Access*. Access for cleaning shall be provided to all inlet boxes and catch basins.

G. *Drywells*—Drywells for the disposal of water from foundation drains, crawl spaces, and other small quantity sources shall be permissible where the bottom of drywells project into strata of undistributed porous soil at a level where the bottom of the drywell will be above the ground water table at its highest seasonal elevation.

V. Water Supply Systems

A. *Individual Water Systems*—1. *General.* a. In this subpart, an individual water system is a system which serves fewer customers or connections than the lower threshold for community systems stated in the Safe Drinking Water Act.

b. The system for an individual household should be capable of delivering a sustained flow of 5 gpm. A system supplying water to multiple household shall be designed by a Professional Engineer and have sufficient capacity to serve estimated demand. A test of at least 4 hours duration shall be conducted to determine the yield and maximum draw-down for all wells developed as part of an individual water system. This test may be waived by the State Office based on the hydrologic and geologic conditions in the area.

c. Water that requires continual or repetitive treatment to be safe bacterially is not acceptable.

d. After installation, the system should be disinfected in accordance with the recommendations of the health authority. In the absence of a health authority, system cleaning and disinfection should conform with the current EPA Manual of Individual Water Supply Systems.

e. Any method for individual water supply contained herein which is not permitted by the local health authority having jurisdiction shall not be used.

2. *Well Location*— a. A well located within the foundation walls of a dwelling is not acceptable except in arctic and sub-arctic regions.

b. Water which comes from soil formation which may be polluted or contaminated or is fissured or creviced or which is less than 20 feet below the natural ground surface (subject to the requirements of the local health authority) is not acceptable.

c. Individual water supply systems are not acceptable for individual lots in areas where chemical soil poisoning is practiced if the overburden of soil between the ground surface and the water bearing strata is coarse-grained sand, gravel, or porous rock, or is creviced in a manner which will permit the recharge water to carry the toxicants into the zone of saturation.

d. Table 5 shall be used in establishing the minimum acceptable distances between wells and sources of pollution located on either the same or adjoining lots. These distances may be increased by either the health authority having jurisdiction or the FmHA or its successor agency under Public Law 103-354 State Director.

TABLE 5—DISTANCE FROM SOURCE OF POLLUTION

| Source of pollution | Minimum horizontal distance (feet) |
|--|------------------------------------|
| Property Line | 10 |
| Septic Tank | 50 |
| Absorption field | 100 |
| Seepage pit | 100 |
| Absorption Bed | 100 |
| Sewer Lines w/Permanent Watertight Joints | 10 |
| Other Sewer Lines | 50 |
| Chemically Poisoned Soil | 100 |
| Dry Well | 50 |
| Other | (2)— |

NOTES:

¹The horizontal distance between the sewage absorption system and the well, or the chemically poisoned soil and the well, may be reduced to 50 feet only where the ground surface is effectively separated from the water bearing formation by an extensive, continuous impervious strata of clay, hardpan, or rock. The well shall be constructed so as to prevent the entrance of surface water and contaminants.

²Other sources of pollution could be fuel oil or gasoline storage tanks, farm yards or chemical storage tanks, etc. The well should be separated from these sources of pollution a distance recommended by the local health authority.

3. *Well Construction*— a. The well shall be constructed to allow the pump to be easily placed and to function properly.

b. All drilled wells shall be provided with a sound, durable and watertight casing capable of sustaining the loads imposed. The casing shall extend from a point several feet below the water level at drawdown or from an impervious strata above the water level, to 12 inches above either the ground surface or the pump room floor. The casing shall be sealed at the upper opening.

c. Bored wells shall be lined with concrete, vitrified clay, or equivalent materials.

d. The space between the casing or liner and the wall of the well hole shall be sealed with cement grout.

e. The well casing shall not be used to convey water except under positive pressure. A separate drop pipe shall be used for suction line.

f. When sand or silt is encountered in the water-bearing formation, the well shall either be gravel packed, or a removable strainer or screen shall be installed.

g. The surface of the ground above and around the well shall be graded to drain surface water away from the well.

h. Openings in the casing, cap, or concrete cover for the entrance of pipes, pump or manholes, shall be made watertight.

i. If a breather is provided, it shall extend above the highest level to which surface water may rise. The breather shall be watertight, and the open end shall be screened and positioned to prevent entry of dust, insects and foreign objects.

4. *Pumps and Equipment*— a. Pumps shall be capable of delivering the volume of water required herein under normal operating pressures within the living unit. Well pump capacity shall not exceed the output of the well.

b. Pumps and equipment shall be mounted to be free of objectionable noises, vibrations, flooding, pollution, and freezing.

c. Suction lines shall terminate below maximum drawdown of the water level in the well.

d. Horizontal segments of suction line shall be placed below the frost line in a sealed casing pipe or in at least 4 inches of concrete. The distance from suction line to sources of pollution shall be not less than shown in table 5.

5. *Storage Tanks*— a. A system for an individual household shall include a pressure tank having a minimum capacity of 42-gallons. However, prepressurized tanks and other pressurizing devices are acceptable provided that delivery between pump cycles equals or exceeds that of a 42 gallon tank. Storage capacity on a system for multiple households must be sufficient to meet estimated peak demands.

b. Tanks shall be equipped with a clean-out plug at the lowest point, and if pressurized, a suitable pressure relief valve.

c. When additional storage is necessary because the well yield will not meet the system peak demands, all nonpressurized intermediate tanks shall be designed and installed in a manner that will prevent the pollution or degradation of the water supply.

B. *Community Water Systems*—1. *Definition*. In this subpart, a community water system is a system which meets the definition in the Safe Drinking Water Act.

2. *Design*. A community water system shall be designed by a qualified, professional engineer licensed in the state in which the water system will be located. Community water systems shall comply with all Federal and State laws.

VI. Wastewater Disposal Systems

Each dwelling shall be provided with a water-carried system adequate to dispose of domestic wastes in a manner which will not create a nuisance, contaminate any existing or prospective water source or water supply, or in any way endanger the public health.

A. *Individual Wastewater Disposal Systems*—1. *General*. a. In this subpart, an individual wastewater disposal system is a sewage disposal system which serves only 1 dwelling unit.

b. When service from an acceptable public or community system is not available or feasible, and ground water and soil conditions

are acceptable, an individual system may be used.

c. Each individual wastewater disposal system shall consist of a house sewer, a pretreatment unit (e.g., septic tank, individual package treatment plant), and acceptable absorption system (subsurface absorption field, seepage pit(s), or subsurface absorption bed). The system shall be designed to receive all sanitary sewage (bathrooms, kitchen and laundry) from the dwelling, but not footing or roof drainage. It shall be designed so that gases generated anywhere in the system can easily flow back to the building sewer stack.

2. *Percolation Tests*— a. Percolation tests are required unless a waiver is granted by the National Office. Waivers may be granted on a statewide or local basis in cases where an onsite evaluation of soils would be performed by a qualified soil technician, soil scientist, or engineer. Requests for waivers must describe the qualifications of the person evaluating the soils and discuss the criteria to be used in designing the absorption system.

b. In uniform soils one percolation test shall be made within each area proposed for an absorption system. If significant soil variations are encountered or expected, additional tests shall be made for each variation.

c. Percolation tests shall be conducted in accordance with good practice. Guidance for performing these tests is included in the EPA design manual, "Onsite Wastewater Treatment and Disposal Systems."

3. *Subsurface Absorption System*— a. Where percolation rates, soil characteristics and site conditions are acceptable, an absorption system may be installed in an area which is well drained, has an acceptable slope, and is acceptable for excavation.

b. Soils with percolation rates less than 1 minute per inch may be used if the soil is replaced with a layer of loamy or fine sand at least 2 feet thick. (Refer to the EPA Design Manual, "Onsite Wastewater Treatment and Disposal System".)

c. Soils with percolation rates greater than 60 minutes per inch are not acceptable for subsurface wastewater disposal systems.

B. *Community Wastewater Disposal Systems*—1. *Definition*. In this subpart, a community wastewater disposal system is any wastewater disposal system which serves more than 1 dwelling unit.

2. *Design*. A community wastewater disposal system shall be designed by a qualified, professional engineer licensed in the state in which the system will be located.

[52 FR 19284, May 22, 1987]

EXHIBIT C TO SUBPART C—CHECKLIST OF
VISUAL EXHIBITS AND DOCUMENTA-
TION FOR RRH, RCH, AND LH PRO-
POSALS

U.S. Department of Agriculture

Farmers Home Administration or its
successor agency under Public Law 103-354

This exhibit lists visual exhibits and docu-
mentation necessary for FmHA or its suc-
cessor agency under Public Law 103-354 to
properly evaluate proposed development. In-
termediate consultation by the applicant,
builder-developer and others hereafter re-
ferred to as the sponsor with the FmHA or
its successor agency under Public Law 103-
354 District or State Offices should be as fre-
quent as necessary to reduce chances of mis-
understandings and limit the amount of non-
productive time and expense for all parties
concerned.

I. *Preapplication Submission Documents:* The
sponsor will submit the following informa-
tion to the District Director to determine
feasibility of the project and general con-
formance with FmHA or its successor agency
under Public Law 103-354 policy:

A. *Form 1940-20, "Request for Environmental
Information."* Portions of the form must be
completed when the submission contains
more than 4 dwelling units and the entire
form must be completed when the submis-
sion contains more than 25 dwelling units.
The form and guidance concerning assembly
of the information is available at any FmHA
or its successor agency under Public Law
103-354 office.

B. *Location Map.* A general site location
map of the area indicating the adjacent land
zoning and uses, the present and future ac-
cess roads to the site as well as the prox-
imity to shopping, schools, churches, and
major transportation facilities with note of
traffic volumes. If a satisfactory map of the
locality is not available, a clear and pref-
erably scaled rough sketch map that pro-
vides the required information will be suffi-
cient.

C. *Property Survey Map.* A current survey
map of the project site showing the bound-
aries as well as all existing known features
specifically including utilities, easements,
access roads, floodplains, drainageways, rock
outcroppings and wooded areas or specimen
trees. If a current survey does not exist, the
most accurate document which is available
will be submitted.

D. *Soils Map and Report.* A complete soils
map and report, including "site specific" in-
terpretations and recommendations, from
the local or county representative of the
U.S. Department of Agriculture, Soil Con-
servation Service (SCS) Office will be in-
cluded with the location and feasibility sub-
mission. A determination of whether or not

any lands described in USDA Regulation
9500-3 are impacted by the proposed develop-
ment should also be included. The local SCS
office may provide recommendations for the
development of suitable drainage and land-
scaping plans later in the planning process.

E. *Market survey.* A market survey will be
submitted in accordance with the require-
ments of the respective loan program as indi-
cated in part 1944, subparts D and E of this
chapter.

F. *Request for Exceptions.* Any need for
State or National Office exception(s) should
be identified at this stage in the processing.
Appropriate exception(s) should be requested
and obtained before proceeding to the pre-
liminary submission.

G. *Other.* The applicant will need to submit
any additional information that may be
needed as indicated in subpart D or exhibit
A-7 of subpart E of part 1944 of this chapter.
This may include but is not limited to:

1. Schematic design drawings showing the
proposed plot plan, typical unit plans, and
elevations. If available, the proposed pre-
liminary drawings and specifications may be
submitted. This would be of assistance if it is
determined that the loan must receive Na-
tional Office authorization.

2. Type of construction.

3. The total number of living units and the
number of each type of living unit proposed.

4. Type of utilities such as water, sewer,
gas, and electricity and whether each is pub-
lic, community, or individually owned.

II. *Application Submission Documents:* After
it is determined by FmHA or its successor
agency under Public Law 103-354 that the
project is feasible and the location conforms
with the intent of the funding program, the
sponsor will submit the following informa-
tion to the District Director in addition to
those materials submitted previously.

A. *Property Survey.* A survey (where 1 inch
represents no more than 100 feet) of the prop-
erty lot showing the exact boundaries and
corners of the property accompanied by a
written description of said boundaries. Also,
locations of predominant features such as
utilities, easements, access points,
floodplains, drainageways, rock outcroppings
and wooded areas or specimen trees affecting
the proposed development must be included.
This document shall bear the seal of a pro-
fessional licensed to provide surveying serv-
ices in the State in which the project will be
located. This survey could be a part of item
D below.

B. *Topographic Map.* An accurate topo-
graphic map showing existing and proposed
contours with a scale compatible with the
size of the project. The site shall be shown at
a reasonable scale with 5-foot contour inter-
vals. Where the site is unusually level or
steep, the contour intervals may be varied
accordingly.

C. Preliminary Site Plan. A line drawing, to scale, showing proposed street locations with profiles and widths, lot layouts, major drainageways, and other development planned. Preliminary sections and details shall be provided for the street construction, curbs and gutters, drainageways, and other physical improvements.

D. Preliminary Dwelling Drawings and Specifications. Drawings of the dwelling units, preliminary floor plans and specifications, elevations and sample site plans showing the placement of the individual buildings should be submitted.

E. Statement of Planning and Zoning Compliance. Local, county and State approvals as applicable. If change of zoning or variance is required, the status of the variance or change of zoning shall be documented.

F. Technical Service Contracts. Executed contracts for the professional services of an architect, engineer, land surveyor, landscape architect, site planner and/or soil engineer will be submitted as appropriate for the planning of the proposed development.

G. Utility Approvals. Statements of approval and feasibility for utility systems as follows:

1. Verification of adequate capacity and approval to tie-in with local existing water, wastewater disposal, electric, telephone, and other utility systems, as appropriate.

2. Tentative approval of local or State health authority for individual water and/or wastewater disposal systems when it is clear that central systems are unfeasible at this time. Use §1924.108(a)(5) of this subpart when preparing information required.

H. Facility Acceptance. Evidence that the appropriate public body is willing to accept and maintain streets, common areas, lighting, fire hydrants, sidewalks, drainageways, and utilities, as appropriate, when dedicated to said body.

I. Preliminary Specifications. Outline specifications describing all the proposed materials to be used and how they are to be applied. These are only the materials used in the land development and construction of the streets, drainage, and utility work.

J. Incremental Slopes Plan. If areas of common slope are not identified elsewhere in adequate detail, this information should be provided in a separate plan.

K. Preliminary Grading Plan. This plan will indicate degree of work required to provide positive drainage of all building sites and control measures to be taken to eliminate soil erosion. Dwelling locations may be shown if they can be predetermined.

L. Other. The applicant will need to submit any additional information that may be needed as indicated in the respective loan program regulations as indicated in part 1944, subparts D and E and part 1822, subpart F of this chapter (FmHA or its successor agency under Public Law 103-354 Instruction

444.7). This may include but not be limited to:

1. A detailed trade-item cost breakdown of the project for such items as land and right-of-way, building construction, equipment, utility connections, architectural/engineering and legal fees, and both on- and off-site improvements. The cost breakdown also should show separately the items not included in the loan, such as furnishings and equipment. This trade-item cost breakdown should be updated just prior to loan approval.

2. Information on the method of construction, on the proposed contractor if a construction contract is to be negotiated and on the architectural, engineering, and legal services to be provided.

3. For all projects containing over four units the applicant will submit an Affirmative Fair Housing Marketing Plan for approval by FmHA or its successor agency under Public Law 103-354 in accordance with §1901.203 of subpart E to part 1901 of this chapter. The Affirmative Fair Housing Marketing Plan must be prepared in a complete, meaningful, responsive and detailed manner.

4. A description and justification of any related facilities (including but not limited to workshops, community buildings, recreation center, central cooking and dining facilities, or other similar facilities to meet essential needs) to be financed wholly or in part with loan funds.

III. Technical Documents Necessary for the Obligation of Funds. All decisions regarding the conceptual design of the proposed project should be made prior to this submission. This effort is mainly to demonstrate that those agreed upon concepts have been transformed into construction documents and the necessary approvals have been granted. All items requiring revision or more detailed information as determined by the review of the preliminary submission will be resolved before the sponsor prepares the final submission. All documents shall be executed in a professional manner and shall carry the appropriate designation attesting to the professional qualifications of the architect, engineer, land surveyor or site planner. All documents will be accurately drawn at an appropriate scale.

[52 FR 19284, May 22, 1987, as amended at 56 FR 2202, Jan. 22, 1991]

Subparts D-E [Reserved]

Subpart F—Complaints and Compensation for Construction Defects

SOURCE: 56 FR 40241, Aug. 14, 1991, unless otherwise noted.

§ 1924.251 Purpose.

This subpart contains policies and procedures for receiving and resolving complaints concerning the construction of dwellings and construction, installation and set-up of manufactured homes (herein called “units”), financed by the Farmers Home Administration (FmHA) or its successor agency under Public Law 103-354, and for compensating borrowers for structural defects under section 509(c) of the Housing Act of 1949, as amended. Provisions of this subpart do not apply to dwellings financed with guaranteed section 502 loans.

§ 1924.252 Policy.

FmHA or its successor agency under Public Law 103-354 is responsible for receiving and resolving all complaints concerning the construction of dwellings and the construction, installation and set-up of units financed by FmHA or its successor agency under Public Law 103-354. FmHA or its successor agency under Public Law 103-354 must determine whether defects are structural or non-structural. If the defect is structural and is covered by the builder's/dealer-contractor's (the “contractor”) warranty, the contractor is expected to correct the defect. If the contractor cannot or will not correct the defect, the costs of correcting the defect may be paid by the Government, or the borrower may be compensated for correcting the defect, under the provisions of this subpart. If the defect is non-structural but is covered under the provisions of the contractor's warranty or independent home warranty, the contractor is still expected to correct the defect. FmHA or its successor agency under Public Law 103-354 will assist the borrower in obtaining assistance through the independent home warranty company's and/or manufacturer's complaint resolution process. However, if the contractor cannot or will not correct a non-structural defect covered under the provisions of the contractor's warranty, the Government will not pay the costs for correcting the defect, nor will the borrower be compensated for doing so.

§ 1924.253 Definitions.

As used in this subpart, the following definitions apply:

(a) *Newly constructed dwelling.* One which:

(1) Is financed with a section 502 insured loan;

(2) Was constructed substantially or wholly under the contract method, or under a conditional commitment, or, as to only work performed by a contractor or covered by a manufacturer's warranty, under the mutual self-help program;

(3) Was not more than one year old and not previously occupied as a residence at the time financial assistance was granted unless FmHA or its successor agency under Public Law 103-354 has extended the conditional commitment issued on a newly constructed dwelling in accordance with subpart A of part 1944 of this chapter; and

(4) Had the required construction inspections performed by FmHA or its successor agency under Public Law 103-354, the Department of Housing and Urban Development (HUD), or the Veterans Administration (VA).

(b) *Newly constructed manufactured home (unit).* One which:

(1) Is financed with a section 502 insured loan;

(2) Was not more than one year old and not previously occupied as a residence at the time financial assistance was granted; and

(3) Is built to the Federal Manufactured Home Construction and Safety Standards (FMHCSS) and is certified by an affixed label as shown in exhibit F of subpart A of part 1944 of this chapter.

(c) *Non-structural defect.* A construction defect which does not affect the overall useful life, habitability, or structural integrity of the dwelling or unit. Some non-structural defects may be covered under the contractor's warranty. Examples of non-structural defects include, but are not limited to:

(1) Cracks attributed to normal curing or settlement.

(2) Cosmetic defects in cabinets, woodwork, floorcovering, wallcovering, ornamental trim, etc.

(3) Improper or incomplete seeding or sodding of yard, or failure of trees,

shrubs, grass and other landscaping items to thrive.

(4) Improper grading of yard, unless the grade is causing damage which may lead to a structural defect.

(d) *Structural defect.* A defect in the dwelling or unit, installation or set-up of a unit, or a related facility or a deficiency in the site or site development which directly and significantly reduces the useful life, habitability, or integrity of the dwelling or unit. The defect may be due to faulty material, poor workmanship, or latent causes that existed when the dwelling or unit was constructed. The term includes, but is not limited to:

(1) Structural failures which directly and significantly affect the basic integrity of the dwelling or unit such as in the foundation, footings, basement walls, slabs, floors, framing, walls, ceiling, or roof.

(2) Major deficiencies in the utility components of the dwelling or unit or site such as faulty wiring, or failure of sewage disposal or water supply systems located on the property securing the loan caused by faulty materials or improper installation.

(3) Serious defects in or improper installation of heating systems or central air conditioning.

(4) Defects in or improper installation of safety and security devices, such as windows, external doors, locks, smoke detectors, railings, etc., as well as failure to provide or properly install devices to aid occupancy of dwellings by handicapped individuals, where required.

(5) Defects in or improper installation of protective materials, such as insulation, siding, roofing material, exterior paint, etc.

§§ 1924.254–1924.257 [Reserved]

§ 1924.258 Notification of borrowers.

FmHA or its successor agency under Public Law 103–354 will notify by letter all borrowers who receive Section 502 RH financial assistance for a newly constructed dwelling or unit of the provisions of this subpart. Subsequent owners of eligible dwellings will also be notified in accordance with this section. Borrowers will be notified within 30 days after the loan is closed, or

within 30 days after final inspection, whichever is later. This notification will contain information concerning time frames for filing claims under this subpart. FmHA or its successor agency under Public Law 103–354 will also notify and advise borrowers of the construction defects procedure at any time construction defects are apparent within the statutory time frame and favorable results cannot be obtained from the contractor. This notification will be documented in the borrower's case file.

§ 1924.259 Handling dwelling construction complaints.

This section describes the procedure for handling construction defect complaints.

(a) Each borrower who complains about construction defects will be requested to make a written complaint using a format specified by FmHA or its successor agency under Public Law 103–354 (available in any FmHA or its successor agency under Public Law 103–354 office). All known defects will be listed. An oral complaint may be accepted if making a written complaint will impose a hardship on the borrower. If an oral complaint is made, FmHA or its successor agency under Public Law 103–354 will notify the contractor on behalf of the borrower.

(b) The borrower will be informed that if, after 30 calendar days, the defects have not been corrected or other satisfactory arrangements made by the contractor, the borrower should notify FmHA or its successor agency under Public Law 103–354 using a format specified by FmHA or its successor agency under Public Law 103–354 (available in any FmHA or its successor agency under Public Law 103–354 office).

(c) FmHA or its successor agency under Public Law 103–354 will advise the contractor in writing of the borrower's complaint, the time and date of planned inspection by FmHA or its successor agency under Public Law 103–354 personnel, and request that the contractor accompany the inspector and borrower on a joint inspection of the property in an attempt to resolve the complaint.

(d) If, prior to the planned inspection, the contractor informs FmHA or its

successor agency under Public Law 103-354 that the alleged defect(s) has been or will be corrected within 30 calendar days, FmHA or its successor agency under Public Law 103-354 will notify the borrower.

(e) If the case is not resolved as outlined in paragraph (d) of this section, FmHA or its successor agency under Public Law 103-354 will:

(1) [Reserved]

(2) Notify the borrower, contractor and manufacturer, if applicable, in writing of FmHA or its successor agency under Public Law 103-354's findings and who has been determined responsible for correcting the defect(s).

(i) If the defects are determined to be covered under the contractor's warranty, FmHA or its successor agency under Public Law 103-354 will advise the contractor that the repairs must be completed within 30 calendar days or other time period agreed to by the borrower, the contractor, and FmHA or its successor agency under Public Law 103-354.

(ii) FmHA or its successor agency under Public Law 103-354 will further advise the contractor and/or manufacturer that if the defect(s) are not corrected, the Government will consider compensating the borrower for the costs of correcting the defect(s). In such a case, the contractor and/or manufacturer may be liable for costs paid by the Government and may be subject to suspension and/or debarment pursuant to subpart M of part 1940 of this chapter (available in any FmHA or its successor agency under Public Law 103-354 office). Even if the manufacturer is determined to be solely responsible for the defect, the contractor will still be held liable for correction of the defect.

(3) Should a contractor refuse to correct a defect after being officially requested in writing to do so, FmHA or its successor agency under Public Law 103-354 will promptly institute formal suspension and debarment proceedings against the contractor (as a company and as individual(s)) in accordance with subpart M of part 1940 of this chapter (available in any FmHA or its successor agency under Public Law 103-354 office). The contractor's failure to reply to official correspondence or in-

ability to correct a defect constitutes noncompliance.

(4) If the contractor is willing to correct legitimate defects but the borrower refuses to permit this, FmHA or its successor agency under Public Law 103-354 will document the facts in the borrower's case file. If the borrower chooses to file a claim for compensation for these defects, the circumstances of the borrower's refusal will be reviewed and may be sufficient grounds for disapproval of the claim.

(f)-(h) [Reserved]

§ 1924.260 Handling manufactured housing (unit) construction complaints.

When a borrower who has purchased a manufactured home (or "unit") complains about construction defects, the borrower will be instructed to first contact the dealer-contractor from whom the unit was purchased. FmHA or its successor agency under Public Law 103-354 will assist the borrower in obtaining assistance through the dealer-contractor's and/or HUD's complaint resolution process. If the dealer-contractor cannot resolve the complaint, the borrower should contact the appropriate State Administrative Agency (SAA) or HUD. If the complaint resolution process does not result in the correction of the defect, the borrower's complaint will be handled in accordance with § 1924.259 of this subpart.

§ 1924.261 Handling complaints involving dwellings covered by an independent or insured home warranty plan.

Borrowers with complaints about dwellings covered by an independent or insured home warranty plan will be instructed to first contact the warranty company and follow the complaint resolution process for that company, with the assistance of FmHA or its successor agency under Public Law 103-354, if needed. If the complaint is not resolved in this manner, it will be handled under § 1924.259 of this subpart.

§ 1924.262 Handling complaints involving dwellings constructed by the self-help method.

When a borrower whose dwelling was constructed by the self-help method complains about construction defects,

FmHA or its successor agency under Public Law 103–354 will determine whether the defect is the result of work performed by a contractor or work performed by the borrower under the guidance of the self-help group. Defects which are determined to be the responsibility of a contractor will be handled in accordance with §1924.259 of this subpart. Defects determined to be the result of work performed by the borrower are not eligible for compensation under this subpart.

§§ 1924.263–1924.264 [Reserved]

§ 1924.265 Eligibility for compensation for construction defects.

(a) To be eligible for assistance under this subpart, the following criteria must be met:

(1) The approval official, in consultation with the State Architect/Engineer and/or Construction Inspector, must determine that:

(i) The construction is defective in workmanship, material or equipment, or

(ii) The dwelling or unit has not been built in substantial compliance with the approved drawings and specifications, or

(iii) The dwelling or unit does not comply with the FmHA or its successor agency under Public Law 103–354 construction standards in effect at the time the loan was approved or the conditional commitment was issued, or

(iv) The property does not meet code requirements.

(2) The claim must be for one or more of the following:

(i) To pay for repairs;

(ii) To compensate the owner for repairs;

(iii) To pay emergency living or other expenses resulting from the defect; or

(iv) To acquire title to property.

(3) The dwelling or unit must be newly constructed as defined in §1924.253 of this subpart and financed with an insured Section 502 RH loan.

(4) The claim seeking compensation from FmHA or its successor agency under Public Law 103–354 must be filed with FmHA or its successor agency under Public Law 103–354 within 18 months after the date financial assistance is granted. Defects for which

claims are filed beyond the 18-month period must have been documented by FmHA or its successor agency under Public Law 103–354 in the borrower's case file or on the form designated by FmHA or its successor agency under Public Law 103–354 (available in any FmHA or its successor agency under Public Law 103–354 office), prior to expiration of the 18-month period. For loans made to construct a new dwelling or erect a new manufactured housing unit, financial assistance is granted on the date of final construction inspection and acceptance by the borrower and FmHA or its successor agency under Public Law 103–354. Claims must be submitted by completing the designated form (available in any FmHA or its successor agency under Public Law 103–354 office).

(5) Any obligation of the contractor to correct the defect(s) under a contractor's warranty must have expired, or the contractor is responsible for making corrections under the contractor's warranty but is unable or unwilling to do so.

(b) Subsequent owners of eligible dwellings or units who are also Section 502 borrowers may be eligible to receive compensation for construction defects. These owners will be notified in accordance with §1924.258 of this subpart. However, the claim for compensation must be filed in accordance with paragraph (a)(4) of this section within the 18-month period established for the original rural housing (RH) borrower.

§ 1924.266 Purposes for which claims may be approved.

(a) *Eligible purposes.* A claim may be approved to:

(1) Pay, or reimburse the borrower for costs already paid, to repair major structural defects which are completed in accordance with plans and specifications approved by FmHA or its successor agency under Public Law 103–354. Repairs must be made by a reputable licensed contractor and a warranty covering the repairs will be issued by the contractor when the repairs are completed, as prescribed in subpart A of this part. Payment will be based on actual cost of the development and the borrower must provide

evidence to reasonably establish the development cost. Workmanship and materials used in repairs must be consistent with the level of quality specified in the original dwelling or unit specifications and/or comparable to the items being replaced. Payment may be made:

(i) To cover damages which are a direct result of the defect to permanent enhancements made, such as landscaping, completion of unfinished living spaces, etc., of the dwelling or unit, installation or set-up of the unit, or related facilities, and

(ii) For costs approved by FmHA or its successor agency under Public Law 103-354 for professional reports by engineers, architects or others needed to determine cause of or means to repair the defect.

(2) Reimburse the borrower for funds expended for emergency repairs. Emergency repairs are those repairs necessary to preserve the integrity of the structure, to prevent damage or further damage to personal property or fixtures in the dwelling or unit and related facilities, or to prevent or eliminate immediate health hazards. Receipts or other evidence of borrower's expenditures must be provided.

(3) Acquire title to the property by the Government and, when appropriate, compensate the claimant for any loss of borrower contribution at the time the loan was closed. Conveyance of properties under this section will be handled in accordance with subpart A of part 1955 of this chapter.

(i) Before FmHA or its successor agency under Public Law 103-354 accepts a conveyance, the borrower must attempt to sell the dwelling or unit in accordance with subpart C of part 1965 of this chapter, if the dwelling or unit is considered decent, safe and sanitary as prescribed in subpart C of part 1955 of this chapter. If the property is sold, FmHA or its successor agency under Public Law 103-354 will:

(A) Pay the borrower's relocation expenses, including temporary living expenses as prescribed in paragraph (a)(4) of this section, until another suitable property can be located;

(B) Pay related sales expenses, as prescribed in subpart C of part 1965 of

this chapter, if the property is sold for less than the debt against it;

(C) Release the borrower from personal liability for the remaining FmHA or its successor agency under Public Law 103-354 debt; and

(D) Process an application for a new RH loan if the borrower so desires and is still eligible for FmHA or its successor agency under Public Law 103-354 assistance.

(ii) If the dwelling or unit is not considered decent, safe and sanitary as prescribed in subpart C of part 1955 of this chapter, FmHA or its successor agency under Public Law 103-354 should accept a voluntary conveyance of the property under the provisions of subpart A of part 1955 of this chapter. Compensation for properties taken into inventory under this paragraph may not exceed the difference between the present market value of the security as established by the appraisal when the loan was made and the amount of the FmHA or its successor agency under Public Law 103-354 loan and any prior liens.

(iii) A borrower contribution which may be compensated for under this paragraph may be such things as:

(A) A borrower's land or cash contribution,

(B) Development work done by the borrower under the self-help program or borrower method of construction, the cost of which was not included in the loan funds,

(C) Attorney fees, abstract costs or title insurance costs actually paid by the claimant in connection with closing the loan.

(4) Pay or reimburse the borrower for temporary living expenses, miscellaneous expenses, storage of household goods and moving expenses incurred as a result of the defect.

(i) Payment under this paragraph may be made under either of the following circumstances:

(A) The property is acquired by the Government in accordance with subpart A of part 1955 of this chapter and FmHA or its successor agency under Public Law 103-354 determines that the dwelling is not habitable and the severity of the defect(s) prevents the property from being repaired and made

suitable as a permanent residence for the borrower.

(B) The property is not acquired by the Government but FmHA or its successor agency under Public Law 103–354 determines that the dwelling is not habitable or must be vacated in order to repair the defects.

(ii) Claims for compensation under paragraph (a)(4) of this section are limited as follows:

(A) Compensation may be granted for temporary living expenses for not more than 45 calendar days per claim unless a longer period is authorized by FmHA or its successor agency under Public Law 103–354. Compensation will be paid for actual cost to the claimant not to exceed the Government per diem rate for the area where the borrower's dwelling or unit is located. Reimbursement may be claimed for expenses such as food, lodging, laundering, etc., which would not have been incurred had the claimant remained in the house.

(B) Compensation may be granted for actual miscellaneous expenses not to exceed \$500 to cover such items as utility connect and disconnect fees.

(C) Compensation may be granted for moving and storage expenses not to exceed \$5,000 unless authorized by FmHA or its successor agency under Public Law 103–354 and not to exceed the actual cost of moving the claimant household with personal belongings a distance of not more than 50 miles from the original residence. Compensation for storage expenses may not exceed that amount paid to store household furnishings for 45 days.

(D) A strict accounting of the use of such funds must be maintained by the borrower and will be verified by FmHA or its successor agency under Public Law 103–354.

(5) Compensate the claimant for reasonable interest paid on loans obtained for the sole purpose of correcting structural defects or other approved purposes under this section.

(b) *Ineligible purposes.* Compensation will not be granted for:

(1) Completion of a dwelling or unit or installation of materials/items required under the construction contract and/or specifications.

(2) Defective items which were not completed under the contract method or under the conditional commitment and supported by a builder's warranty. Work performed under the borrower method or self-help program without a warranty by a responsible party is not eligible for compensation.

(3) Damage caused by defective design, workmanship, or material in making enhancements to or remodeling the dwelling or unit or related facilities which were not financed or approved by FmHA or its successor agency under Public Law 103–354.

(4) The loss of past, present or future wages or salary directly or indirectly resulting from the defect.

(5) Treatment for physical or psychological damages including medical and dental claims.

(6) Death benefits or funeral expenses.

(7) Damages encountered as a result of war, civil disorder, flood, tornado, lightning, earthquake or acts of nature which the structure was not designed to withstand.

(8) Damages resulting from the homeowner's negligence or failure to properly maintain the property.

(9) Damage to personal property.

§§ 1924.267–1924.270 [Reserved]

§ 1924.271 Processing applications.

An application for compensation for construction defects shall be submitted by the claimant to FmHA or its successor agency under Public Law 103–354 on the designated form (available in any FmHA or its successor agency under Public Law 103–354 office). The application shall be completed in its entirety. All structural defects and claims for which compensation is sought will be listed. Borrowers will be told not to incur any expenses for repairs or temporary living expenses, except for emergency situations, until funds have been allocated and the request has been approved under § 1924.273 of this subpart.

§ 1924.272 [Reserved]

§ 1924.273 Approval or disapproval.

(a) Claimants will be notified in writing of the decision on the claim within

RHS, RBS, RUS, FSA, USDA

§ 1925.1

60 days of the date the designated form (available in any FmHA or its successor agency under Public Law 103-354 office) is signed by the borrower. If the claim or any part of the claim is denied at any level, the claimant will be informed in writing of the reason(s) for the denial and advised of appeal rights in accordance with subpart B of part 1900 of this chapter.

(b) [Reserved]

§ 1924.274 Final inspection.

Except for emergency repairs, all repair work must be performed in accordance with subpart A of this part. In all cases, FmHA or its successor agency under Public Law 103-354 will make a final inspection of the repair work performed before final payment is made for the work.

§ 1924.275 [Reserved]

§ 1924.276 Action against contractor.

If FmHA or its successor agency under Public Law 103-354 pays for correction of construction defects which are the responsibility of the contractor, debarment proceedings will be initiated against the contractor in accordance with subpart M of part 1940 of this chapter (available in any FmHA or its successor agency under Public Law 103-354 office), even if the contractor has gone out of business, declared bankruptcy, cannot be located, etc. The debarment will be pursued in both the contractor's company name and the principal parties as individuals, and any successor entities, if known. If the manufacturer of the defective product is determined to be solely responsible, no action will be taken against the contractor. In such a case, debarment will be initiated against the manufacturer. An assignment of the borrower's claim against the contractor or other party will be obtained if it appears to the approval officials, with any necessary advice from the Office of the General Counsel, that recovery is reasonably possible.

§§ 1924.277-1924.299 [Reserved]

§ 1924.300 OMB control number.

The reporting and recordkeeping requirements contained in this regula-

tion have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575-0082. Public reporting burden for this collection of information is estimated to vary from 15 minutes to 2 hours per response, with an average of .28 hours per response including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Department of Agriculture, Clearance Officer, OIRM, room 404-W, Washington, DC 20250; and to the Office of Management and Budget, Paperwork Reduction Project (OMB #575-0082), Washington, DC 20503.

PART 1925—TAXES

Subpart A—Real Estate Tax Servicing

Sec.

1925.1 General.

1925.2 Definition of tax.

1925.3 Servicing taxes.

1925.4 Servicing delinquent taxes.

1925.5-1925.50 [Reserved]

AUTHORITY: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Real Estate Tax Servicing

§ 1925.1 General.

This Instruction applies to borrowers with a Farm Ownership (FO), Operating Loan (OL), Soil and Water (SW), Recreation Loan (RL), Emergency (EM), Economic Opportunity (EO), Rural Rental Housing (RRH), Rural Cooperative Housing (RCH), Labor Housing (LH), Softwood Timber (ST), and Non-Program (NP) loans secured by real estate. It also applies to section 502 and section 504 Rural Housing borrowers (Single Family Housing (SFH)) who also have a Farmer Program loan. It does not apply to borrowers who have a SFH loan only; those will be serviced under § 1965.105 of subpart C of part 1965 of this chapter. Borrowers are
